

# IDP 2022-2027 Review 2024-2025

Adopted 15 May 2024

#### **Contents**

MAYORS FOREWORD	8
CHAPTER ONE: ENVIRONMENTAL ANALYSIS	9
1. Spatial Characteristics of the area	9
2. Environmental Opportunities	13
3. Environmental Challenges	14
4. Protection of Natural Assets and IEP Programmes	15
5. The Impact of Climate Change	18
6. Regulation of Air Quality Emissions	20
CHAPTER TWO: DEMOGRAPHIC ANALYSIS	21
1. Demographic / Population Analysis	21
2. Development Indicators	26
3.Migration Plan	31
4.Population Concerns	31
5.Incorporation of Population Issues into Planning	32
6. Conclusion	33
CHAPTER THREE: SOCIO-ECONOMIC ANALYSIS	34
1.Economic Overview	34
2.Gross Domestic Product by Region (GDP-R)	34
3.Economic Growth Forecast	35
4.Gross value added by region (GVA-R)	36
5.Tress Index	39
6.Location Quotient	39
7.Tourism	40
8.International Trade	41
9. Employment	41
10.Index of Buying Power (IBP)	43
11. Comparative and Competitive Advantages	44
12. Challenges	46
13. Economic Infrastructure	47
16. Investment Attraction, Small Town Revitalisation and Policy Framework	52
17. LED Priorities & Spatial Realities	54

18. Alignment between the NDP, PDP, NGP & LED Strategy	54
19. LED Strategy and alignment with the One plan	56
20. Conclusion	57
CHAPTER FOUR: BASIC SERVICE DELIVERY	59
1. SLA's and other Institutional Arrangements	59
2. Spatial Analysis and Rationale	59
3. Development Nodes and Settlement proposals	61
4. Spatial Proposals	63
5. Land Tribunal and by laws	68
6. Human Settlement Type	69
7. Land Tenure, SDF's & Demand for Land	71
8. Land Redistribution	72
9. Migration	73
10. Informal Settlements	73
11. Capacity to manage housing delivery	74
12. Land Potential & Constraints	74
13. Analysis of Housing Need	75
14. Land Requirements for Future Development	76
15. Challenges	76
16. Interventions	77
17. Projects	78
18. Health Services	80
19. Telecommunications	82
20. Community Facilities	83
21. Libraries	86
22. Safe & Secure Environment	87
23. Waste Management	88

# MAYORS FOREWORD

I am honoured to introduce the IDP review for 2024/25. The IDP contains the programmes and targets that Council wishes to obtain in its 5-year term. Communities have expressed their needs through village ward meetings and the review of five-year ward plans.

The implementation and success of the IDP will rely on strong and constant interactive partnerships with sector departments, private business and traditional leaders. The financial viability of the Municipality is dependent on improving the tax base of the Municipality and improving current collection rates. However, the continuing depressed economic climate has resulted in many households struggling to meet their required financial needs. It is therefore important that municipal services are not only affordable but that they are financially sustainable.

Rising unemployment means that Council's infrastructure and service delivery must be geared towards creating an environment which will assist the economy to grow and flourish. It must also be sustainable and affordable.

### Cllr V. Stokwe – Mayor

# CHAPTER ONE: ENVIRONMENTAL ANALYSIS

# 1. Spatial Characteristics of the area

### 1.1. Introduction

Senqu Municipality is a Category B Municipality under the Joe Gqabi District Municipality in the Eastern Cape. It borders with the Kingdom of Lesotho in the north, Free State and Walter Sisulu Municipality in the west, Emalahleni and Sakhisizwe Municipalities in the south and Elundini Municipality in the east.

It covers an area of 7329km<sup>2</sup>. with 179 villages and 3 major urban centres viz Lady Grey, Barkly East and Sterkspruit (Senqu HSP 2020) divided into 17 wards. It has 3 minor urban hamlets of Rossouw, Rhodes & Herschel.

The Municipality has a mainly rural population who live in villages. The traditional rural landscape is changing with increased urbanisation and less time and money being spent on a subsistence farming lifestyle. Villages are increasingly growing towards former urban areas such as Sterkspruit and Hershel.

### 1.2. Soil, land, and vegetation types

#### 1.2.1 Vegetation types

Vegetation can be considered as the group of plants forming part of the plant cover of a geographic area. It is apparent that the area is mostly covered in grassland. The SLM area has the following vegetation types: 1. Basotho Montano Shrubland 2. Bessernkaree Koppies Grassland 3. The Drakensberg Foothill Moist Grassland 4. Senqu Montana Shrubland 5. Southern Drakensberg Highland Grassland 6. Stormberg Plateau Grassland 7. The Tsomo Grassland 8. Zastron Moist Grassland (SDF,2022:128).

#### 1.2.2. Land cover, usage, and composition

Senqu Municipality has limited land available for intensive agricultural practices due to the poor soils and lack of depth. Total cultivation is 47 319,21 ha with dry land cultivation forming most of the cultivated use in the area. In total the area under cultivation is 47 319.21 ha, out of this dry land under commercial Production is 18 178. 39 ha with commercial irrigated land of 3 866, 57 ha. Semi commercial use i.e., commonages have 25274,.25 ha (Information supplied by the Department of Agriculture). This is why livestock production is the main agricultural activity in the Municipality.

The following can be noted in the SLM in terms of land coverage and its capability:

- The majority of the municipal area is unimproved grassland (75.6%), with only 6.6% of the area used for cultivation purposes.
- Approximately 13% of the surface area is classified as degraded which essentially means that it has previously been subjected to poor land use and management practices such as overgrazing or inappropriate cultivation methods.
- Only 1.1% of the surface area is developed as built areas, including the urban areas of Sterkspruit, Lady Grey and Barkly East, as well as the rural settlements.

Senqu has major challenges relating to land invasions of municipal owned or state land. This is due to lack of land being offered for sale and people being unable to afford land but wishing to be closer to prospective employment and urban amenities in the urban areas of Barkly East and Lady Grey. In the smaller rural hamlets of Rhodes, Rossouw and Herschel people are invading land and building informal settlements to move closer to urban amenities or receive housing with freehold tenure especially farm worker (SDF,2022:126). The Municipality has implemented several measures to counteract this, which is explained later in the document.

A large portion of the arable land in SLM is in the north. The Sterkspruit settlements and other rural settlements in the north have taken advantage of this arable land as we can see a notably high population density in these areas. Rossouw also has a notable amount of arable land. (SDF,2022:140).

## 1.2.3. Soil, geology, and topography

The Municipality has 3 distinct geology types. These are the Karoo Supergroup, Basaltic lavas of the Drakensberg Group and Beaufort, Molteno, Elliot & Clarens Groups of sandstone & shale (JGDM Environmental Plan,2011). This is due to the topography of the area which is mountainous and part of the Drakensberg. These are some of the oldest geological types in South Africa which explains why the area has such poor soils.

The soils in the Municipality are highly erodible, with poor depth. This problem is exasperated by communal grazing methods, lands not being well maintained or protected under the previous dispensation. The primary cause is overstocking of livestock and inappropriate grazing methods.

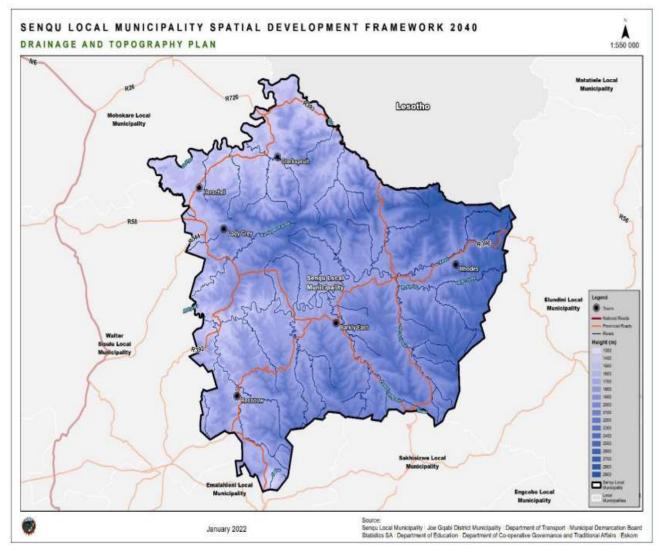

The soils improve towards the east in composition and depth (JGDM Environmental plan,2011). Land degradation is a hazard in areas where communities are dependent on their natural environment for a living, especially in densely populated areas, such as the former Homelands. An area with a high population density, where the main land use is classified as subsistence farming, is at risk of environmental degradation.

Activities causing degradation are the greatest threat to grasslands such as overgrazing and inappropriate burning regimes. Land degradation leads to soil erosion and loss in plant cover. Overgrazing results in the depletion of species diversity, which in turn reduces the number of suitable habitats to maintain fauna diversity. Unsuitable agricultural practices, such as

increasing irrigation in areas of poor soils and cash crop cultivation in marginal areas is another threat to biodiversity in the Municipality.

The greatest threat to wetlands is grazing, trampling and inappropriate fire burning regimes. In rivers, poor water catchment area management practices are also significant threats. Water from wetlands is relied upon in areas where no additional irrigation is supplied for cultivation (SDF,2022:133).

The Municipality is mountainous with the height above sea level increasing from the west to the east. The highest mountain ranges are found in the east and north. The highest point is Ben MacDhui at 3001m (JGDM Environmental Plan,2011). Slopes are extremely steep – at more than 1:8 which is why erosion caused by rainfall runoff, remains one of the primary environmental concerns in the Municipality (JGDM Environmental Plan,2011).

Source: SDF 2022

### 1.3. Climate

The Municipality has different temperatures ranges throughout its geographical area. The coldest part is in the East, as it is the highest above sea level. The hottest parts are in the plains around Lady Grey. Temperature fluctuations are extreme with variations of between 42°C in summer and - 16°C in winter. In winter, the minimum temperature can vary between 20°C and -7°C. There is an annual average of 150 days of frost (JGDM Environmental Plan,2011), which results in a short and unreliable growing season. Due to the temperature fluctuations, temperature inversions are often seen in winter formed by the smoke of residential fires.

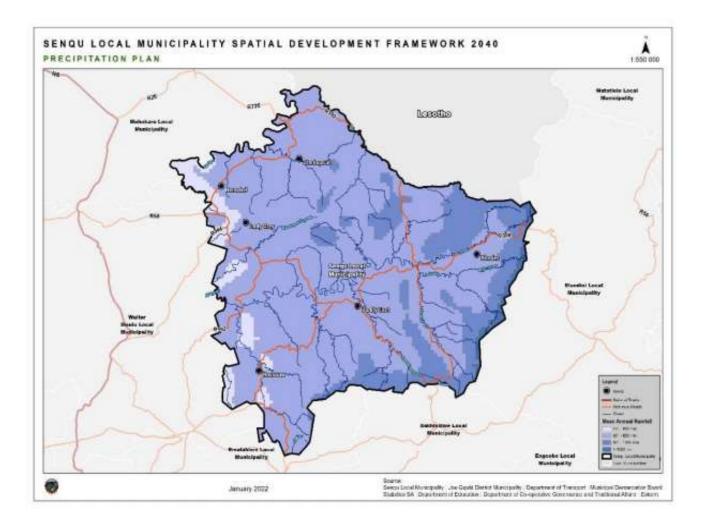

Rainfall varies from between 1000mm to 1400mm of rainfall per annum in the East, to about 600mm in the lower lying Western and Southern areas. Rainfall is highest, where the land elevation is high and decreases as the elevation decreases. 500 mm of rain per annum is regarded as the minimum amount of rain required for sustainable crop production. Rainfall tends to come from thunderstorms and in sudden downpours. This results in flash floods and rock debris which blocks roads and bridges. Softer and all-day rainfall does occur but it is not as common as quick hard downpours.

Hailstorms occur due to the mountainous terrain which creates the ideal conditions for the formulation of hail. The area also receives water from the snow that falls in the mountains. If the winter snowfall is insignificant, the Municipality is severely affected by drought in the summer as there are insufficient water storage facilities for towns. This results in the District Municipality having to cart drinking water to communities.

Wind speed is difficult to determine as the area has tended to fall outside traditional measuring areas. A study done in 2017 determined that annual wind speeds are decreasing throughout the country and in the Municipality. Mean wind speeds are increasing in winter and autumn and decreasing in summer and spring. In the study, the area with the highest mean inter annual variance is Komani which has a similar climate to some parts of the Municipality. (SAJS, 2017:4-6). Wind speed changes rapidly in the mountainous areas with eddies and swirling winds occurring against slope faces. This makes it difficult to control veld fires.

#### 1.4. Water sources

The Municipality falls in the Orange River catchment area. It has 3 major rivers viz, the Orange River, Kraai River and Bell River. The Map below indicates the major rivers from the SDF ,2022.

Senqu's main towns are served from dams such as the Barkly East dam and Lady Grey dam. Lady Grey is also served from 14 boreholes. Sterkspruit is served by Jozana dam. Rhodes and Rossouw draw water from boreholes. The communal areas are serviced with water from perennial rivers such as the Orange and Kraai. Villages and farms also make use of springs. The threat of drought is constant as there is no water source or dam that is large enough to meet the growing demand for treated potable water. Loadshedding exacerbates the problem as pumps can't function to ensure that water reaches the higher lying areas.

# 2. Environmental Opportunities

Senqu Municipality has some of the most beautiful scenery in South Africa. It has most of the highest mountain passes in the country. This attracts self-drives, by 4 x 4 enthusiasts.

The rugged terrain is utilised for adventure and agricultural tourism such as the K-Way Skyrun in November. Other sports are trail running, extreme motorbike events, hiking, cycling and horse riding. The numerous sandstone outcrops can be utilised for building bricks or paving. There is a lot of fine river

sand for building purposes, but its usage must be monitored as much illegal sand mining is occurring without permits. Reed grass can be used for thatching and wild rose briars for making rose hip tea.

The high amount of wind and solar energy can be utilised for greener energy alternatives such as wind and solar energy (JGDM Environmental Management Plan,2011). However, these alternatives require further study and mapping. Currently the ESKOM Grid in the area is underutilised due to lack of large-scale factory production in the area and therefore it does not make economic sense for ESKOM to purchase spare electricity. However, the changes which allow for Municipalities to purchase electricity from independent producers, means that the feasibility for green energy production is improving.

The area contains many bird species and a vulture restaurant near Lady Grey. There are many species of unique alpine plants such as one species of red-hot poker which does not grow anywhere else.

Many paleontological species are being discovered in the area with many dinosaur skeletons especially around Qhimerha as well as rock art. Qhimerha's potential is being studied as a heritage site. DEDEA are assisting the Municipality to try and have the area declared as a natural heritage site. ECHRA are in the process of funding a feasibility study in the area. JGDM has also set aside funding for a container to house some museum specimens. Dinosaur remains have also been found near Lady Grey and Barkly East.

The area has many springs which can be utilised for bottled water. Some bottled water is occurring around Barkly East. Some dams have been stocked with trout which attracts fly fishermen. Rivers were stocked in the past with trout, which allows for the holding of trout fishing competitions and for recreational fishing.

Hunting packages exist for mountain rhebok and blesbuck as well as francolin and partridge. Some tourism enterprises offer other hunting packages.

# 3. Environmental Challenges

- Alien vegetation. The Municipality struggles with crack willow along its river courses which sucks up litres of water. The District Municipality runs programmes like working with water to eradicate it in the Longkloof.
- Firewood collection. Persons collect firewood and indiscriminately break down trees. The indiscriminate burning of grasslands creates air pollution and loss of biodiversity.
- The location of dipping tanks. Many dipping tanks are located near streams which can poison water supplies.
- Borrow pits which are not adequately rehabilitated and mined without the necessary permits.
- Incorrect placing of drainage culverts which can add to gulley erosion.
- The proximity of wastewater treatment works at both Lady Grey and Barkly East to rivers, poses a risk as they could be susceptible to potential flood damage.
- Soil erosion, due to marginal soils being utilised for inappropriate agricultural practices.

- The registration and management of solid waste disposal sites and limited recycling facilities and programmes. This situation is changing with the building of new solid waste sites (SWS) in most urban areas.
- Illegal dumping of waste.
- Limited human and financial capacity to implement environmental by-laws and act on environmental issues. This is changing due to the training of officials as peace officers but it will be a while before the impact of this intervention is realised.
- Limited capacity of both human and financial resources to undertake and develop climate change and air quality management plans and strategies. Financial and Human Resource Assistance is requested from DEDEA to assist the Community Services Directorate to educate the Municipality's administrative and political leadership about the importance of planning for climate change and environmental protection and developing a more sustainable and ecologically sensitive service delivery approach.
- Increased sedimentation and entrophication and pollution of water sources.
- Increased invasion by alien and undesirable species like Slangbos and blue bush near Lady Grey.
- Limited protection of environmental sensitive areas, especially vleis, wetlands and springs.
- Poor and crumbing sanitation and water infrastructure (JGDM Environmental Management Plan 2011).
- Flash flooding results in rapid runoff and accelerated donga erosion.
- Limited implementation of environmental education programmes on waste reduction, recycling, water source protection and reduction of water usage.

# 4. Protection of Natural Assets and IEP Programmes

Whilst the Municipality is blessed with some of the most beautiful alpine scenery, which is one of the prime attraction factors for its tourism industry, very little is done to protect the environment. It lies in the hands of individual landowners to conserve this fragile environment. ECPTA have started a biodiversity and stewardship programme to address this issue. Many farmers in the New England area have signed up for the programme.

South African National Parks (SANParks), in partnership with World Wide-Fund for Nature South Africa (WWF-SA) and a range of national, provincial and local government (including the Joe Gqabi District Municipality and Senqu and Elundini Local Municipalities) and non-government partners, is undertaking the establishment of a new national park in the Grassland Biome, in the Eastern Cape Province through its declaration in terms of the National Environmental Management: Protected Areas Act, No. 57 of 2003. The model that is being considered for the establishment of the national park is novel, in that it is based on a combination of land purchase, the declaration of state land, the declaration of state-owned communal land and the declaration of private land. A priority footprint for the establishment of the national park has been spatially

determined, in Senqu and Elundini Local Municipalities, based on the importance of biodiversity in the region and the presence of a nationally important strategic water source area. This footprint is intended to guide efforts to establish the national park but is not considered definitive, as it will not include the entire area and may include areas outside of it that have valuable biodiversity and other ecological values. The overall project objective is to establish an ecologically, economically and socially sustainable consolidated national park within the region through an innovative combination of conservation inclusion mechanisms and development options. The partners to the establishment of this new national park agree that it is likely to:

- Significantly improve the protection of the Grassland Biome in an area that has been identified as a national conservation priority in the recent National Biodiversity Assessment (2018) as well as the National Protected Area Expansion Strategy (2016).
- Protect ecological infrastructure of national significance for water security in the Eastern Cape Drakensberg Strategic Water Source Area (SWSA).
- Promote investment through the Expanded Public Works Programme in the restoration and maintenance of this SWSA to enhance water security and the flow of associated ecosystem services, while simultaneously providing job opportunities.
- Attract investment into the area, with substantial income enhancement potential and increase livelihood security, through increasing income opportunities, income levels, employment diversity, and attracting all-year-round tourists to this region of the Eastern Cape.
- Increase local GDP through greater returns per hectare for farms, increased revenue for current service suppliers and new hospitality service providers.
- Promote the establishment of a regional destination for adventure and cultural tourism.

It is anticipated that much of the land to be included in the national park will be privately owned and state-owned land that is being administered by traditional authorities. Furthermore, the envisaged national park is likely to largely remain a working agricultural landscape. As such, SANParks and its partners will not have direct management responsibility for most of the land included in the national park but will play an extension and support role, providing technical assistance to landowners that have included their land in the national park The Municipality has a huge quantity of sandstone which is being mined and cut into bricks for building. A large quantity of sand is constantly mined for the making of bricks. The Municipality does not fund any projects which utilises these assets without a mining permit.

The District Municipality is running projects in the area to fence off and conserve springs. In general, environmental protection of assets is stressed in the SDF and the Municipality adheres to this in the planning of new developments. The protection of environmental assets is poor due to lack of human and financial resources. Large scale education of the public is required as well as strong political will.

The Municipality is busy addressing the issue of poor management of its waste sites and is in the process of building new sites and closing non-compliant waste management sites.

The Municipality is struggling with the impact of climate change which has resulted in increased severity of events such as increased rainfall in a short amount of time which leads to mass flooding. It is looking to mitigate against climate change as well as adapting its infrastructure provision to cater for these changes. The Municipality is looking at developing partnerships to ensure that it responds adequately to the challenges identified.

To do this, it is adopting an EBA (Ecosystems Based Approach) to climate change. This approach will involve intensive training of the political and administrative arms of the Municipality to ensure buy in as well as that of Traditional Leaders and communities. This will ensure that indigenous knowledge is applied in the design of projects as well as ensuring that projects remain sustainable. Focus will be on training, projects to decrease erosion such as stock and veld management as well as soil rehabilitation projects and lastly on how to improve household food security by the planting of water wise gardens and orchards. Further focus will be on improving water sustainability by utilising water wisely and increasing the capacity of water harvesting. This is an inative from the UN and implemented by Rhodes University and the Department of Environmental Affairs.

The advantage of utilising this approach as well as other environmental planning tools, is that environmental plans such as a State of Environmental Report and Environmental Management Plans will be developed, following the review and adoption of the draft JGDM district plans. The Municipality is also in the process of developing an Environmental Management Framework (EMP). This should be adopted in the 2024/2025 Financial year. From the framework, a climate change strategy can be developed and an air quality management plan. The Municipality has been in negotiation with JGDM, that these plans can be a district iniative so that all the LM's plans are aligned and a coordinated joint district climate response can be developed.

An agricultural plan will be developed in 2024/2025 FY that will identify areas of agricultural potential and degradation. This will enable the Municipality to develop strategies with sector departments to address and halt further environmental degradation.

# 5. The Impact of Climate Change

In 1990 South Africa was responsible for about 1.2 % of the total warming effect which placed it within the top ten contributing countries in the world. The carbon dioxide equivalent emission rate per person in South Africa is about 10 T of Carbon dioxide and above the global average of 7 T per person per year. A recent study by the Countries Studies Project predicts that climate change will cause mean temperature increases in the range of between 1 to 3degrees centigrade by the mid-21<sup>st</sup> century with the highest increases in the most arid parts of the country.

A broad reduction of between 5 to 10 % decrease has been predicted for summer rainfall regions like Senqu. This is likely to be accompanied by an increased incidence of drought and floods with prolonged dry spells followed by intense storms. A marginal increase in early winter rainfall is predicted for the winter rainfall region. A rise in sea level is also predicted of about 0.9 m by 2100 (DEAT website 2000-2005).

Whilst there might be some debate on the effect of climate change, it is clear that the health sector, maize production, plant and animal biodiversity, water resources and rangelands are areas most vulnerable to climatechange.

The main effects for Senqu would be:

**An increase in temperature**. There will be a steady increase in temperature for both summer and winter months. Crops which start their growth cycle in the spring months will require a lot more water.

An annual increase of 1 degree centigrade will have a positive impact on annual crop net revenues for all farms except dryland (most farms in Senqu). The increase in temperature will affect crop farm net revenues negatively in the summer farming season but positively in the winter season (CEEPA, 2006 Climate change and African agriculture). An increase in temperature will have a greater impact on communal farmers as a recent study done by CEEPA indicates that farmers with larger areas of ground will be better able to withstand the effects of climate change (CEEPA, 2006 Climate change and African agriculture). The increase in temperature will result in a decrease in snowfalls in the area. This is an important source of precipitation in the winter months.

A change in precipitation. Water scarcity may increase in some areas. It is estimated that even without climate change, South Africa will use up most of its surface water resources within the next few decades. Climate change may also alter the magnitude, timing and distribution of storms that produce flood events. The Eastern Cape Climate Change Response strategy of 2011 shows that there will be a decrease in precipitation in the areas bordering Walter Sisulu Municipality but an increase in precipitation towards the east of the Municipality. Rainfall will also come later in the year. The impact of this on Senqu Municipality will be great. A fall in precipitation of between 2 to 8 % by 2050 and 4 to 8 % by 2100 will affect dryland farms as well as small scale farmers, as it is estimated that crop net revenues will fall by 1.7 % to 5.3 % per hectare for the whole of South Africa. The decrease in precipitation in the areas bordering the Walter Sisulu and Elundini Municipalities will find that their traditional farming practices will no longer be viable. An increase in precipitation will mean that there will be a greater impact on the environment. As has been previously mentioned, the soils in the area are highly erodible and an increase in precipitation and the strength of precipitation events means that there will be an increase in dongas caused by runoff. This decreases the amount of land available for grazing and settlement.

An increase in the strength of rainfall events will result in flash floods and storm water runoff that cause destruction to property, the environment and death of livestock and people. An increase in precipitation results in a decreased lifespan of roads and bridges as well as increased maintenance costs. Stormwater channels and bridges will need to be cleaned more regularly. Roads will experience greater runoff which results in the washing away of graveled road surfaces.

There will also be an increase in the amount of rock falls due to the instability of the ground due to wet soil. This can result in road closures, destruction of houses and properties and even death.

A decrease in wind speed. A decrease in wind speed means that there will be a change in temperature and precipitation patters. Wind is important in precipitation, as it mixes temperature and creates conditions for the formation of thunderstorms and hail.

# 6. Regulation of Air Quality Emissions

The regulation of the emissions is detailed in the air quality bylaw. Regulation and enforcement of the bylaw is by a declared Peace Officer or a Traffic Officer.

# CHAPTER TWO: DEMOGRAPHIC ANALYSIS

# 1. Demographic / Population Analysis

## 1.1. Socio – economic indicators

### Population Dynamics

Senqu Municipality had a population of 134,150 which grew to 140,720 (StatsSa, 2016) and 147 703 in 2022 (StatsSA, 2022). This makes it the most populous municipality in the Joe Gqabi district followed by Elundini (StatsSA,2022). It has an annual growth rate of 0.84 % which is below the districts at 1.03%. Provincially, for the period 2011–2016 it is estimated that approximately 243,118 people will migrate from the Eastern Cape (StatsSA 2016).

Household numbers are increasing from 33,904 (2001) to 38,046 (2011) with a slight drop to 35,597 in 2016 (StatsSa,2016). In 2022, it has an estimated 48,914 households with an average size of 3 per household (StatsSA,2022). Smaller household size is due to urbanisation and participation in a world economy which means that the cost of large families and households are prohibitive.

The dominant home language is isiXhosa, isiHlubi, seSotho, Afrikaans and English. A larger part of isiHlubi speakers can be found around the Sterkspruit area. In terms of race, the Black African population are in themajority. Over 90 % of the population are Black African followed by Whites, who are just slightly higher than the coloured population. This has not changed over time and is a dominant trend. The Municipality must ensure that most of its communication to the public is in the relevant African languages apart from English and Afrikaans.

#### 1.2. Rural vs. Urban Population

According to the 2001 Census, 83.5% of households are rural in nature (StatsSa,2001). Whilst it is difficult to determine this figure with any accuracy from the 2011 census, indications are that it is at least around 70 %. This dynamic is shifting with the phenomenon of urban in migration occurring in Senqu Local Municipality. The majority of which is situated around the town of Sterkspruit (SDF, 2017). This simply means that people are moving to live in villages which are expanding towards the urban centre of Sterkspruit. The concept of a rural countryside with scattered homesteads is disappearing, to be replaced by many villages growing towards each other creating rural urbanisation.

There is also an out migration of people, both out of the rural areas to the urban areas and from JGDM to other districts. Between the period 2011-2016, the number of people living on commercial farms declined from 1,772 households to 1,157 households (StatsSa, 2011).

An inward migration from Lesotho to Tlokoeng (Mt Fletcher) and Sterkspruit is also being experienced. (Joe Gqabi, WSDP 2010).

SENQU LM	Population size (No	Percentage of Tot Pop	Combined Urban &	
	of people)	reicentage of for rop	Rural Population (%)	
Sterkspruit (Main urban area – including surrounding settlements within the urban edge (Sterkspruit LSDF 2017	11 399	8.5		
Lady Grey (Including Transwilger & Khwezi naledi)	7023	5.24	23.54 (Urban)	
Barkly East (Including Nkululeko & Fairview	9986	7.44		
Rhodes including Zakhele	696	0,52		
Rossouw	284	0.21		
Hershel	2 189	1.63		
Rural villages 179 (OTP 2015)	96 370	71.84		
Privately owned commercial farms No: 1429	6 203	4.62	76.46 (Rural)	
TOTAL	134 150	100		

#### Table 1: Population distribution

Source: HSP 2020

### Human Settlements

Senqu is a predominantly rural area, characterised by small settlements, limited urbanisation and subsistence agriculture. The majority (85.74%, 2001 Census) of households are rural in nature, including rural villages and farm households and the overwhelming majority (93.27%) of the local population live in the Sterkspruit sub- region. This dynamic is shifting with urban in-migration where "people are moving to live in villages which are expanding towards the urban centre of Sterkspruit. The concept of a rural countryside with scattered homesteads is disappearing." (Senqu IDP 2011).

### 1.3. Gender and Age

#### Table 2: Population by gender 2022

	Male %	Female %	Total
Senqu	45.5	53.5	147 703

Source: StatsSA, 2022

The male/female split in population is 86.8 males per 100 females in 2022 (StatsSA,2022). The Municipality has more females than males due to the high out migration of males looking for work due to historical factors.

The population pyramid shows the population of Senqu follows the population trends of South Africa except from age 40 onwards, the older population is much less in size. However at age 60 the population trends indicate Senqu's population is living longer than that of the country.

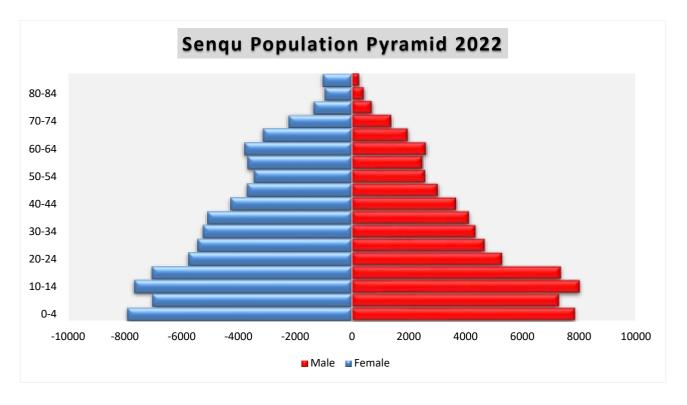

Chart 1. Population Pyramid 2022 – StatsSA, 2022

The population pyramid above indicates that Senqu Municipality does have a young population. The anticipated growth in unemployment for the youth aged 15 to 35, is clearly indicated above as the economy has not grown to compensate for the new people entering the job market.

The fertility rate has decreased and the life expectancy rate has increased. The increase in population at age 0 -4 means that in the next 10 years the population will remain youthful and that the Municipality must increase its efforts to ensure that the new demand for infrastructure and employment is met.

# 1.4. Population by population group, gender, age and households

In 2022, the Senqu Local Municipality comprised of 427 000 households. This equates to an average annual growth rate of 1.18% in the number of households from 2010 to 2022. With an average annual growth rate of 0.84% in the total population, the average household size in the Senqu Local Municipality is decreasing (S&P Global, 2023:7). The composition of the households by population group shows that Africans are the largest group (97.55%), followed by whites (0.93%) and then Coloureds and Asians (S&P Global, 2023:7).

Age	Afric	can	W	/hite	Coloured		
	Female	Male	Female	Male	Female	Male	
00-04	7,270	7,960	25	22	100	99

Table 3. Population by population group, gender and age, 2022

Source: SA Regional eXplorer version,2023

The number of female headed households is quite high and can be ascribed to migrant and commuter labour which has resulted in many households having a woman as the head of the household and the chief breadwinner living away from the home. These impact on the type of development that may occur, especially with regards to manual labour-type employment (SDF,2011). The good news is that female headed households have dropped from 52.2 % (2001) to 50.5 % as can be seen in the table below (StatsSa, 2011). It should be noted that the number of child headed households has also dropped. However, this statistic should be treated with caution as these households tend to shy away from officialdom.

#### Table 4: Female headed households

Municipality	1996		2001		2011		% of female headed h/holds

### 1.5. HIV and AIDS Estimates

In 2022, 19 700 people in the Senqu Local Municipality were infected with HIV. This reflects an increase at an average annual rate of 1,95% since 2012, and in 2022 represented 13,17% of the local municipality's total population. The Joe Gqabi District Municipality had an average annual growth rate of 2,08% from 2012 to 2022 in the number of people infected with HIV, which is higher than that of the Senqu Local Municipality. The number of infections in the Eastern Cape Province increased from 746,000 in 2012 to 899,000 in 2022. South Africa has had an increase in the number of people that are infected from 2012 to 2022 with an average annual growth rate of 2,27%. In 2022, 19,700 people in the Senqu Local Municipality were infected with HIV, who made up 13,17% of the JGDM HIV and Aids infected population. This was a decrease from 20,500 people in 2020 (IHS, 2020:13). This increase in HIV and Aids infections is a worrying trend.

1.6. Population Density and population growth rate

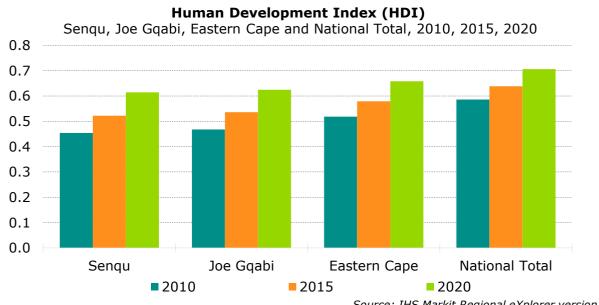

In 2020, with an average of 20.1 people per square kilometre, Sengu Local Municipality had a higher population density than Joe Gqabi of (15.3 people per square kilometre). Compared to Eastern Cape Province (43.6 per square kilometre) there are less people living per square kilometre in Sengu Local Municipality than in Eastern Cape Province (IHS,2020:13).

Between 2012 and 2022, the population growth averaged 0.84% per annum, which is more than half of the growth rate of South Africa at 1.47%. Compared to Joe Ggabi's average annual growth rate, 1.03.% the growth rate in Sengu's population at 0.84% was slightly lower than that of the district municipality (S&P global, 2023:14). The population is projected to grow annually at 0.9% from 150,000 in 2022, to 157,000 in 2027 (S&P global, 2023:15).

# 2. Development Indicators

#### 2.1. Human Development Index (HDI)

In 2020 Sengu Local Municipality had an HDI of 0.614 compared to the Joe Ggabi with a HDI of 0.625 and 0.658 of Eastern Cape. South Africa's HDI increased at an average annual growth rate of 1.88% and this increase is lower than that of Sengu Local Municipality (3.08%) (IHS Markit, 2020). This indicates that improvements are being made.

#### Chart 2: HDI

Source: IHS Markit Regional eXplorer version 2142

# 2.2. Gini Coefficient

The Gini coefficient indicates income inequality. It varies from 0 to 1. The closer it is to 0, the less income equality there is. In 2020, the Gini coefficient in Senqu Local Municipality was at 0.579, which is an increase from 2010 (IHS, 2020). This means that there is an increase in income inequality which is a worrying development.

# 2.3. Poverty Gap

The poverty gap rate in Senqu Local Municipality amounted to 32.1% in 2020. In 2020, the poverty gap rate was 32.1% which increased from 2010 poverty gap rate of 31.8% (IHS Markit 2020).

# 2.4. Education, Literacy and Skills Level

The level of education and skills levels in Senqu Municipality is low but improving. Only 10,7 % of the population has no schooling at all. It is worrying though that only 6.2% of the population has a tertiary education which in ten years, has only grown by 1 % (StatsSA,2022). This lack of skilled workers is an impediment to economic growth as to participate in the world economy, high literacy and skills rates are required. The type of skills available in the Municipality are not linked to the type of skills required in the future economy of the world. The Municipality needs to develop partnerships which will increase the exposure of learners to computer and computer technology. The Department of Higher Education needs to relook at the courses offered at its FETs in the area.

There is only one tertiary education facility (FET College) in the Municipality in Sterkspruit which is insufficient for the requirements of the area. The number of schools has decreased to101 in total.

The high dropout rate of learners between Grade 1 and 12 is worrying. Latest matric results revealed that a high percentage of learners never reach Grade 12. Overall, the matric pass rate has increased in the Eastern Cape for 2023 to 81.4% (News24,19 Jan,2024).

The Municipality struggles with early childcare facilities as most of the facilities are overcrowded and do not meet legislative requirements in terms of municipal health regulations structures to norms and standards of EH Policies and the Children's Act (infrastructure and programmes implemented). This threatens funding allocation to ECDs of the District. In addition, inaccessibility of services to vulnerable children at 0-5 years due to limited budget allocation as some wards do not have Early Childhood Development Centres. Some ECD's also do not adhere to funding conditions required from them as an NPO. Hopefully now that ECDC's are being taken over by the Department of Education, issues may be resolved. There are 101 ECDS of which 56 have been funded by the Department of Social Development. The unfunded ECDC are not registered

## 2.5.Crime

Crime is high in the municipality especially with stock theft. Cross border stock theft is a big problem as is violent crime and assaults on women. For the period 2010/2011 to 2020/2021 overall crime has increase at an average annual rate of 1.10% within the Senqu Local Municipality. Violent crime increased by 0.80% since 2010/2011, while property crimes increased by 3.65% between the 2010/2011 and 2020/2021 financial years (IHS Markit, 2020). This statistic does not show the true rates as many rural people live far from police stations and do not always report crime.

Substance abuse is becoming a huge issue in all towns with a linkage to increased house breakins. The Municipality has hosted outreaches with SAPS on substance abuse, gender based violence and LGBTQ + violence. Internally staff do have access to programmes to reduce substance abuse. The Mayor has also hosted meetings with LGBTQ+ activists and done an information campaign with them. However more needs to be done and programmes developed and implemented with sector departments.

Deforestation is becoming an increasing petty crime and the Municipality is in the process of developing fines and programmes to combat the cutting down of trees for firewood.

# 2.6.Unemployment rate

The unemployment rate includes all persons between 15 and 65 who are currently not working, but who are actively looking for work. In 2020, there were a total number of 17,300 people unemployed in Senqu, which is an increase of 9,880 from 7,460 in 2010. The total number of unemployed people within Senqu constitutes 36.44% of the total number of unemployed people in Joe Gqabi District Municipality. This makes an unemployment rate in Senqu Local Municipality of 40.57%. The unemployment rate in Senqu Local Municipality is higher than that of Joe Gqabi and South Africa at 29,93% but lower than that of the Eastern Cape at 41,36% (IHS Markit, 2020). Unfortunately, census indicates that the unemployment rate for 2024 is 32,79 % nationally (statista.com).

The table below indicates that Senqu has experienced an average annual increase of 8.81% in unemployed people, which is better than that of JGDM which had an average annual increase in unemployment of 8.84% (IHS Markit,2020). The working age population in Senqu in 2020 was 91,300, increasing at an annual rate of 1.02% since 2010 (IHS Markit 2020). 46.8% are participating in the labour force, meaning 42,700 residents of the local municipality form part of the EAP. The Non-economically active population (NEAP) equal 48 500 people.

	Senqu	Joe Gqabi	Eastern Cape	National Total
2010	25.5%	24.9%	27.9%	24.9%
2011	25.4%	24.7%	28.2%	25.1%
2012	25.7%	25.2%	28.9%	25.1%
2013	26.0%	25.7%	29.6%	25.2%
2014	25.5%	25.2%	29.4%	25.2%
2015	24.9%	24.7%	29.2%	25.5%
2016	26.5%	26.3%	30.5%	26.4%
2017	29.6%	29.4%	33.0%	27.2%
2018	32.0%	31.7%	34.9%	27.4%
2019	35.4%	35.2%	37.8%	28.4%
2020	40.6%	40.4%	41.4%	29.9%

#### Table 7: Unemployment rate 2010-2020

Source: IHS Markit Regional eXplorer version 2142

Youth unemployment remains a crucial issue on a national and provincial level. Youth unemployment in the Eastern Cape continues to rise, reaching 47.3% in 2018Q3. Unemployment rate though, has risen to 35.6 % (Eastern Cape Labour Market Overview Q3). Female youth are the most affected as are females in general and black people in particular (Ecsecc Youth and the labour market 2014-2019 and beyond, 2020).

### 2.7 Income and expenditure

In 2020, 22.50% of all the households in the Senqu Local Municipality, were living on R 30,000 or less per annum. The R 30,000-42 000 income category has the highest number of households with a total number of 6 720, followed by the R18,000-30,000 income category with 6 270 households. Only 4.4 households fall within the 0-2400 income category (IHS Markit, 2020).

From 2010 to 2020 the number of households earning more than R30,000 per annum has increased from 56.74% to 77.50% whilst households with income equal to or lower than R6,000 per year has decreased (IHS Markit, 2020).

Total Personal Income grew annually by 7,66% from 2010 to 2020, which is more than JGDM (7.48%), Eastern Cape Province's (6.99%) and South Africa (6,65%) average annual growth rates (IHS Markit, 2020). The African population group earned R 4.2 billion, or 90.51% of total personal income, while the White population group earned R 306 million, or 6.60% of the total personal income. The Coloured and the Asian population groups only had a share of 1.77% and 1.12% of total personal income respectively (IHS Markit, 2020).

Within JGDM, Senqu has the second annual total personal income for the regions (IHS Markit, 2020). Per capita income in Senqu Local Municipality is R 31,500 and lower than both the Eastern Cape (R 41,000) and of the Joe Gqabi District Municipality (R 34,400) per capita

income. The per capita income for Senqu Local Municipality is lower than that of the South Africa at R 58,700 (IHS Markit, 2020).

	African	White	Coloured
Senqu	29,200	215,000	47,500
Elundini	25,000	N/A	48,400
Walter Sisulu	37,800	241,000	47,600

Table 8: Per Capita Income by population group, 2020 (R current Prices)

Source: IHS Markit Regional eXplorer version 2142

# **3.Migration Plan**

Senqu Municipality has no migration plan in place as funding still must be sourced for this. It will be done within the 2024-2025 financial year as planners have undergone training by the Population Unit of Social Development.

This does have to be addressed as the Municipality borders on the Kingdom of Lesotho and has many illegal aliens who reside within the municipal area. The Municipality is looking at partnerships with government departments on how to address this issue as it is both a problem in that resources are drained, and no taxes paid but also an opportunity in terms of trade and skills being imported into the region.

Another in-migration which is occurring is that of Bangladeshi and Chinese nationals who run and operate many of the small shops in rural areas. This does create problems when they rent or run shops out of RDP houses. The money generated by them does not return to the economy, as in general they either buy in bulk from Lesotho or in Bloemfontein. The Departments of Trade and Industry, Home Affairs and SARS need to assist the municipality in ensuring that the region benefits from these economic activities. It needs to be noted that these shop keepers are a boon to local communities as they provide a service which the community would otherwise be forced to travel long distances to access.

In the past year, 120 foreign nationals were arrested and 73 deported with 13 employers charged in 2 raids by the Immigration Services.

# **4.Population Concerns**

The Municipality has a very high youthful population which indicates a high need for employment. Unfortunately, research by Ecsecc has revealed the high unemployment amongst youth due to structural issues in the economy. This does require addressing. There is also a greater need for secondary and tertiary education in the region. However, the only tertiary opportunities are offered outside the region. The traditional employment opportunities in agriculture and the commercial sector for low skilled workers do not appeal to the better educated and more global orientated youth of today. This is why the Municipality in its LED strategy is aiming to develop entrepreneurs in various service sectors to cater for this gap. However greater assistance is required from the Department of Education and Higher Education to provide the necessary skills and institutions to build the entrepreneurial mind set.

The other population concern is that of the influx of Lesotho citizens. The border is porous and there has always been traditional movement between the two countries unhindered by border posts. As a result, there is a greater demand for educational, health and housing. Thus, all these departments come under pressure to provide services for persons who have been born in South Africa and lived here but without any documentation. In a sense, these people are not foreigners but are in fact South Africans. Their illegal status causes many social problems for them and their families and the Department of Social Development is often faced with abandoned children without papers.

# **5.Incorporation of Population Issues into Planning**

Issue	Status Quo	Proposed Sector intervention
Gender and age	Youth constitute more than 51% of the total population. 55% of population are females	Youth development to be strengthened. The LED Strategy has a youth development initiative especially regarding SMME's and as part of its specific goals
HIV and AIDS	High levels of prevalence	Strengthen and implement the HIV and AID Strategy Strengthen the HIV and Aids Forum Improve youth education in schools
Migration	Higher out-migration rate which is above provinci Rate	The LED strategy is focussed on SMME development The UDF is focussed on developing Sterkspru Small town regeneration programmes are being developed for Barkly East and Lady Gre Ikhala College has just opened their engineerir school
Overall population	Stable population growth throughout the District	Increase in housing is reflected in the HSP for each area Plans to formalise villages so that people can access services.

#### Table 9: Population issues and efforts to mitigate.

#### Table 1 0 : Sustainable Development Goals

Sustainable Development Goal	Strategic focus areas	Key programmes
Goal 1: No Poverty	No Poverty - End poverty in all its forms Everywhere	Poorest ward programme in Ward 5
Goal 2: Zero Hunger	Increase agricultural production Increase investment in agriculture	Assisting DRDAR with the implementation of wool improvement programme
Goal 3: Good Health and Well- being	Enforcement of traffic bylaws to prevent deaths	Employee wellness programmes Increase traffic police

Sustainable Development Goal	Strategic focus areas	Key programmes
Goal 4: Quality Education	Promotion of access to all bursaries by communities Skills programmes Internships	Municipal Bursaries Training Internships
Goal 5: Gender Equality	Employment Equity Plan	Recruitment according to EEP
Goal 6: Clean Water and Sanitation	DM function	
Goal 7: Affordable and Clean Energy	Utilising solar power in mountainous areas	Solar geyser and electricity programme
Goal 8: Decent Work and Economic Growth	Functioning Local Labour forun Training for LLF	EPWP CWP
Goal 9: Industry, Innovation an Infrastructure	Build infrastructure to promote investment	Regular sittings of the LED Forum
Goal 10: Reduced Inequalities	Increase community skills to enable better workopportunities	Utilise social investment programmes of the private sector
Goal 11: Sustainable Cities and Communities		Enforcement of town Planning legislation
Goal 12: Responsible Consumption and Production	Waste awareness campaigns to make people aware of responsible consumption	Waste recycling programmes and development of the Environmental management framework
Goal 13: Climate Action	Climate change strategy	Training on climate change reduction strategies Partnerships to implement climate change
Goal 14: Life Below Water	No marine resources in the Area	
Goal 15: Life on Land	Donga filling	Training on stock management reduction Donga filling programmes through DRDAR Ecosystems based approach Agricultural plan
Goal 16: Peace, Justice and Strong Institutions	Participate in IGR forums arour safety	Regular sitting of Integrated Community Safety forum
Goal 17: Partnerships for the Goals	Improve IGR relationships	Develop partnerships & MOU's

# 6. Conclusion

The implications of the population studies of Senqu indicate a youthful population with low skills levels and high unemployment. Most of the population live in rural villages and rely on social grants. There is high migration to the more urban areas inside and outside the municipality for employment and educational opportunities. The high out migration to areas outside the municipality has an annual season with persons returning for Easter and Christmas holidays. Persons also tend to return to the traditional areas when they are faced with illnesses that require high caring from relatives.

# CHAPTER THREE: SOCIO-ECONOMIC ANALYSIS

# **1.Economic Overview**

The major world economies experienced an economic depression in 2007, from which they were slowly starting to emerge. However, the Covid 19 pandemic created a situation where all economic forecast had to be revived. National Treasury stated that the "global shock prompted by the COVID-19 pandemic... led to a sharp contraction in the domestic economy. South Africa's economic growth was forecast to fall by 7.2 per cent in 2020 as a result of the crisis, the March and April 2020 credit rating downgrades, and the compounding effects of weak investor confidence purse (National Treasury, The Covid 19 shock and the revised economic outlook, 2020:27)". The rand has depreciated rapidly against the US dollar and is still falling. The Russian invasion of Ukraine has exacerbated the situation with oil and food prices raising.

The situation in the Eastern Cape is that it experienced a real GDP growth of just over 1 % from 2014 to 2018. This mainly comes from the manufacturing sector which is "primarily centered on the automotive industry in the two metros and dominated by the non-tradable sectors (trade, finance, and general government services) (SERO,2017: XV11-XV111)".

Weak economic growth has continued to decline and continues to see revenue projections lowered, (Investec 2020). GDP grew 0.1% quarter-on-quarter in period through December with the economy that expanded 0.6 % in 2023 from 1.9 % in 2022. High interest rates and load shedding are seen as contributing factors. What this means is that in essence that the economy managed " to escape a technical recession but growth will remain subdued (Hlakudi et al, 5 March 2024)". As a result South Africa's investment status has been downgraded from positive back to stable

In March 2023, S&P downgraded South Africa's status from positive back to stable (<u>www.trade.gov</u>, 30 Jan 2024) due to the impact of persistent electricity shortages and infrastructure constraints on economic growth.

The outlook for the Senqu economy is dire as it is heavily dependent on government services as the main economic sector and the government is under pressure to decrease its wage bill. Therefore, focus will have to be paid to diversifying the economy and attracting manufacturing investors.

# 2.Gross Domestic Product by Region (GDP-R)

In 2020, the Municipality achieved an annual growth rate of -5.91% which is a higher than the Eastern Cape Province's -6.71% and that of South Africa of -6.98%. The longer-term average growth rate for Senqu (1.03%) is slightly higher than that of South Africa (0.64%). The economic growth in Senqu peaked in 2011 at 4.69%. Senqu Local Municipality achieved an average annual growth rate of 1,03% from 2010 to 2020 which is a higher GDP growth than the

Eastern Cape Province's and South Africa (IHS Markit, 2020). The Municipality had a total GDP of R 4 billion and in terms of total contribution towards Joe Gqabi District Municipality ranked second (IHS Markit 2020). It had the highest average annual economic growth, averaging 1.03% between 2010 and 2020 in Joe Gqabi.

	Senqu	Joe Gqabi	Eastern Cape	National Total
2010	3.6%	2.7%	2.4%	3.0%
2011	4.7%	5.1%	3.7%	3.3%
2012	3.8%	2.9%	2.0%	2.2%
2013	2.1%	2.1%	1.4%	2.5%
2014	2.6%	2.3%	1.3%	1.8%
2015	1.6%	1.1%	0.8%	1.2%
2016	0.1%	-0.1%	0.7%	0.4%
2017	1.3%	0.9%	0.6%	1.4%
2018	0.2%	0.3%	0.6%	0.8%
2019	0.2%	-0.1%	0.0%	0.2%
2020	-5.9%	-6.3%	-6.7%	-7.0%
Average Annual growth 2010-2020	1.03%	<b>0.79</b> %	<b>0.41</b> %	<b>0.64</b> %

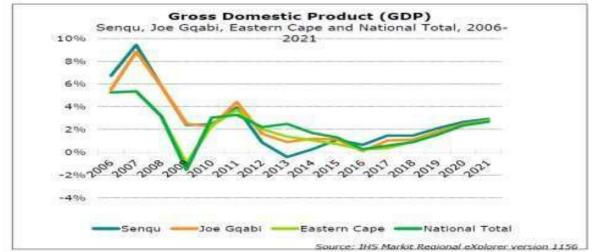

Table 11: GDP – Senqu. JGDM, EC & National 2010-2020 [Constant 2010 Prices]

Source: IHS Markit Regional eXplorer version 2142

# **3.Economic Growth Forecast**

It is expected that the local economy will grow at an average annual rate of 2.37% from 2020 to 2025, which is higher than that of JGDM and EC Province of 1.98% and 2.51% respectively. The SA Economy is forecasted to grow at an average annual growth rate of 2.69 (IHS Markit, 2020).

Chart 3: GDP 2006-2021 (Average Annual Growth Rate, Constant 2010 Prices)

By 2025, Senqu's forecasted GDP will be an estimated R 2.64 billion (constant 2010 prices) or 33.6% of the total GDP of Joe Gqabi District Municipality with a 2.37% average annual GDP

growth rate between 2020 and 2025. This will make it the best performing local economy in JGDM (IHS Markit, 2020). However, this may be optimistic in terms of the impact that the Covid epidemic has had.

# 4.Gross value added by region (GVA-R)

The Senqu Local Municipality's economy is made up of various industries. The GVA-R variable provides a sector breakdown, where each sector is measured in terms of its *value added* produced in the local economy. Gross Value Added (GVA) is a measure of output (total production) of a region in terms of the value that was created within that region.

	Senqu	Joe Gqabi	Eastern Cape	National Total	Senqu as % district municipality	Senqu as % province	Senqu as % national
Agriculture	0.2	0.5	6.3	119.6	29.9%	2.6%	0.14%
Mining	0.0	0.0	0.5	371.9	47.3%	1.5%	0.00%
Manufacturing	0.1	1.0	43.5	573.4	15.3%	0.3%	0.03%
Electricity	0.1	0.1	9.1	167.2	36.5%	0.6%	0.03%
Construction	0.2	0.4	10.9	140.2	41.7%	1.4%	0.11%
Trade	0.6	2.1	65.7	655.2	29.8%	0.9%	0.09%
Transport	0.2	0.8	27.0	396.4	30.9%	0.9%	0.06%
Finance	0.4	1.3	61.8	879.5	30.0%	0.6%	0.05%
Community services	1.9	4.8	111.1	1,125.3	38.5%	1.7%	0.17%
Total Industries	3.6	11.0	335.8	4,428.7	33.0%	1.1%	0.08%

Table 12: GVA by Broad economic sector – Senqu 2020 [R Billions, Current Prices]

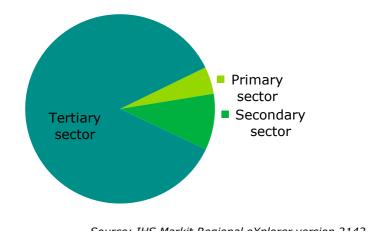

Source: IHS Markit Regional eXplorer version 1156 Ecsecc 2142

The sector which has performed the best at 1.9 billion is that of Community Services which reflects the makeup of the economy where Community Services, essentially government is the major employer and procurer. The next sector is that of trade and then finance. The lowest contributor is mining.

# 4.1. Historical Economic Growth

From 2010 to 2020, the finance sector had the highest average annual growth rate in Senqu at 2.18%. "The second highest average annual growth rate is the community services sector averaging at 1.25% per year. The construction sector had an average annual growth rate of - 1.13%, while the electricity sector had the lowest average annual growth of -2.69%. Overall, negative growth existed for all the industries in 2020 with an annual growth rate of -5.39% since 2019 (IHS Markit,2020).

#### Chart 5: GVA by aggregate Sector 2020

IHS Markit 2020

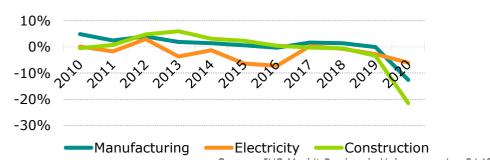

#### **Primary Sector**

The agriculture sector experienced the highest growth in 2017 with an average growth rate of 21.1%. Both the agriculture and mining sectors are generally characterised by volatility in growth over the period (IHS Markit, 2020). Interestingly, the mining sector is the one sector experiencing growth nationally.

#### Secondary Sector

The manufacturing sector experienced the highest growth in 2010 with a growth rate of 4.9% whilst the construction sector reached its highest growth in 2013 at 6.0%. The manufacturing sector experienced its lowest growth in 2020 of -12.6%, while construction sector also had the lowest growth rate in 2020 and it experiences a negative growth rate of -21.5% which is higher growth rate than that of the manufacturing sector. The electricity sector experienced the highest growth in 2012 at 3.0%, while it recorded the lowest growth of -7.2% in 2016 (IHS Markit, 2020).

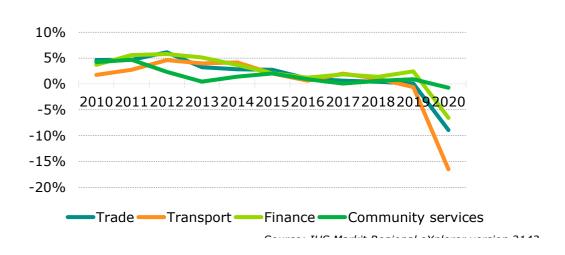

#### **Tertiary Sector**

The tertiary sector consists of four broad economic sectors namely the trade, transport, finance, and the community services sector. The Finance sector has declined in prominence and experienced the highest growth rate in 2012 when it grew by 5.8% which can be seen by the decline in the number of banks in the towns. The trade sector experienced the highest growth in 2012 with a growth rate of 6.1% but also the lowest growth rate in 2020 at -8.9%. The community services sector experienced its highest positive growth in 2011 with 4.7% and the lowest growth rate in 2020 with -0.7% (IHS Markit, 2020)

Chart 7: GVA by tertiary sector 2010-2020

#### Sector Growth Forecast

The transport sector is expected to grow fastest at an average of 3.63% annually from R 142 million in Senqu Local Municipality to R 170 million in 2025. The community services sector is estimated to be the largest sector within the Senqu Local Municipality in 2025, with a total share of 49.1% of the total GVA (as measured in current prices), growing at an average annual rate of 1.7%. The sector that is estimated to grow the slowest is the mining sector with an average annual growth rate of -0.38%. (IHS Markit, 2020).

Table 13: GVA Added by broad economic sector 201	16-2021 (R Millions, constant 2010 prices)
--	--

	2020	2021	2022	2023	2024	2025	Average Annual growth
Agriculture	76.4	79.7	76.4	76.3	77.7	79.5	<b>0.79</b> %
Mining	11.2	12.7	12.2	11.6	11.2	10.9	<b>-0.38</b> %
Manufacturing	80.7	85.2	87.4	89.6	90.5	92.1	<b>2.67</b> %
Electricity	14.2	14.6	15.0	15.4	15.8	16.2	<b>2.78</b> %
Construction	89.9	90.4	92.7	95.3	97.8	100.7	<b>2.30</b> %
Trade	389.7	418.9	433.0	447.5	454.1	463.6	3.53%
Transport	141.9	152.5	157.6	162.1	165.4	169.6	<b>3.63</b> %
Finance	270.8	277.3	286.7	294.4	301.8	310.8	<b>2.80</b> %
Community services	1,101.8	1,156.3	1,154.4	1,168.6	1,179.2	1,199.3	1.71%

	2020	2021	2022	2023	2024	2025	Average Annual growth
Total Industries	2,176.6	2,287.7	2,315.3	2,361.0	2,393.6	2,442.8	2.33%

Source: IHS Markit Regional eXplorer version 21

#### **5.Tress Index**

The Tress index shows where the area's economy is centered. In 2020, Senqu's Tress Index was estimated at 66.8 which are higher than the 62.2 of the district municipality and higher than the 62.2 of the province (IHS Markit, 2020). This implies that - on average - Senqu Local Municipality is less diversified in terms of its economic activity spread than the province's economy. What this means is that if the Community Services sector fails, the economy will collapse.

#### **6.Location Quotient**

"The location quotient measures comparative advantage of economic sectors. If the location quotient is larger than one for a specified sector within a region, then that region has a comparative advantage in that sector. (Ecsecc, 2017:35)".

For 2020 Senqu Local Municipality has a very large comparative advantage in the Community services sector. The agriculture sector has a very large comparative advantage which is why the NSDF 2050 defined Senqu as an agri-enterprises and small scale farming resource region where the focus should be on the development of a productive functional rural region with a diversified regional rural development slant (NSDF 2050). The construction has a comparative advantage when comparing it to the South Africa economy, although less prominent. Senqu Local Municipality has a comparative disadvantage when it comes to the mining and manufacturing sector as the Senqu Local Municipality area does not have a lot of mining activity, with an LQ of only 0.0242 (IHS Markit, 2020).

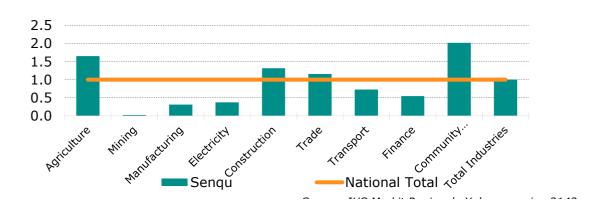

Chart 8: Location quotient Senqu vs National 2020 Source: IHS Markit Regional eXplorer version 21

# 7.Tourism

Tourism is one of the growth sectors of the economy. It can be defined in many ways. One of these is via trips. Visits to friends and relatives, relative to the other tourism, recorded the highest average annual growth rate from 2010 (78 300) to 2020 (18 000) at -13.69%. The type of tourism with the highest volume of tourists was also the Visits to friends and relatives' tourism with a total number of 18 000 annual tourist and had an average annual growth rate of -13.69%. The tourism type that recorded the lowest growth was Business tourism with an average annual growth rate of -18.47% from 2010 (5 580) to 2020 (724) (IHS Markit 2020). Senqu Municipality must concentrate on getting friends and family visitors to explore the area and increase their spend.

#### 7.1. Origin of Tourists and bed nights

International tourists constitute 18.62% of the total number of trips, with domestic tourism representing the balance of 81.38% (IHS Markit, 2020). However both international tourists and those from outside the Eastern Cape have decreased. This shows that Senqu Municipality tourism is not reliant on international visitors but rather South African tourists and especially the Eastern Cape which is why its marketing efforts should focus internally and on its provincial borders.

From 2010 to 2020, the number of bed nights by domestic tourists decreased at an annual rate of -14.85%, while international tourists had an annual decrease of -6.15%. The total number of bed nights spent by tourists decreased at an average annual growth rate of -12.27% from 554 000 in 2010 to 150 000 in 2020 (IHS Markit 2020). The emphasis should be on increasing the amount of bed nights by domestic tourists by promoting and developing more tourist activities in the area which encourage tourists to stay.

## 7.2. Tourism Spending and tourism spend as a share of the GDP

Senqu Local Municipality had a total tourism spending of R 46.6 million in 2020 with an average annual growth rate of -9.7% since 2010 (R 129 million) with JGDM having a total tourism spending of R 141 million in 2020 and an average annual growth rate of -9.4% over the period. Total spending in Eastern Cape Province decreased from R 12.7 billion in 2010 to R 5.75 billion in 2020 at an average annual rate of -7.6% (IHS Markit, 2020). The COVID epidemic has had an even greater impact on this decrease in expenditure, but it is slowly picking up.

Tourism spending as a percentage of GDP in 2020 was 1.16% in Senqu versus 1.15% in Joe Gqabi District Municipality and 1.52% in Eastern Cape Province.

	Senqu	Joe Gqabi	Eastern Cape	National Total
2010	6.2%	5.8%	6.0%	6.1%
2011	5.4%	5.1%	5.6%	5.8%
2012	5.0%	5.2%	6.0%	6.1%
2013	4.9%	5.2%	6.0%	6.2%
2014	5.1%	5.3%	6.1%	6.3%
2015	4.4%	4.6%	5.4%	5.7%
2016	4.9%	5.1%	6.0%	6.1%
2017	4.6%	4.8%	5.7%	6.0%
2018	4.2%	4.3%	5.2%	5.6%
2019	4.1%	4.1%	5.1%	5.6%
2020	1.2%	1.1%	1.5%	1.7%

Table 14: Tourism spend as a share of the GDP 2010-2020

Source: IHS Markit Regional eXplorer version 2142

Senqu's tourism sector was particularly hard hit by Covid 19 as it deals with primarily domestic tourists and is slowly recovering despite rising electricity, food and petrol cost.

## 8.International Trade

International trade is not a big sector of trade in Senqu. Exports make up 0 % of national exports and the Senqu GDP. Senqu Local Municipality had a negative trade balance in 2020 to the value of R 8.6 million (IHS Markit, 2020). Senqu Municipality has a very low manufacturing sector. This is an area for potential expenditure. The entire district has a very low manufacturing sector.

	Senqu	Joe Gqabi	Eastern Cape	National Total
Exports (R 1000)	0	2,448	92,643,509	1,394,345,999
Imports (R 1000)	8,599	122,534	73,918,938	1,109,458,999
Total Trade (R 1000)	8,599	124,982	166,562,447	2,503,804,998
Trade Balance (R 1000)	-8,599	-120,085	18,724,570	284,887,001
Exports as % of GDP	0.0%	0.0%	24.5%	28.0%
Total trade as % of GDP	0.2%	1.0%	44.0%	50.3%
Regional share - Exports	0.0%	0.0%	6.6%	100.0%
Regional share - Imports	0.0%	0.0%	6.7%	100.0%
Regional share - Total Trade	0.0%	0.0%	6.7%	100.0%

Table 15: Merchandise exports and imports 2020 (R 1000 Current Prices)

Source: IHS Markit Regional eXplorer version 2142

# 9. Employment

Total employment consists of two parts: employment in the formal sector, and employment in the informal sector (Ecsecc,2017:41). In 2020, Senqu provided 32.63% of the total employment in Joe Gqabi District Municipality, 1.64% of total employment in Eastern Cape Province

(1.38 million), and 0.15% of the total employment of 15.6 million in South Africa. It is the second highest employing municipality in JGDM following Walter Sisulu. Employment has increased annually at an average rate of 1.57% from 2010 to 2020 (IHS Markit, 2020).

	Senqu	Elundini	Walter Sisulu	Total
				Joe Gqabi
Agriculture	2,410	2,140	3,010	7,552
Mining	32	12	41	86
Manufacturing	871	783	1,200	2,852
Electricity	44	112	99	254
Construction	2,620	3,460	2,540	8,611
Trade	4,990	4,280	4,830	14,094
Transport	744	965	903	2,612
Finance	1,480	1,570	2,340	5,393
Community Services	6,770	6,250	7,170	20,188
Households	2,660	1,510	3,490	7,659
Total	22,600	21,100	25,600	69,302

Table 16: Total employment per broad economic sector, JGDM 2020

Source: IHS Markit Regional eXplorer version 2142

The economic sectors that recorded the largest number of employment in 2020 were the Community Services Sector at 29.9% of total employment in the local municipality, followed by the trade sector with 22.1% (IHS Markit, 2020).

Most of the formal employment lies in the Tertiary industry, with 8 060 jobs out of the available 22 600 jobs in the area. Formal jobs make up 43.5% of all jobs in the Senqu Local Municipality. Formally employed people make up 65.86% of total employment, while the informal sector employed make up 34.14% of the total employment. Informal employment has increased from 2010 to 2020 (IHS Markit, 2020). This is a potential growth sector.

In 2020, the Trade sector recorded the highest number of informally employed, with 41.62% of the total informal employment. This is because the barriers to enter the Trade sector are less than other sectors. The Manufacturing sector has the lowest informal employment with 5.04% of total informal employment (IHS Markit, 2020).

	Formal employment	Informal employment
Agriculture	2,410	N/A
Mining	32	N/A
Manufacturing	482	389
Electricity	44	N/A
Construction	1,210	1,410
Trade	1,780	3,210
Transport	147	597
Finance	1,040	439
Community services	5,090	1,680
Households	2,660	N/A

Table 17: Formal and informal employment by broad economic sector 2020

Source: IHS Markit Regional eXplorer version 2142

The informal sector is vital for areas with very high unemployment and very low labour participation rates such as Senqu Municipality.

# 10.Index of Buying Power (IBP)

"The Index of Buying Power (IBP) is a measure of a region's overall capacity to absorb products and/or services. Regions' buying power usually depends on three factors: the size of the population; the ability of the population to spend (measured by total income); and the willingness of the population to spend (measured by total retail sales) (Ecsecc,2017:54)".

Senqu Local Municipality has a 0.2% share of the national population, 0.1% share of the total national income and a 0.1% share in the total national retail, which equates to an IBP index value of 0.0015 relative to South Africa as a whole. Joe Gqabi has an IBP of 0.0042, where Eastern Cape Province has and IBP index value of 0.089 and South Africa a value of 1 relative to South Africa as a whole. The low index of buying power of the Senqu Local Municipality suggests that the local municipality has access to only a small percentage of the goods and services available in all of the Joe Gqabi District Municipality. Its residents are most likely spending some of their income in neighbouring areas (IHS Markit, 2020).

Between 2010 and 2020, the IBP increased to its highest level in 2018 (0.001489) from its lowest in 2011 (0.001363) with an average annual growth rate of 0.78% (IHS Markit, 2020).

#### Table 18: Index of buying power

	Senqu	Joe Gqabi	Eastern Cape	National Total
Population	147,419	390,822	7,360,699	59,809,786

# **11. Comparative and Competitive Advantages**

#### 11.1 Competitive Advantages

#### • Basic Services and Infrastructure

The Municipality performs above District average in respect of access to all basic services but refuse removal. The majority of Senqu households enjoy access to the RDP minimum levels of basic services in respect of housing, energy and sanitation.

The road network is extensive, and all villages are accessible by roads. There are 2 major tarred roads which run through the Municipality and link the urban areas such as the R 58 and the R 392. They also provide linkage between the N6 and N2. Unfortunately, road maintenance is poor but the tarrred network is being upgraded.

The bulk infrastructure of water and sanitation is sufficient in towns and has been upgraded so that it can provide for growth such as the 802 RDP houses built in Barkly East.

#### • Technology

The Municipality is a pilot municipality for SALGA for the rollout of 5 G.

#### • Tourism

Scenic beauty, hiking and wildlife attractions and trout fishing. South Africa's only ski resort at Tiffendell. Tiffendell Ski Resort is the only ski resort in South Africa and is uniquely positioned to capture the local skiing market. Due to the shutdown of the tourism sector during lockdown, the ski resort was forced to shut down. The area has a well-developed road network that enters beautiful valleys and mountains. It is favoured by off road enthusiasts, trail runners and mountain bikers. The Municipality is looking to develop a resort around the Jozana dam, improve upon the

existing Lady Grey dam site and host an annual tourism festival to increase the number of tourists to the area.

## • Agriculture (wool production)

Agriculture is one of the major economic drivers of the local economy and is considered one of the New Growth path's job drivers. It is also recognised as such in the NSDF 2050. The area has a long and proud history of producing some of the best wool in South Africa. In 2010/11, 46 099 196 kilograms of greasy wool was produced in South Africa. Out of this the Eastern Cape produced 14 300 585 kilograms. In 2011/12, 44 807 741 kilograms were produced out of which the Eastern Cape produced 13 950 406 kilograms. Barkly East 876 812, Lady Grey 178, 107 and the Transkei 3,357,008 (Cape Wool production figures 2010-2012). This makes Senqu one of the largest producers of wool in the Eastern Cape. Its climate and topography make it well suited to expand this type of farming.

#### Regional Location

Strategic location and proximity to Lesotho provides development opportunities near the Telle Bridge border post as well as for the revitalisation and upgrade of Sterkspruit. These provide major tourism development opportunities for both Senqu and Lesotho. The proximity of the area to Lesotho, the Free State allows it to tap into these potential markets as well as being only 60 km from the N6 route from EastLondon to Johannesburg allows it to ship goods relatively easier.

### • Excess of electricity production

The Municipality has an excess of electricity production in its area.

#### 11.2. Comparative advantages

#### Access roads

All villages have access roads leading to them.

## • Spatial Development Plans

All towns have an adopted LSDF.

## • Underdeveloped tracts of land

There are large tracts of agricultural land which are underdeveloped.

#### • Niche processing

JOGEDA is busy implementing a peach growing and processing of peaches with a partnership agreement with the South African deciduous company and various communal farmers. Bottling of fresh spring water is a potential niche. Senqu has pure, clear water that is already being bottled on a small scale. Potential may exist for further expansion.

#### • Niche skills

The Municipality is busy training sheep shearers in conjunction with DRDAR and JOGEDA.

# 12. Challenges

#### • Geographic Challenge

The majority (86%) of the Senqu population lives in predominantly rural areas consisting of rural villages and farm households. The population density makes it extremely costly and difficult to provide the prerequisite services and conditions to address unemployment and poverty.

#### • Dependency and employment Challenge

The economy is unable to provide the required economic and employment opportunities for those requiring employment. Senqu Municipality has a high unemployment rate. It is higher than that of both the district and the Province.

#### • Poverty Challenge

Senqu Municipality has a high poverty rate, which is higher than that of the Province. Almost two thirds of Senqu households are indigent.

#### • Literacy Challenge

Literacy remains a problem even though illiterate rates are dropping slowly.

#### • Skills Challenge

Most of the adult population are unskilled. There is a major shortage of technical skills. There are only 3 tertiary institutions in the Joe Gqabi District Municipality and only 1 of these at Sterkspruit. However these institutions do not provide the required skills to develop and join the internet economy.

#### • Infrastructure and Land Challenge

While Senqu performs above district average in respect to all basic services except for refuse removal, infrastructure backlogs remain an area of constraint that must be addressed to unlock better growth and new investments into the area. The effect of migration into urban areas such as Sterkspruit is also putting major strain on existing infrastructure in these areas. A more integrated approach addressing social, economic and infrastructural issues is critical.

#### • Access to land

Senqu has many middle-income earners who are unable to buy plots for sale in the townships of Lady Grey, Barkly East and Rhodes. This is because they are in employment of the state and the Municipality is prohibited from selling to them. Other struggle to access land from Traditional Authorities.

In addition, access to serviced sites is difficult as main sewerage and water lines are currently laid to existing sites and not to areas which can be developed.

The other challenge is that of title deeds which requires formalisation of townships. The Municipality has a large-scale impact project which would require formalisation of the 10 surrounding villages around Sterkspruit.

### Congestion and business sites

Sterkspruit is congested with traffic which the Municipality is planning to relieve by installing a new traffic flow system and installing new traffic lights and creating proper parking bays. This requires much funding and a traffic management plan.

Access to business sites is difficult, as many in Sterkspruit do not have title deeds as they occur outside the town boundaries which also makes it difficult to supply services.

## • Growth Challenge

The growth of the local economy remains low and in the current economic climate, it is likely to remain low.

#### • Bulk Infrastructure

The Municipality suffers from lack of bulk infrastructure especially water and sanitation infrastructure which is supplied by the District Municipality.

#### • Connectivity

The area has low internet speeds and fluctuating poor telecommunications.

# 13. Economic Infrastructure

#### Roads

The Municipality is serviced by 2 main tarred roads – the R 58 which leads from the N6 and the R 392. The R 58 has just been recently upgraded but the R 392 requires maintenance, especially of potholes. The road is in the process of being handed over to SANRAL for repair.

#### • Agricultural land

The total cultivated area of arable land is 47,319.21 Ha, dry land under commercial production is 18, 178.39 Ha, commercial irrigated Land of 3,866.57 Ha, semi commercial (Commonages) of 25,274. 25 Ha (Information supplied by the Department of Agriculture). The area has limited land available that can sustain intensive agricultural practices. This is due to its highly erodible soils and unchecked poor veld management which has led to massive loss of topsoil and the growth of extensive dongas and gulleys.

The area is more suited towards stock farming than crop production due to its mountainous profile, short growing season, and shallow erodible soils. However due to this fact and the changing climate, newer crops are being investigated such as grapes. However, where soils are suitable, dryland crops such as beans, maize, sorghum, and cabbage can be produced. Fodder is also grown for winter feed and Lucerne is grown under irrigation on many commercial farms. Stocking rates tend to be low due

to the mountainous area, but sheep, cattle and goats are in the majority. Accurate stock rates could not be received from the Department but the table below from StatsSa, Community Survey 2016 indicates stock ownership which gives an idea of stock.

Agriculture	20	11	2016	
	Number	Percent	Number	Percent

Magwiji facilities	Magwiji

- 15 Dipping tanks in various states of disrepair requiring water and dip
- 2 red meat facilities
- 1 poultry abattoir (Sterkspruit)

- 11 stock dams
- 3 tunnel facilities
  - (Source: DRDAR 2024)

In general, agricultural infrastructure has been installed in the former homeland and communal region but farmers still express needs for fencing, tractors, stock dams, shearing sheds and dip for the dipping tanks.

The most common complaint is for roads to be fixed in all commercial and communal areas and especially to the lands. The former homeland is also being invaded by plants which reduce grass from growing and affect animal health like the jointed cactus and Slangbos. DRDAR will be starting programmes to eradicate the cactus and DEDEA have funded projects to eradicate Slangbos but more needs to be done as it is spreading throughout the district. Stock theft remains a constant threat to both commercial and non -commercial farmers. A positive note is the growth of farming co-operatives building relationships with commercial farmers to utilise underutilised communal land such as the Tugela co-operative near Skisazana.

#### • Sporting infrastructure

There are 5 sports stadiums in Lady Grey, Barkly East, Sterkspruit, Kwa Gcina and Zava. These are in various stages of repair with the Sterkspruit stadium being the most vandalised.

#### • Streets

Most streets are paved in the CBD of Lady Grey and tarred in Sterkspruit and Barkly East.

#### • Streetlights

There are streetlights in the towns of Lady Grey, Barkly East and Sterkspruit.

## • TV, radio, internet and cellphone reception

Reception is good in the towns of Lady Grey, Barkly East and Sterkspruit but Barkly East is prone to cellphone blackouts. However reception in rural areas and on the main tarred roads is patchy.

## • Electricity

Electricity is supplied to all urban residents and most rural residents except for newer developed areas.

# 14. LED Support System and stakeholder involvement

The Senqu Municipality has a dedicated LED Unit located within its planning department. The Unit is responsible for coordination and facilitation of LED processes in Senqu as well as advising the Council on LED matters. The LED unit is fully staffed. The LED Unit is based in the Directorate: Development & Town Planning Services Directorate. The Unit has 1 Enterprise Development Officer and 1 Tourism Office. It is headed by the IPED Manager. The office was granted an operational budget of R 3 052 969.52 for LED and R 1 181 612.50 for tourism for 2019/2020. In 2020 it had an LED budget of R 485 838 and R 327 141 for tourism. For 2021/ 22 the amount for LED is R 308 671 and for Tourism R 638 039. In 2022 Tourism has R 430 518 and the same for LED.

Senqu is one of the key partners of the Joe Gqabi Economic Development Agency (JoGEDA) which is tasked to drive special economic development projects on behalf of the district municipality and the three local municipalities in Joe Gqabi. With respect to Senqu, the Agency has prioritised commercial property development and plastic manufacturing as its immediate flagship projects. Its other partners are the local tourism organization (Senqu Tourism Association) and the Small Enterprise Development Agency (SEDA)which provides support services to tourism enterprises and other small businesses in the area. Other partners include the JGDM, ECDC, DLGTA, DEDEA and the Department of Agriculture.

The Municipality has an Economic Development Forum. The aim of the forum is to:

- Provide LED facilitation and support within the Senqu municipality.
- Advise on development choices by understanding the local context enough to validate claims made about local potential.
- Mobilise local stakeholders.
- Facilitate local partnerships within and between local public and private organisations.
- Develop an annual work plan to implement the LED strategy that is reported on quarterly.
- Assist with and advise on local economic development iniatives.
- Coordinate all local economic development iniatives within the municipality.
- Provide information and create awareness about LED within the municipality.
- Monitoring and evaluation of local economic development projects

The forum meets quarterly. Its meetings have been disrupted by the development of the LED strategy where the Municipality has been meeting with various stakeholder groups separately. Other stakeholder forums include the LTO, small farmer's association and agricultural forum. However, these forums require more capacitation and engagement to keep the functioning effectively. The Municipality engages with sector departments through District Support team meetings on a quarterly basis and IDP Representative Forum meetings.

## **15. Labour intensive programmes**

The CWP programme is operated very effectively in the Municipality by the LED Unit. The CWP programme operates in 7 wards in the Municipality but this will be extended. It currently engages over 2000 persons. The programme is implemented through an annual site plan which is adopted by the council. The CWP Local reference Committee is headed by the Portfolio Councilor DTPS, Cllr Mbonjwa and consists of affected Ward Councillors, COGTA, Programme implementor and sector departments.

The EPWP programme undertakes projects such as maintenance of municipal property, cleaning in urban areas, storm water management in townships and data collection. EPWP targets are also set in capital infrastructure projects. Over 196 jobs were created in 2011,2012,2013. 252 jobs were created in 2014/15 for mass job and 450 on MIG projects. 216 Jobs on average for 2017/18 through mass job creation as part of the EPWP programme and CWP. 544 jobs were created in 2018/19. In 2019/2020 an average of 165 jobs were created monthly.

The EPWP policy was adopted by Council on the 25<sup>th of</sup> October 2012, amended and adopted again in 2018 to take cognizance of the changes in legislation. The policy outlines the

institutional arrangements for implementing EPWP, roles and responsibilities, the employment opportunities, training and EPWP target, conditions of employment, target groups and reporting process. The Director of Technical Services is responsible for implementing EPWP but the co-ordination is done by the EPWP Steering Committee. The Committee consists relevant sector heads and LED. The responsibility of the Committee is to:

- Coordinate the overall municipal wide coordination of EPWP and related issues
- Review the EPWP policy.
- Setting departmental EPWP targets
- Enabling environment for the successful implementation of EPWP
- Reporting to the management meeting
- Monitoring and evaluation of the EPWP programme
- Setting of performance standards
- Compiling an EPWP management plan

The EPWP framework for Phase 3 was adopted by Council in May 2016 and for Phase 4 in 2020.

#### Amounts budgeted for EPWP

	<u> </u>								
2014/15	2015/16	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
6 480 000	6 480 000	4 753 818	5 038 050	4 952 783	5 104 950	2 489 651	7 634 528	5 436 000	8 456 096.63

# 16. Investment Attraction, Small Town Revitalisation and Policy Framework

The Municipality is expending great effort to attract investors to the municipal areas by ensuring that towns are kept clean, and that grass and trees are cut and pruned regularly. Senqu has won several awards in the cleanest town competition. It came first in the 2022 greenest town competition and received funding in 2023/2024.

The Municipality has spent its neighbourhood development grant on beautifying the entrance to Lady Grey by planting trees and providing pathways linking the township to the CBD. The emphasis in Sterkspruit, is on consolidation of neighbouring settlements into the existing town and resolving land tenure issues.

A small-town regeneration plan has been developed for Sterkspruit and Barkly East. An application will be made in 2024-2025 to join the Office of the Premiers programme for small town

development. As part of small town development, walkways have been paved and 18 hawkers' huts handed over in Sterkspruit. Community parks in Lady Grey funded by DEA has been built. The lack of available land is preventing the development of similar parks in Sterkspruit.

Suggestions have also been received by the communities of Rhodes and Lady Grey for street signage to improve security. This has been approved in the budget and a policy developed on naming in the Municipality.

The Municipality has also begun to increase revenue by expanding the rates base through formalisation of adjoining rural areas to existing urban centers as well as implementing the small-town plans. The policy framework regarding businesses is in the process of being revisited in order to determine areas of hindrance for business development. These include the bylaws on building control regulations, business and street trading, liquor trading, preparation of foods at registered private kitchens and taxi ranks and taxi ranking. This is all part of the Municipality's drive to assist the development of business in the area including the ultimate adoption of informal trading regulations and the draft trade and investment policy.

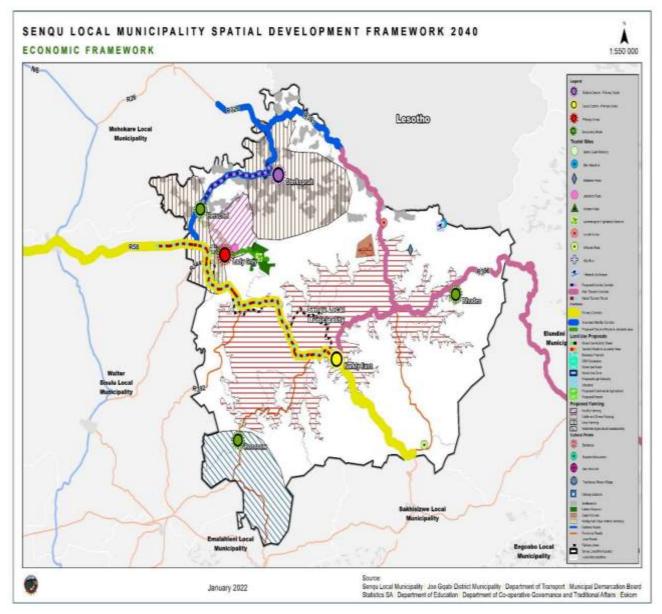

Work is starting on the revitalisation of the Sterkspruit revitalisation plan with funding being sought for thedevelopment of a traffic plan which will reroute traffic and avoid congestion of the CBD. This plan has now become part of the Sterkspruit Urban Design Framework (UDF). The construction of a DLTC in the town will assist in increased revenue for the Municipality as learners and drivers licence tests can occur in the town. Plans have been made in the budget for a multiyear project to build an additional bridge in New Rest to alleviate traffic congestion as well as the installation of a traffic light.

Investors have started displaying an interest in the area which the growth of the Sterkspruit plaza and the development of the old Transido building by JOGEDA as well as the errection of an electronic sign by JGDM for JOGEDA as a source of revenue. Another investment opportunity is the development of a shopping Centre in Palmietfontein which has been welcomed by residents. The Centre should be developed within the coming years.

The Municipality has redone its LED strategy. Targets for enterprise development support have been set at 30 % procurement by SMME & Co-operatives of the Operational Budget and 30 % of all projects over R 6 million must be given to subcontractors. The LED strategy has looked at the issue of the township economy. However, it must be realised that not all areas are equal and Senqu Municipality does not have a township economy as exists in the larger metros. The townships in Senqu form part of the town economy and most business still occurs around the CBD including that of informal traders. The only businesses in the townships are shebeens and spaza towns. Support has been given through funding iniatives of R 5000 for emerging businesses and R 50 000 for existing businesses.

# **17. LED Priorities & Spatial Realities**

The map below from the SDF 2022 indicates the relationship between the LED priorities and the spatial realities.

# 19. LED Strategy and alignment with the One plan

The LED strategy was redone in the 2021/2022 Financial year and the final strategy was adopted in June 2022.

#### 19.1. LED Strategy Objectives

The Senqu LED Strategy aims to achieve the following objective and strategies:

Objective 1: To grow the local economy by 3 % by 2027.

Strategy 1: To attract 2 main investments by 2027.

Objective 2: To increase employment by X % in 2027

- Strategy 1: Engage appropriate stakeholders on how to develop appropriate skills for the modern economy.
- Strategy 2: Development of an SMME strategy
- Strategy 3: Development of SMME's Hubs

Strategy 4: Facilitate the development of organisations to mentor and assist emerging businesses.

- Strategy 5: Utilise more labour-intensive methods in capital infrastructure projects.
- Objective 3: Stimulation of the rural economy
- Strategy 1: Facilitate the development of access to market for emerging farmers with appropriate stakeholders.
- Strategy 2: Facilitate the maintenance of the most important rural roads for farmers.
- Strategy 3: Facilitate the access for emerging farmers to machinery.
- Strategy 4: Engage appropriate stakeholders on how to improve mobile phone coverage and increase data speeds.
- Objective 4: Development of investor friendly and attractive urban areas

Strategy 1: Develop a redtape reduction strategy to reduce business turnover time on applications.

- Strategy 2: Development of legally compliant businesses
- Strategy 3: Utilisation of the green economy

Programmes and implementation plans will form part of the strategy.

Alignment between the LED Strategy and One plan

DDM Pillar	DM Projects	LED Strategy Projects
People development and demographics	Youth development HIV & Aids programmes Support special interest groups	Objective 2: To increase employment by X % in 2027 Strategy 1: Engage appropriate stakeholders on how to develop appropriate skills for the modern economy Projects SPU programmes for women, children and youth
Economic positioning	Red tape reduction Support iniatives for small town revitalisation Local procurement and supply chain policies	Objective 4: Development of investor friendly and attractive urban areas Strategy 1: Develop a redtape reduction strategy to reduce business turnover time on applications. Objective 2: To increase employment by X % in 2027 Strategy 1: Engage appropriate stakeholders on how to develop appropriate skills for the modern economy. Strategy 2: Development of an SMME strategy Projects Specific goals and local procurement Sterkspruit UDF Application for OTP small town development project.
Spatial restructuring and environmental sustainability	High altitude conservation and development area Develop SDF's to protect areas	Development of NE grassland park SDF highlights protected areas
Infrastructure engineering	Access to basic service delivery Reduction of infrastructure backlogs Climate change strategies	Objective 3: Stimulation of the rural economy Objective 4: Development of investor friendly and attractive urban areas Basic service delivery infrastructure projects Development of an environmental framework
Governance and management	Work with Traditional Authorities Implement PMS	Objective 4: Development of investor friendly and attractive urban areas Consolidation of 10 villages around Sterkspruit Implementation of the Sterkspruit UDF

# 20. Conclusion

The LM's lack of annual growth has resulted in an unprecedented high unemployment in the Senqu area with high dependence on government grants. This coupled with access to basic household and community services which is below optimal creates tension amongst communities who compete for relatively scarce resources.

Therefore, it becomes crucial that the municipality creates conducive conditions for job creation and participation in agricultural activities by availing land for development. Businesses are not growing as SMME's as they do not receive strategic support from government institutions. Areas for great concern are centered around food security and land reform. The tourism sector is underdeveloped and needs strategic intervention to revive and contribute to the local economy meaningfully. Agriculture remains central to the development of the area. However, it must be done in conjunction with other programmes. Land administration and town planning seem to have been relegated to the background of the municipal priorities. This approach does impact negatively on the development trajectory of the municipality.

# CHAPTER FOUR: BASIC SERVICE DELIVERY

#### 1. SLA's and other Institutional Arrangements

Community Services has an SLA with DSRAC. In terms of the SLA Senqu runs the library service on behalf of DSRAC. This SLA is signed annually. Technical Services has an SLA regarding electricity sales with ESKOM whereby the Municipality procures electricity from ESKOM and then sells it via its internal network to urban customers.

#### 2. Spatial Analysis and Rationale

The SDF was adopted in 2022. The SDF was developed according to SPLUMA regulations. It is aligned with the draft NSDF, JGDM SDF, Walter Sisulu and Elundini SDF's and the Eastern Cape SDP. It was gazetted in November 2023 under notice 92/2023. The settlements found in the municipality are listed below and their category.

Settlement	Settlement Type
Sterkspruit (Main urban area- inc	Urban
surrounding settlements within the urban	
(Sterkspruit LSDF 207)	
Lady Grey including Transwilger and	Urban
Kwezi Naledi	
Barkly East including Fairview and	Urban
Nkululeko	
Rhodes including Zakhele	Urban
Rossouw	Urban
Hershel	Urban
Rural villages 178 (OTP 2015)	Rural
Privately owned commercial farms	Rural

There is land that is under the jurisdiction of traditional authorities with communal land tenure. The municipality is busy negotiating with traditional authorities to include all the surrounding villages into Sterkspruit municipal boundaries since it has no services.

The following Guiding Principles have been developed in accordance with the SPLUMA guiding principles. The following Spatial Guiding Principles are outlined for the SLM SDF.

*Development of Sustainable Human Settlements* This guiding principle seeks to address the critical interventions required that would counter current shortcomings in the way settlements perform. Key areas

of concern include dealing with the existing sparsely dispersed settlements and the lack of certain social amenities within some settlements and the wide variety of housing needs applicable to carious areas of the district related to tenure challenges, especially those that are poorly catered for by current housing markets. Other areas of concern relate to the need to ensure that housing opportunities are developed in areas that offer better access to social and economic opportunities to the most people (especially the less well-off who are most reliant on public transport); and to the need to ensure that levels of access to critical social facilities and services are progressively improved. Aligned with Eastern Cape PDP 2030

Ensuring a Sustainable and Functioning Environment The major area constraining the environment within the context of the SLM is the growing effects of climate change and the crucial role played by the natural environment in providing the essential ecosystem goods and services upon which the environmental sphere thrives upon. Key concerns are that spatial development and human land uses should be planned and managed so as not to disrupt or destroy critical biodiversity areas. The aim of the guiding principle also highlights the need for planning to strengthen the resilience of communities and to allow for contingencies when responding to natural disaster events.

Managing and Maintaining Safe and Accessible Infrastructure Provision This guiding principle focuses on the importance of ensuring that existing infrastructure networks are adequately maintained and that scarce critical (life-enabling) resources such as water are protected and managed to ensure wise and sustainable use. This guiding principle also emphasises the need to plan for the changing services provision context, especially the impact of changes in how activist citizens have begun to design solutions in order to reduce their absolute dependency on municipal services provision.

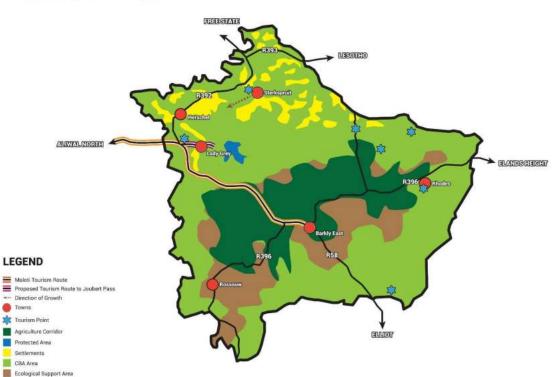

*infrastructure* which allows for the ease of access to various neighbouring communities (to the extent of the Kingdom of Lesotho) to access social amenities and the job market. The SLM under the goal for the development of a Smart municipality will aim to promote energy conservation and alternative energy production. This guiding principle will also aim to address Infrastructure upgrading and provision within the district.

Access to and Affordable Public Transportation and Accessible Linkages Between Settlements. This guiding principle focuses on the interplay of viable public transportation with the appropriate pattern of land use and settlement development within the municipality and beyond. It is clearly recognised that public transport functions best and most sustainably when it services a user population that resides at sufficient density and distances from various land uses within the areas of which the transport services is offered.

Sustainable Rural Development There are many rural settlements located throughout the municipality. This guiding principle seeks to take into account the realities of the interplay between SLM's urban areas and its rural settlements, and especially the linkage between these areas. There will be an improved connection between the rural and urban in such a way that they operate in sync, whatever the other lack

the other is able to assist with. There will also be improved access, all of these will promote and supports sustainable initiatives whilst also being able to facilitate food security programmes within the rural areas. "Smart City" and Information Technology Cities and areas in third world countries have been seeing the need for advancing this sector.

*Effective Governance* This principle highlights the importance of ensuring efficiency, transparency, and inclusiveness in the SLM's approach to fulfilling its Municipal Planning mandate, specifically about spatial planning and land use management. This means that emphasis is to be placed on communication with interested and affected parties to any planning initiative and ensuring transparency between municipal functions and public knowledge to ensure that the public is part of the planning process and that they essentially are satisfied with the projects proposed within the spaces in which the live and utilise. Priority is to be given to ensuring that a sound and technically proficient administration is developed and nurtured, so as to win the trust and support of all stakeholders and community members who share a common interest in seeing sustainable development become a reality for the municipality (SDF 2022:154-160).

# CONCEPT PLAN

#### 3. Development Nodes and Settlement proposals

The concept for the future development of the municipality is to strengthen the existing residential nodes, both Urban and Rural areas and define the edges of these areas, to protect the areas of Agricultural potential as well as the areas of environmental sensitivity. The concept looks at the nodes being developed

to accommodate residential and alternative economic opportunities to create employment. The concept looks at alternative economic sectors like red meat abattoirs and tourism can be possible sectors, which can support and ensure the sustainability of these nodes.

NODE TYPE	TOWN NAME	
District Centre/ Primary Node	Sterkspruit	
Local Centre/ Primary Node	Barkly East	
Primary Node	Lady Grey	
Secondary Node	Herschel	
Secondary Node	Rossouw	
Secondary Node	Rhodes	

The municipality is identified as a leading product for the Senqu local economy in 2004 (ECO 2006), with scenic beauty, hiking and wildlife attractions, and trout fishing, together with South Africa's only ski resort at Tiffendell. Tiffendell ski resort is the "key pin" with linkages to the Rhodes, Barkly East, Maclear, Ugie and Lady Grey areas.

From an environmental perspective, the natural environmental needs to be protected. We need to protect these areas by monitoring land uses near these areas. The environment is an asset which also needs to be marketed and promoted.

The following components are applicable to the Conceptual Spatial Plan for the Senqu SDF:

- 1. Movement
- The R58 is the main movement route in the municipality
- The R393 is regarded as an important mobility route since it connects the municipality to the Kingdom of Lesotho and the province of the Free State
- The enhancing the agricultural sector would further require prioritisation to be placed on the movement routes between towns in Senqu as well as outside of the LM.
- 2. Infrastructure
- Infrastructure upgrades are required for towns to expand and to accommodate for the housing need in Senqu LM.
- Upgrades of Roads to allow for the ease of movement of people, goods and services
- Social Facilities to cater for the growing need.
- 3. Towns
- Towns have the potential to expand, specifically Barkly East, Lady Grey, Sterkspruit and Herschel. The proposal for this is to also aim to impact the provision of Sustainable Human Settlements and transportation movement, as well as the retail and trade sectors.
- Alignment and support to neighbouring towns. Assess their needs and consider the impact it would have on Senqu LM (Great influx from Lesotho to areas of Sterkspruit and going to Herschel) 62

4. Economic Growth

- The key economic sectors which the concept plan covers are as follows: ➤ Finance ➤ Trade ➤ Agriculture, Forestry and Fishing ➤ Community Services ➤ Transportation
- The concept plan aims to facilitate economic growth in the economic sectors of Senqu LM. This is aimed to be achieved through the prioritisation of the opening of industrial sites, the promotion of logistics and transportation movement, as well as the retail and trade sectors.
- 5. Agriculture
- The agricultural sector is proposed to be promoted within Senqu LM
- Agro process is a spin off sector which has the potential to thrive should focus be placed on the agricultural sector
- Training / skills development centres are required to allow for the growth of the sector and to provide job opportunities for residents. This can be through the Subsistence farming taking place in the municipality.
- 6. Tourism
- Tourism opportunities exists within the Senqu Local Municipality which need further promotion and enhancement. The tourism opportunities include but not limited to the following: ➤ Naude's Neck Pass connecting Maclear to Rhodes ➤ Joubert's Pass in Lady Grey

#### 4. Spatial Proposals

a. Lady Grey: Spatial Logic and proposed land uses

The town of Lady Grey functions primarily as a service centre and the SDF describes it as a primary node. It provides commercial facilities and social infrastructure and services to both the residents and residents from the greater district which consists of mainly commercial farms. The town is located on the R58 provincial road which links the town of Lady Grey to Aliwal North (Maletswai) to the west, Barkly East to the east and Herschel and Sterkspruit (via the R392) to the north. The area is acknowledged as an administrative centre; there is availability of industrial land; there is development potential of the river frontage; there are places of historical interest that exist. (Heritage sites), and there is potential for tourism, mountain biking, hiking, and various other outdoor sports.

Residential

- There is an opportunity for high income housing near the golf course. This will ensure that the area accommodates the people that work in the area but stay in areas like Maletswai.
- There are opportunities for infill development.
- With the mountain acting as a constraint for development, development is confined to the West of the town, this provides an opportunity for densification.

#### Business

- An activity street is proposed, this is where most of the of the commercial activities are taking place.
- The SDF proposes a CBD expansion between Schreiner Street and Murray Street.
- It also proposes a Civic precinct between Huet and Murray Streets
- There is a proposed agricultural activity that can take place opposite the Khwezi-Naledi township. This will improve the subsistence commercial farming and can work well since the municipality has a farmer's support forum that can ensure its functionality.

### Industrial

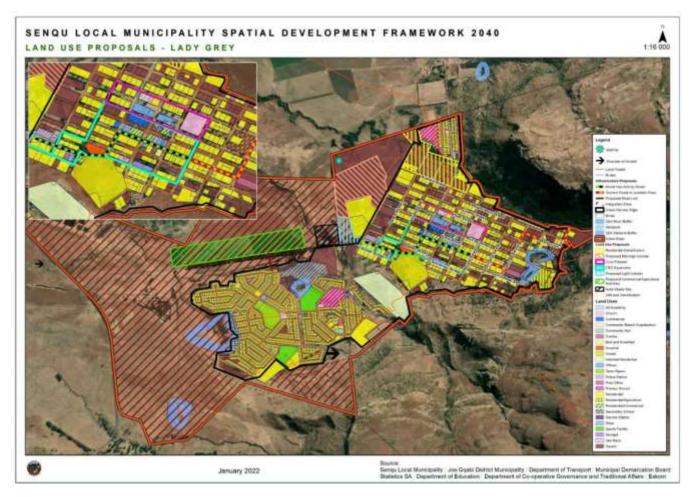

• There is an opportunity for light industry just before the CBD where there are opportunities for retail.

### Tourism

- The SDF proposes a tourism route that runs through to the town to Jouberts Pass.
- There is an opportunity for more guesthouses in the CBD, this will increase the economic revenue in the municipality by ensuring that tourists passing to Jouberts Pass should spend in the area.

### Infrastructure

- There is a proposal to have a route that links the Lady Grey township to the main route. This will improve the connectivity in the Khwezi Naledi township.
- There is a proposal for a new dam.
- Proposal for maintenance of the priority road (going in and out of Lady Grey). This road can have street designs that give a feeling of the area. (SDF,2022:190)

b. Barkly East: Spatial Logic and proposed land uses

Barkly East is a primary node in the municipality. The development of Barkly East is more spread out and there is a lot of room for infill development to prevent sprawling urban expansion. There are areas of farming activity on the outskirts of town but there is a large amount of land adjacent to the built-up areas that is unproductive. This is an opportunity for future development but due to the small scale of this town and the sparse population there needs to be much more investment in the economy of this town before any sort of large urban expansion can be expected.

### Residential

- One of the projects which have been identified is the relocation of informal settlements to the north or Barkly East CBD. Informal housing which encroaches onto the 32m buffer from the Langkloof River, and its tributaries will need to be relocated.
- The SDF proposes a Mid-High-income housing close to the golf course.
- There are areas earmarked for future growth expansion, this can accommodate more housing projects soon.

### Business

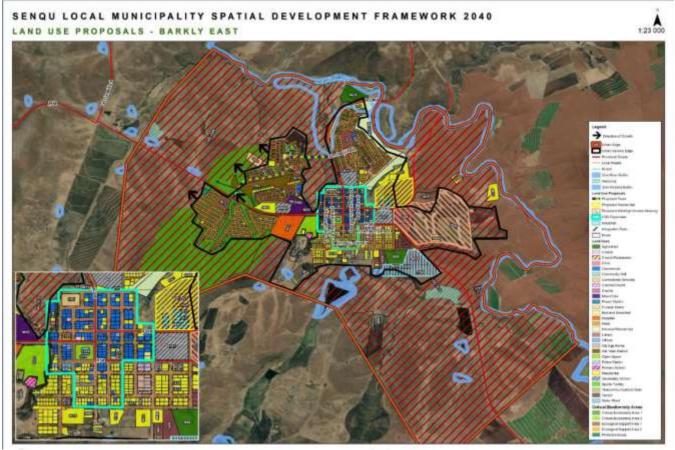

There is potential for a CBD expansion, this will amalgamate the businesses in the area and ensure a larger office precinct that can host a number of offices in the area. This is where there is a lot of commercial activities are taking place.

#### Industrial

- There is a proposed light industrial area along the R58. Movement
- There is a proposed route that joins two sections of Barkly East, this is aimed at assisting the reduction of car concentration in the main road and CBD.

#### Infrastructure

- Proposal for maintenance of the priority road (R58). This road can have street designs that give a feeling of the area.
- Barkly East's new cemetery is proposed on a Portion of Erf 1618 (SDF, 2022:188)

#### c. Sterkspruit: Spatial Logic

Sterkspruit is the economic hub of SLM and the SDF coins it as a primary node. Sterkspruit also must accommodate a large amount of people from the surrounding rural and peri-urban settlements also who come to buy goods and services in the town. Sterkspruit being the economic hub of SLM, it needs to provide more opportunities for people to gain meaningful employment 66

within this town. It also caters for a lot of people coming from smaller towns who can only access certain goods and services here. It is therefore important that the development should meet the needs of the current population whilst providing economic opportunities for those who live in it.

#### Residential

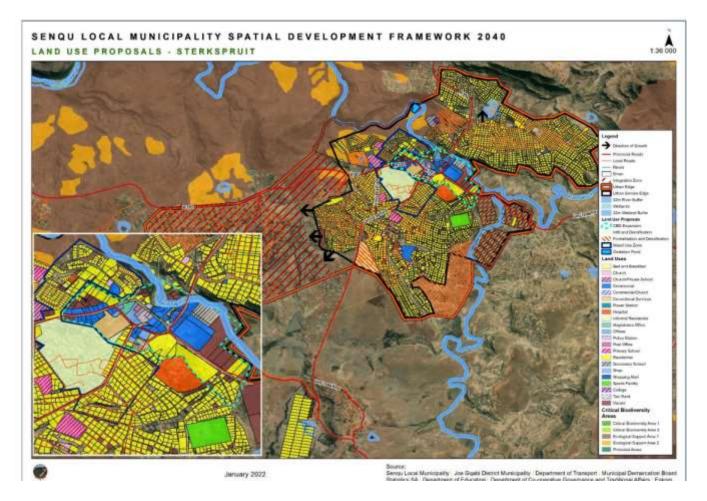

- There is an opportunity for infill development and densification.
- There is a proposal to expand the urban edge to areas like Esilindini. This will assist in accommodating more people and relieve the congestion pressures around the CBD.
- Creation of open spaces within the surrounding rural spaces for the promotion of social cohesion. Business
- There is an opportunity for a CBD expansion to accommodate for more business and office space in the area.
- Provision has also been made to the east of Sterkspruit Plaza to accommodate retail, offices, banking services and other related land uses.
- There is a proposal for a mixed zone (including open spaces) Industrial
- There is an opportunity for light industry just before the CBD where there are opportunities for retail.

#### Mixed Use Corridor

- There is a proposal for a mixed-use corridor between Sterkspruit and Herschel with a focus on reinforcing and supporting the current nodes and the linear development between them. Such linear development should allow for land use and transportation to support each other and improve the efficiency of the public transport system and the infrastructure network.
- This corridor will also allow for many of the settlements along the R392 to have access to retail services without having to travel to the Sterkspruit CBD. The corridor will not only ease the pressure of pedestrian and traffic congestion, but it will also allow for employment opportunities for those who live along this route. This proposed corridor beautifully encompasses the principles of nodes corridors talked about in many spatial planning policies.

### Infrastructure

• Proposal for maintenance of the priority road. This road can have street designs that give a feeling of the area. The Sterkspruit CBD road infrastructure requires constant maintenance as it is an important link to Palmietfontein and the Lesotho Corridor. (SDF,2022:195).

The SDF does also submit future development proposals for Hershel, Rhodes and Rossouw.

#### 5. Land Tribunal and by laws

Senqu Municipality is part of the District Municipal Planning Tribunal. Each Municipality has 1 representative on the Council and the Director DTPS fulfills this role. The Municipal Manager is the authorised Official. The District Municipal Planning Tribunal has had its first session. The tribunal sits as applications are received from the municipalities. Members of the tribunal are Ms N Mshumi (Chairperson) COO- JGMD, Mr S Chaphi (Deputy Chairperson) Director DTPS- Senqu LM, Mr T Phintshane Manager IDP/PMS- JGDM. Ms N Libazi- Manager Legal- JGDM, Ms N Eddie- Director Planning and Economic Development- Elundini LM, Mr W Nodwele Manager IDP-Walter Sisulu LM, Ms A Qinisile- DEDEAT, Mr M Coleman- External and Dr T Williams-External

Senqu SPLUMA bylaws were gazetted in 2016. However, implementation has proved to be difficult especially about land invasions mainly due to lack of political and administrative will. The municipality adopted and gazetted the Senqu Municipality Unlawful land occupation bylaw in 2022, and developed fines for the bylaw.

The municipality has one registered professional planner currently who is also the head of the section. A junior Town planner was appointed in 2021 and now forms part of the Unit.

#### 6. Human Settlement Type

.

Census 2011 indicates that 70 % of households live in a formal dwelling and 68.5 % own their own dwelling. Most residents live in formal dwellings whilst the amount living in traditional dwellings remains constant. There has however been a growth in informal dwellings.

Most residents live in traditional rural settlements. This was 80 % in 2011. 23 % live in urban settlements with Sterkspruit representing the highest urban population. This was 14.3 % in 2011. 1080 households live in informal settlements. This was 3.7 % in 2011. 5 % of the population (6 203 people) live on commercial farms (HSP 2020).

Source: StatsSa, 2011

Most households own their own houses (fully paid off). 2 980 (8%) rent. This has changed little from 2011 to 2016 (HSP 2020).

The Municipality has developed a land GIS system which is constantly updated by the Town Planner who is a professionally registered Town Planner. The Municipality is looking at the option of building an integrated GIS system that will meet the needs of all the departments. All services available on land (erven) are held by the Finance department. The GIS system includes land use, zoning, land ownership, SG Diagrams, and valuations. Unfortunately, the GIS system is not yet functional but will be purchased in 2024-2-25 FY.

The social viability and amenities of settlements is determined by the Department of Human Settlement in conjunction with the Municipality as settlement plans are drawn up per settlement as the municipality only acts as an agent. There is only one stalled project which is the Herschel 700 of which only 505 units were completed. The project stopped due to land invasions and disputes in Hershel. The Municipality did get a court order against the land invaders.

The Municipality is not a housing provider and does not provide bulk sanitation and water. However, the municipality is in the process of developing a land acquisition strategy for all land uses. This will enable it to set aside land for bulk services and settlement. The SDF does provide areas of potential investment for infrastructure and has a chapter of human settlements which also indicates areas for potentially settling people however the land acquisition strategy will provide more specific area.

Budget has been set aside for developing layout plans in Sterkspruit for the development of 2 existing suburbs viz Zwelitsha and Mountain View.

SDF priorities which have been translated into IDP financed projects are:

- The reviewal of the LUMS (Land Use Scheme and policies).
- Upgrading of Informal settlements

Budget estimates for planned housing projects are included in the implementation plans in the SDF and HSP.

## 7. Land Tenure, SDF's & Demand for Land

The Senqu Municipality has communal land in the former Transkei homeland situated around Herschel and Sterkspruit, bordering on Lesotho. The land tenure in this area is a mixture of freehold, quit rent and PTO. Land tenure and rights in this area have traditionally been vested in traditional authorities with the Department of Agriculture distributing PTOs. The rest of the area is either freehold tenure in the former RSA towns or commercially owned farmland (Senqu SDF 2009).

The majority of the municipal land is unimproved grassland (75.6%), with only 6.6% of the area used for cultivation purposes. Approximately 13% of the surface area is classified as degraded: that is, it has previously been subjected to poor land use and management practices (e.g., overgrazing, or inappropriate cultivationmethods). Only 1.1% of the surface area is developed as built areas, including the urban areas of Sterkspruit, Lady Grey and Barkly East, as well as the rural settlements. Senqu has major challenges relating to land invasions of municipal owned or state land. This is due to lack of land being offered for sale and people being unable to afford land but wishing to be closer to prospective employment and urban amenities in the urban areas of Barkly East and Lady Grey. In the smaller rural hamlets of Rhodes, Rossouw and Herschel people are invading land and building informal settlements to move closer to urban amenities or receive housing with freehold tenure especially farm workers. There is also the land redistribution challenge that Senqu must meet. For example, to be able to meet the 30% redistribution target by 2014, 166 000 ha will need to be redistributed at 33 000 per annum at a total cost of R 83 million if the price remains at around R 2500 per hectare (JGDM ABP 2010).

Senqu Municipality consists of both communal and individually owned tenure land in the former Transkei situated around Herschel and Sterkspruit. The land tenure in the former homeland area is a mixture

of freehold, quit rent and PTO. Land tenure and rights in this area have traditionally been vested in traditional authorities with the Department of Agriculture distributing PTO's.

The rest of the area is either freehold tenure in the former RSA towns or commercially owned farmland. 1712ha is under communal tenure and 5000 under commercial farmland (JGDMABP 2010). The major challenges experienced in the area are land invasions of municipal owned or state land. This is due to lack of land being offered for sale and people being unable to afford land but wishing to be closer to prospective employment and urban amenities in the urban areas of Barkly East and Lady Grey. In the smaller rural hamlets of Rhodes, Rossouw and Herschel, people are invading land and building informal settlements in order to move closer to urban amenities or receive RDP housing. The Municipality is in consultation with Traditional Leaders to try and safeguard agricultural land in particular from land invasion and to formalise villages . Consultations also occur during the implementation of projects and change in policies.

The area-based plan of JGDM 2010 states that the need for land for arable land and grazing has decreased in rural areas and changed to a need for land for residential sites. The main issues in rural areas are farm workers looking for security of tenure, clarification of land tenure in communal areas, certainty of land rights where they overlap and lastly the firm establishment of women's rights. In urban areas, the need is for residential sites and services, upgrading of informal settlements and tenure security (JGDM ABP, 2010).

The SDF has identified land in all towns for future housing developments. A land audit was undertaken by the Housing Unit which is credible for Sterkspruit in 2017. A land audit needs to be undertaken for the entire Municipality. This will be done in 2024-2025 FY. An LSDF for Sterkspruit was developed in 2017. The LSDF for Lady Grey was completed in June 2019. The Barkly East LSDF has been developed and adopted.

#### 8. Land Redistribution

Land in South Africa is being redistributed through PLAS (Proactive Land Acquisition Strategy). This means that the state proactively looks for suitable agricultural land, buys it and then leases it to identified beneficiaries for a few years until it is satisfied that they can run the land effectively. To meet the land redistribution target of 30 %; 166 000 ha will need to be redistributed at a total cost of R 83 million if the priceremains at around R 2500 per hectare (JGDM ABP 2010). However, the ABP clearly states that an emerging farmer will only succeed if the farm concerned contains both mountain and low-lying ground. This means that the farms to be redistributed should be carefully sourced in Senqu.

In addition, the Department must look at the variety of land needs and tenure and formulate appropriate responses, The ABP advocates redistribution occurring along the R 58 and tenure reform around the R 392 where there are immense struggles created by overlapping land rights. This affects

development in the areaas much time is spent trying to ascertain who owns the land rights. An example of this is the housing project in Herschel where the project was delayed due to land right disputes.

### a. Land Invasions & Administration

Land invasions are becoming increasingly prevalent especially in Sterkspruit and Herschel. The municipality is in the process of updating its current land bylaws and serving notice on all land invaders. Signs warning against land invasion have been erected. In addition, the municipality has taken persons to court over land invasions and fenced off areas of potential invasions. Municipal outreaches and roadshows have constantly outlined the problems created by land invasions and warned residents against it. The Municipality has also held many meetings with traditional leaders around land issues and is utilising the NDPG funding to consolidate settlements around Sterkspruit to ensure that communities can receive tittle deeds. There is a SPLUMA Bylaw and a anti-land Invasion Bylaw which was gazetted in 2022.

### 9. Migration

About 84 % of people in Senqu had lived in the same dwelling for at least 5 years before the 2007 Survey. Almost 5 % had moved into their dwelling in the previous 5 years (HSP 2011). Most of those who had moved, moved from another location in the Eastern Cape province. About 627 people moved from Gauteng to Senqu and 205 moved from the North-West Province. 175 of the people moving into Senqu came from outside of South Africa. The Municipality has no migration plan in place due to funding constraints. The current housing delivery is meeting the demand.

## **10. Informal Settlements**

There are 216 informal communities. The Department of Human Settlements has committed to incremental upgrading of 115 Informal Settlements, which has been assessed and categorized. The Head of Department has appointed the Housing Development Agency (HDA) as the Implementing Agent as well as Programme Manager and Fund Manager for the Informal Settlement Upgrading to a value of R14M,

6 informal settlements are currently under Planning and Design, 1 informal settlement in 6 in Senqu LM - Enkanini , Reliweni , Top location ,Polar Park Phantsi Kwezkolo, Zola .

The table 23 below indicates the ones where registration of beneficiaries has begun.

	5		-

	Pollar Park	79
Rhodes	Zakhele	81

Source: DTPS SC March 2023

Barkly East and Lady Grey informal settlements are in the planning phase for the formalisation. Temporal services have been provided to the settlements.

## 11. Capacity to manage housing delivery

The Municipality does not have an accredited housing department. In terms of the Standard Charter of Accounts (SCOA) the Municipality has absorbed the staff into the directorate Development & Town PlanningServices. The Municipality continues to play its role in managing housing beneficiaries as well as identifying and allocating land and prioritising municipal services for identified areas. The Department has assessed the Municipality's capacity and recommended that they apply for accreditation.

### 12. Land Potential & Constraints

It is envisaged that preliminary and detailed feasibility assessment of both land and infrastructure potential will in future form part of the project readiness assessment before capital funding is allocated. With further review and refinement of the HSP, information should be acquired to enable yield calculations on strategic land parcels.

The procedures for accessing communal land for future development are guided by the Interim Protection of Informal Land Rights Act. Once a community resolution has been obtained, it is the responsibility of the Department of rural Development and Land Reform to issue formal authorisation for the release/ transfer of land. These processes are both time consuming and costly with many examples of the process never reaching a conclusion. The normal willing buyer/willing seller or alternatively expropriation procedures (with compensation) apply when accessing privately owned land for settlement development or municipal commonage purposes.

## 13. Analysis of Housing Need

The Municipality uses housing provision as a way to address past and current social inequalities in localities where there are both high levels of poverty and demonstrated economic potential. Through the provision of sustainable human settlements which not only include residential sites but sites for social amenities and economic activities, the Municipality hopes to create social cohesion and ensure a better quality of life for all. The housing backlog in the Sengu municipality was determined as 10 761 with 1 752 in the urban area and 9009 in the rural area (Housing Sector Plan HSP 2013). There are no military veterans on the Department 's database for Sengu. The quantified housing demand is based on information from the 2011 Census, 2016 Household survey and HSP dot count and can be summarised as follows:

	Rural Areas	Urban areas	
	Census 2011 No of h/holds	Census 2011 No of h/holds	Urban areas Informal structure "dot count 2020; NUSP; Senqu HSP 2013
Informal structures	541	1242	4 759
Traditional dwellings	8 666	117	
Sub Total	9 207	1 359	4 759
TOTAL HOUSING NEED	10 556		14 083
Rental/ social housing	151	133	
Total Rental/Social Housing need	2	84	2 981
Child headed households	837 (Cen	usus 2011)	728 (2016 household survey)
Senior Citizen headed households	8544 (Ce	nsus 2011)	

#### Table 24: Housing demand

Source: HSP 2020

The new HSP 2020 indicates a different demand of 14 083. To deal with the housing challenge, the Department has implemented the following projects:

- Sterkspruit 4000 units which is near completion.
- Barkly East 298 in the process

The current HSP is due for reviewal. The HSP covers the demand for housing, current projects, blocked projects, future projects, bulk infrastructure availability and social amenities. Settlements for upgrading are captured on HSP. Upgrading project is currently being implemented through the Housing Development Agency To date no breaking new ground projects have been implemented and no FLISP project implemented within the municipal area but it is hoped that these concepts will be utilised and emphasized in the new HSP. The Municipality was a pilot site for CRU but unfortunately this is a blocked project.

The housing section of DTPS maintains a housing Needs Register, which is a separate tool from the HSP and the numbers increase monthly as they are being captured on the system.

## 14. Land Requirements for Future Development

Existing rural settlements are not requiring more land. Social and rental housing should ideally be accommodated on underutilised land parcels central to the urban areas with good success to existing social and infrastructure facilities and services. Feasibility assessments will be required to determine the potential for in-situ formalisation of informal settlements. The alternatives for responding to the needs of child headed households needs to be considered before the need can be determined.

Parcels of land for future housing needs have been identified around the towns of Sterkspruit, Barkly East and Lady Grey. The land identified in Sterkspruit is near the ESKOM development and near the area identified for light industry. Unfortunately, the area has been invaded and a court interdict provides against any future development until the dispute is resolved. The area is not serviced with any infrastructure apart from Zakhele, Rhodes.

In Barkly East, an area of the commonage near the old rehabilitated solid waste site has been identified for future development as well as land near the entrance of town. The land is not serviced. A layout plan has been developed and awaiting approval from the district tribunal. In Lady Grey, the area near Kwezi-Naledi has been identified for development. A layout plan has been developed and is awaiting approval for environmental authorisation, but the JGDM is not confirming bulk service delivery in the area. The areas are at the back of the current township and is not yet serviced.

## 15. Challenges

- Demand for land. There is a huge demand for middle to lower income houses in Lady Grey, Barkly East and Sterkspruit. The available sites are not serviced.
- Much of the land required for development purposes in the former Transkei areas falls outside municipal boundaries and under the jurisdiction of traditional authorities with communal land tenure. The municipality is busy negotiating with traditional authorities to include all the surrounding villages into Sterkspruit municipal boundaries.
- Land invasions. Land demarcated for future development especially in Sterkspruit is often invaded by persons from villages outside Sterkspruit seeking to be closer to town

- Beneficiaries. On completion of projects many houses can't be handed over due to beneficiaries either relocating or dying. Beneficiaries who die without leaving a will, create problems as the municipality then must decide which family member is entitled to the house.
- Vandalism. Many RDP houses are vandalised before the project is complete
- Shoddy workmanship. Contractors either do not have the skills to undertake the project or under quote which leads to projects taking many years to complete and then houses must be rectified.
- No integration of settlements. Housing developments are planned without future growth in mind like schools, clinics, and churches.
- Errection of illegal shelters. House owners continue to build squatter shacks in their back yards.
- Illegal usage of RDP houses. Many house owners illegally rent their houses out or sell them which results in the growth of many spaza shops.
- No fencing provided for houses. RDP houses do not cater for fencing with the result that commonage and roadside fences are stolen.
- Overlapping land rights create delays in development which is the case in Herschel where a housing project has been delayed from building over 100 houses due to an ongoing land claim dispute.
- Unfiled building plans. Landowners just build according to their wants without consulting the municipality.
- Disaster Houses. The municipality is not responsible for disaster management but finds that many of the reported houses do not get fixed by the Department.

## 16. Interventions

- By law enforcement. The municipality is in the process of restructuring some bylaws to prevent land invasions and the building of illegal structures without building permission. A new bylaw was developed and gazetted.
- Densification. The municipality is working with service providers to densify Sterkspruit by amalgamating it with the surrounding villages and increasing the current municipal boundaries. This will take some time as the land belongs to traditional authorities.
- Private partnerships whereby developers buy land parcels to survey and develop it for middle incomebuyers.
- Housing Sector Plan. The Municipality developed a new housing sector plan in 2020 which is due for reviewal.

## 17.1 Housing Programmes

The Department and Municipality have not introduced the types of housing programmes that are available. There are no FLISP (Finance Linked Individual Subsidy) projects implemented within the municipal area due to poor take up. However, Settlements for upgrading are captured on HSP. The Upgrading project is currently being implemented through the Housing Development Agency and most of the work is complete as can be seen in the Department of Human Settlement projects. The municipality was to pilot CRU, however this is a blocked project.

In conclusion the municipality does believe that the successful implementation of the housing programme in rural villages will assist in decreasing the high levels of poverty and create economic development. This is done through planning of sustainable human settlements which not only include residential sites but sites for social amenities and economic activities.

## **18. Health Services**

## 18.1 Current Situation

Senqu Health Sub-District consists of 4 hospitals (Cloete Joubert in Barkly East, Lady Grey Hospital, Mlamli and Empilisweni in Sterkspruit), 20 fixed clinics (Masibulele Clinic, Pelandaba Clinic, Musong Clinic, Ndofela Clinic, Macacuma Clinic, Palmietfontein Clinic, St. Michaels Clinic, Sinethemba Clinic, Sterkspruit Town Clinic, Hillside Clinic, Umlamli Gateway Clinic, Esilindini, Bluegums Clinic, Herschel Clinic, Wittebergen Clinic, Robert Mjobo Clinic, Sonwabo Zandile Clinic, Hlomendlini Clinic, Sunduza Clinic and Bensonvale Clinic),1 Satellite clinic, 8 Mobile clinics, 5 health posts and 2 community-based services in Sterkspruit and 1 in Barkly East serving all the farms at Sergeu. Joe

Gqabi Health District in the Eastern Cape has a population of just over 372 192 people, with the province's second lowest population density of 13.1 per km2. Only five per cent (5%) of the population belong to a medical aid scheme (18 645), the third lowest membership level in the province.

Empilisweni hospital has been repaired and the road to Mlamli hospital is paved from the gravel road. The Lady Grey Hospital is in the process of being upgraded.

A nurses training college Lilitha was opened at the Empilisweni Hospital in Sterkspruit in 2014. There is an issue with the accreditation of the programme, but this is in the process of being addressed. Many people in Senqu remain without access to healthcare, as there are few mobile services in the areas of Sterkspruit due to the dilapidated state of the road infrastructure.

In Ward 2 the application for construction of a new clinic is in the priority list at head office because the clinic is too dilapidated for renovations. Dental services are available at Empilisweni Hospital. Applications have been submitted for construction of new clinics at Ndofela, Esilindini, Khiba villages and the renovation of clinics:Musong, Pelandaba, Herschel and Esilindini.

## 18.1 Challenges

- Poor infrastructure The road to Mlamli a major hospital is in a very bad condition. However, work has begun on tarring the road. Poor maintained gravel roads, lack of or limited water, sanitation, electricity and communication systems, poorly maintained health care buildings, health care equipmentand nurse accommodation frustrate health delivery.
- Inadequate budget for health, with many health care trainees are not being absorbed. The litha training colleges are also awaiting accreditation, so no training is occurring.
- Inability to attract and retain health professional staff. There are a high number of staff vacancies.
- Inadequate Mobile and emergency services. There are not enough ambulances to serve the whole area.
- No 24-hour PHC facilities
- Poor quality of service delivery long queues and demotivated, overworked and uncaring staff drugsand essential clinic supplies not available.
- No Road signs to clinics. Although this is slowly being addressed

## 18.2. Interventions

- Committed Professional staff.
- Good community participation structures do exist.

- Good policies and procedures around health care
- Introduction of VCT, PMTCT and ART services is occurring across the municipality.

## **19. Telecommunications**

a. Current Situation

Although most communities have access to telecommunication either in the form of land lines or cell phones, there are still those communities that cannot access these facilities because they can't receive signals behind the mountains. From the table below, it can be seen that the majority of residents utilise cell phones rather than fixed lines which means that they rely on good network coverage. Computer and internet usage are on the increase mainly due to the new smart cell phones which include internet and computer technology. However, data speeds are slow and there are increased network failures of both Vodacom and MTN being experienced in Barkly East and Lady Grey

b. Interventions

The Municipality has written to Sentech, all the cell phone companies and the SABC to ask for more radio, TV and cell phone towers to be built in these areas. The reception in Rhodes has been improved with the installation of a new tower. However, infrastructure for better and faster internet speeds needs to be installed such as fibre especially for the towns such as Sterkspruit.

SALGA have also identified Senqu Municipality for Infrastructure Upgrade for Broadband and Connectivity. Broadband training has been started for the Municipality.

Table	Table 28: H/H with a radio, TV, computer, cell phone, landline and internet

Table 28: H/H with a radio, TV, computer, cell phone, landline and internet

Source: StatsSa, 2011

## 20. Community Facilities

## a. Sport and Recreation

The Municipality only has proper sport and recreation facilities located in the main towns. However, some sports fields have been built in rural areas like Kwa Gcina and Zava/Naledi. Lady Grey, Sterkspruit and Barkly East have facilities that have been built and one in Sterkspruit (Patrick Shibane was renovated in 2013 /14 as well as the facility in Barkly East as they suffered from vandalism). With the high percentage of youth in the population make-up it is essential to provide sports and recreation facilities.

These facilities are rented out. The rental tariff is levied for the use of the sport facilities at a rate that is determined by the council in municipal tariffs which are reviewed on an annual basis. Sport facilities are maintained as per the approved maintenance plan.

## b. Interventions

The Municipality has put in floodlights in Lady Grey and is also engaged in a programme funded by the German government which promotes sports field development in rural areas. In addition, the allocated 15 % of MIG funds will be utilised for building more rural sports fields. Barkly East and Sterkspruit facilities were renovated and upgraded. The Lady Grey Stadium fence is currently being renovated. This has however run into litigation issuesbut is being resolved. Netball poles and soccer nets are being purchased for rural fields.

## c. Indoor Community Recreational

An indoor community recreational facility or community hall has been built in each ward. However, the re-demarcation of wards means that some wards have more than 1 hall whilst others have none. The Municipality has prioritised the renovation of all existing facilities so that they all have the same standard. These facilities are important for social cohesion as they are used for community meetings, to house indoor sports like badminton as well as being utilised for arts and cultural events like dancing.

Communities would like more of these facilities and pay points to be built. There is a Thusong Centre, formerly known as MPCC, located in Sterkspruit that houses various government departments. In addition, the facilities will now include a Councillors Office to improve governance.

Magal	Table 29: Community facilities audit	Condition
Ward	Indoor community recreational facility	Condition
1	Ndofela	Good
2	Storomo	Good
3	Makalakeng	Good built 2013/14
4	Makumsha	Good needs ceiling
5	Rossouw Hillside Phelendaba	Rossouw was renovated but needs water. Good Needs ceiling Good
6	Majuba	Good
	Musong	Good
7	Thaba Lesoba	Good needs ceiling
8	Mokhesi	Good. Needs painting and cleaning of fire damage
9	Ngquba	Good. Still some snag issues which need to be resolved.
10	Bunga Hall Tienbank	The Bunga Hall was renovated in 2013/14. The current facility is r longer adequate and requires rebuilding. Tienbank is good.
11	Bluegums	Good needs ceiling
12	Magadla	Good. Built in 2015/16
13	Molweni Bantwana – Herschel Zava	Burnt down in 2018/19. Will be rebuilt 2022/23. Delays construction
		Good but needs ceiling
14	Transwilger Lady Grey Kwezi Naledi	Transwilger has been renovated in 2916/17. Lady Grey har renovated. Kwezi Naledi needs a ceiling
15	Nkululeko	Nkululeko is in good condition and the new hall in Rhodes was handed over in June 2013 but has no electricity.
	Rhodes	
16	Barkly East Town Hall	The hall is in the process of renovation
	Fairview	Demolished

13	Herschel	Closed due to vandalism							
10	Sterkspruit	Good built 2014/15							

Source: Senqu Community Services 2023

The total number of halls is 27, 18 in rural areas and 9 in urban areas. Halls in urban as areas are booked through finance and are in a good condition as most of them have been recently renovated. The rural community halls are not as well maintained and are controlled and operated through Ward Councillor and Ward Committees. The municipality visits the halls on a regular basis to conduct inspection and implementation thereof as required by the maintenance plan. The implementation of the maintenance plan does not make an impact as this is only a minor maintenance that is carried out due to budget constraints on repairs and maintenance. The halls built through MIG funding, are not in the asset register and therefore are not insured which is a huge risk to the municipality.

There are 2 well fenced recreational parks in Lady Grey with play apparatus for children, braai facilities and ablution facilities that operate between 08H00 and 17H00. Hiring tariffs for public open spaces is detailed in municipal tariffs which are available and reviewed on an annual basis. The main challenges with parks are vandalism, theft and insufficient budget to maintain the parks.

The municipality operates public toilets in Sterkspruit, Lady Grey and Barkly East. All of the toilets are locked overnight (and unlocked first thing in the morning) by the employees and are open 8 hours a day and six days a week, except Sterkspruit on Saturday which operates from 08:00 to 13:00. Public toilets are maintained by the municipality as per the approved maintenance plan which has an insufficient budget.

The following cemeteries exists in urban areas:

- Steve Tshwete cemetery, Lady Grey reaching full capacity. Municipality is in a process of starting an EIA process for the new cemetery in Lady Grey and Herschel
- Khwezi Naledi cemetery old and full cemetery currently closed.
- Nkululeko old cemetery full cemetery currently closed.
- Zola, Rhodes-Zakhele cemetery
- Barkly East Town cemetery
- Lady Grey Town cemetery
- Sterkspruit Town Cemetery
- Transwilger cemetery
- There were also 22 cemeteries that were developed in the rural areas. Cemeteries are maintained on quarterly basis.
- Burial plots are purchased in urban areas.

### Interventions

The Municipality is busy ascertaining where sports facilities have to be built in the newly demarcated wards so as to have centrally located sports fields. The 15 % of MIG funding for sports facilities has been set aside to build more indoor recreational facilities and sports fields.

### 21. Libraries

a. Current Situation

There are libraries in Lady Grey, Barkly East and Sterkspruit and satellite libraries in Rhodes and Rossouw run in municipal buildings. The municipality runs this service as an agency function for the Department of Sports, Arts and Recreation. More funding is however required for this service to fulfil the demand of school and university learners. DSRAC has promised at a MuniMec to improve their funding so that it does not become an unfunded mandate. DSRAC operates 2 libraries in Herschel and Hillside. However the Hershel library has been closed due to vandalism.

## 22. Safe & Secure Environment

## a Current Situation

The Municipality is promoting the use and development of community police forums to solve crime in rural areas. The use of drugs is increasing in these areas according to community forums. The Integrated Community Safety Forum has been revived and a plan is in the process of being developed. The municipality does participate in the CPF's. Gender based violence is unfortunately high in the area.

There are 7 police stations in what is called zone 2 in Joe Gqabi District Municipality. These are Barkly East, Lady Grey, Palmietfontein, Phumalanga, Rhodes, Rossouw and Sterkspruit). Major crimes are

- Murder with 28 % occurring at the Sterkspruit station in the district. Males are the most victims but to some extent females and these incidents are liquor related, domestic violence related and to a lesser extents mob injustice.
- Attempted murder accounts for 56 % of the crime in the district and reported at the Sterkspruit station. These cases occurred during weekends between 18:00 to 23:00
- Rape & Sexual Assault is at 51 % of the district total and occurs at the Sterkspruit station. These incidents are mostly committed inside the house by males against women and children where the perpetrators are mostly known or related to the victims (e.g. uncle, neighbours, friend and ex-partner)
- Theft Out/ From Motor Vehicle accounts for 34 % of the district statistics at Barkly East & Sterk SAPS. These incidents are happening inside the yard and trucks parked next to the garages at night.
- Theft Out/ From Motor Vehicle accounts for 34 % of the district statistics at Barkly East & Sterk SAPS
- Stock theft is at 25 % with Lady Grey SAPS recording most of the cases. In most cases this occurs from farms or deep rural areas such as (Zone 1) Maizefield, Tennerif, Tabakaspoort farm, Skhisazana A/A, (Zone 3) Ngxaxha A/A, Nqayi A/A and Hlankomo A/A either during the day or night.
- Fraud is dominant at 41 % in Sterkspruit and Barkly East SAPS. Most of these incidents happen randomly, no specific times and days were victims are robbed at an ATM by unknown people who appear to assist them and rob them of their money, the bank card will be swallowed and money withdrawn after few minutes.
- House Robbery is high with 47 % at Sterkspruit SAPS.
- Business Robbery occurs at 57 % at the Sterkspruit SAPS. These incidents are committed by a group of 03 to 05 males unknown Sotho speaking targeting Foreign Nationals and in few incidents SA residents. Normally during the day between 6 am and 9pm at opening and closing.

Contributing factors are liquor and drug abuse, high unemployment, child neglect, love triangle, jealousy and revenge. Other crime issues which add to high levels of crime are:

- Closing times of liquor outlets.
- Liquor outlets run by Foreign Nationals.
- Control on issuing of liquor license by EC Liquor Board

- Too many undocumented person crossing the Border.
- Crimes committed by our neighbouring country, Lesotho Nationals
- Insufficient personnel at EC Liquor Board.

### b. Interventions

The SAPS have been approached regarding the high levels of crime and they are looking into the possibility of increasing the number of satellite stations in the area.

### 23. Waste Management

#### a. Current Situation

Senqu Municipality has two (2) operational registered /licensed landfill sites in Lady Grey & Barkly East. Rossouw and Hershel are permitted for operation. Hershel and Rossouw site are near completion. A transfer station has to be built at Rhodes. Sterkspruit is licensed for closure in September 2021 and the project to close it has reached practical completion. The Municipality has requested an extension on the usage of the site as there are delays in building the new site. The newly identified site in Sterkspruit has problems as the Community have signed a petition against the site being erected in their area.

Refuse removal is only operated in Barkly East, Sterkspruit, Rhodes and Lady Grey on a weekly basis. 11.2 % of households were served in 2007 and the percentage of serviced households increased from 17.2% in 2001 to 22.6 % in 2007 (StatsSa, 2007). The current situation is 4 672 households serviced with 57,22 % not serviced consisting of 9020 households (IHS Markit 2020.)

The Municipality is experiencing difficulty in expanding its service due to constant breakdowns of its aging fleet and low human resources. This has however been mitigated with the procurement of new fleet.

	H/holds	Percentage
Removed by local authority at least once a week	18289	37.4
Removed by local authority less often	126	0.3
Communal refuse dump	305	0.6
Communal container/central collection point	1100	2.2
Own refuse dump	24755	50.6
No Rubbish Disposal	3754	7.7
Other	585	1.2

#### Table 30: Refuse removal

Source: StatsSa census: 2022

The households in Barkly East produce 4508 kg a day and 137 T a month as opposed to 9 T in Herschel, 9 T Rhodes, 3 T in Rossouw and 101 Ton Lady Grey. 2147 households are served in Barkly East, 149 in Herschel, 1591 in Lady Grey, 144 in Rhodes, 57 in Rossouw and 539 in Sterkspruit (IWMP 2013).

The Municipality is struggling to meet all the legislation pertaining to the management of waste sites. It doeshowever have a designated Waste Management Officer in terms of legislation. Lady Grey site is licenced and classified as GSB. There is no plant or equipment to properly cover and compact waste. The site is in the process of being upgraded and cells lined. The Barkly East site is classified as GSB on a new site. The waste is incinerated and disposed in a cell.

Medical waste for the 4 hospitals and 20 clinics is collected by a company organised by the Department of Health. However, problems are being experienced with medical waste being illegally dumped in landfill sites.

- c. Challenges
- Permitted sites. Lady Grey and Barkly East are currently the only permitted sites. Rhodes and Hershel are permitted and being built
- Contravention of the Occupational Health and Safety Act. This risk applies not only to the staff working on the sites but extends to the public especially scavengers who frequent most of the sites.
- Limited waste collection services. Waste services (collection) only offered to urban residents.
- Recycling and waste avoidance iniatives. There are very few recycling iniatives in the Municipality, extracting less than 1 % of the potential recyclable material. No iniatives are underway for waste avoidance. Purchasing of mini refuse skips for Sterkspruit town and purchasing of refuse bins has occurred. In addition, waste awareness campaign was conducted.
- Contravention of legislation. The disposal of waste is a significant challenge, and this is leading to a lack of compliance with legislation, water, air and aesthetic pollution. The landfill sites do not comply with DWA's minimum requirements. There is no facility available to dispose of hazardous material. However, this is all about to change as money has been allocated for the building of 5 new solidwaste sites in Sterkspruit, Barkly East, Rhodes, Rossouw and Hershel.
- Plans and policies. The municipality does not have a leachate management plan as waste is stored on site in a cage on a cement floor until it is incinerated and then burnt. A trade effluent policy has been developed in 2020. The integrated waste management plan was reviewed and adopted in 2018. It was APPROVED BY Council but not endorsed by MEC DEDEAT. The Department has however committed to assist with the development of a new IWMP in 2022. A consultant to undertake the process is being procured and the development of a new plan will start in the 2023 FY. A waste official has been formally

designated and appointed. He is the Manager: Waste management. By-Laws have been gazetted. The air quality management plan is currently being developed in a district level.

- Cost effectiveness and waste administration of current services is poor mainly due to a history of lack of investment in the service in terms of equipment, staff, and planning.
- Illegal dumping. Many shop owners particularly in Sterkspruit dump their waste on the sidewalk on day when waste is not collected. To counteract this municipality has promoted the usage of cages and collects waste more frequently in the centre of town. The municipality has also acted against shop owners who persist in this action. However illegal dumping in open fields and borrow pits continues. In Barkly East and Lady Grey garden refuse and building rubble are the main contents of illegal dumping. Bylaws are being developed to address illegal dumping.
- d. Interventions
- Increased equipment. New tip trucks and TLB were bought. However these are becoming unreliable and the Department of Community Services has a tender to lease fleet. Weighbridges are installed in BarklyEast and Lady Grey.
- Annual waste awareness campaign is run in the Municipality to make people aware of reducing, recycling and reusing waste to prevent unnecessary collection of waste.
- Integrated waste management plan and recycling. The plan proposes recycling options particularly in Sterkspruit. Recycling projects have been started in Barkly East, Sterkspruit and Lady Grey. The Lady Grey recycling deals primarily with bottles.
- Funding. MIG Money has been set aside in the budget for the construction of new compliant wastemanagement sites particularly in Sterkspruit and Barkly East. In addition, the annual operations and maintenance budget is used for day-to-day activities.
- EIA's and new sites. Rhodes EIA process has to start afresh. ROD's has been received for Hershel and Rossouw and they have gone on tender. Lady Grey SWS upgrade is still not complete, but Barkly East hasbeen completed. 2 Licensed sites in Lady Grey and Barkly East. Sterkspruit has a closure license, a new site is on the EIA approval stage. 2 new sites are about to be built in Rossouw and Herschel
- Forums. The Municipality forms part of the District Environmental Management Forum and does not have its own waste management forum.

## 24. Water and Sanitation

Joe Gqabi DM is the WSA and WSP. Therefore, no SLA has been signed between the Municipality and District. Senqu has the highest unserved population in the JGDM area. This is due to the fact that most of the population is centered in the former Transkei homeland which experienced a very low level of service before 1994. The situation has improved and 22,323 % are not serviced which is 7 209 households (IHS Markit, 2020)

The 2011 census reveals that Senqu has an unserved population of 7 209 households out of 38 046 which is under 20%. In 2021 this rose to 25.5 %. The area is prone to droughts. Water sources are the Jozanashoek dam, Lady Grey dam, Barkly East dam, boreholes and rivers.

#### Table 31: Access to piped tap water

Туре	Percentage
Piped (tap) water inside the dwelling	34.6
Piped (tap) water inside the yard	30.9
Piped (tap) water on community stand	9.1
No access to piped water	25.5

Source: StatsSa census 2022

Whilst most of the population does receive water, sanitation provision is lagging with 1713 households not being serviced (StatsSA Census, 2021). The bucket system is still operating in Rhodes, Lady Grey and Barkly East near graveyard.

Туре	Percentage						
Flush toilet	40.4						
Chemical toilet	2.2						
Pit toilet	50.2						
Bucket toilet	1.3						
Other	2.4						
None	3.5						

#### Table 32: Households by type of toilet facilities

Source: StatsSa Census 2022

	20	11 Toilet	2021 Toilet

Walter Sisulu	16745	2958	2171	30662	2395	1114	

Although the LM has more water available than the requirements, it is not spread in such a manner as to satisfy the need everywhere. The towns that have been experiencing water shortages are:

- Herschel
- Lady Grey
- Rossouw

The towns that have just enough water to satisfy the demand and might experience water shortages in the near future are:

## Sterkspruit RWS

The level of services provided is mostly of high quality with connections to the yard and into the house itself. Sterkspruit and Rhodes have the highest standard of water followed by Barkly East and then Lady Grey. Water is available 24 hrs/day in the urban areas but the rural areas experience many lengthily outages. There are issues with water pressure which the District alleges are due to illegal water connections

## b. Challenges

- Broken water pipes, non-functioning pipes, water unavailability and poor pressure.
- Backlog eradication is the main challenge facing the JGDM. An estimated R 149,603,738 for water and R 93,901,795 for sanitation is required for Senqu backlog eradication
- Operation and maintenance of existing water services. There is a high need for ongoing refurbishment and maintenance programme which will ensure sustainability of these schemes.
- Lady Grey & Barkly East bulk water supply.
- Water backlogs and illegal connections in the rural area.
- Rehabilitation of the Barkly East & Rhodes reticulation networks.
- Installation of section & bulk metering.
- Insufficient diesel for the water pumps
- c. Interventions

Borehole standalone schemes. Water backlogs may be eradicated by means of the development of borehole standalone schemes.

VIP's. Sanitation backlogs will be eradicated by means of implementing VIP's. Projects will be prioritised by focusing on villages with the highest sanitation concern first. It is anticipated that a regional construction approach will be followed to maximize the benefit of scale in terms of price, timeframes and quality (JGDM WSDP 2010).

## 25. Roads, Transport and Stormwater

Local Municipality		Surfaced Trui Roads	Surfaced Main Roads	Unsurfaced Main Roads	District	Unsurfaced District Road	Minor Roads		LM Total Leng (km)
Senqu	116.37	-	9.17	290.93	73.01	931.36	767.16	817.36	3,005.37
District Total	653.80	46.40	184.84	737.32	138.09	3,190.98	2,985.47	2,886.91	10,823.82

#### Table 33: Roads in the Senqu area

Source: Department of Public Works and Roads, 2013

The table above refers to the kilometres of roads in the entire Joe Gqabi District. From this information, Senqu has the longest amount of unsurfaced main roads and access roads. The backlog in access roads must still be determined in the Municipality.

### Tarred roads

The provincial trunk road, the R58 is in a bad condition and has been moved to SANRAL. It is in the process of being resurfaced A rock fall closed the road for 3 weeks between Lady Grey and Barkly East in February 2020. Rock falls are common on the road after heavy rainfalls. This affects tourism as this is the main entrance into the municipality. As such it needs to be a provincial priority. The R 393 between Lady Grey and Sterkspruit has many potholes and roaming livestock due to stolen or poor fencing remain a hazard for drivers despite the newly introduced road rangers. The road to Tele Bridge has recently been upgraded (JGDM ITP 2010). It is envisaged that the R 393 and R 392 will revert to SANRAL.

### Gravel/ Unsurfaced Roads

Most of provincially maintained gravel roads have deteriorated significantly to the level where they need extensive regravelling and low-level bridges need repair or replacing. The end result is people being unable to access goods and services or having to pay high prices for transport of goods and persons due to poor or impassable roads.

### Access Roads

Access Roads are maintained by municipalities in terms of the Municipal Structures Act; however, this is not financially viable for Senqu Municipality. The municipality inherited a backlog of maintenance of existing access roads as well as many villages which don't have access roads. Due to the small

tax base of the area and high unemployment, the municipality is heavily reliant on the MIG grant to fund repair, maintenance and building of access roads. The Municipality suffers from an aging fleet and insufficient equipment and staff to be able to maintain all the access roads in its area. This is a disadvantage for residents and emerging farmers who struggle to access their lands.

Senqu is responsible for all access and municipal roads in its area. The balance of the roads falls under the powers and functions of the Department of Roads and Transport (DoT). The level of road services in rural areas is low, where most roads are gravel. The Municipality has engaged its municipal wards to identify priority access roads that need tarring. These however will still require a massive financial injection. Current gravel roads backlog in Senqu is 562km. The Department is maintaining the roads around Sterkspruit inhouse whilst the gravel roads of Barkly, Lady Grey and Rhodes district now fall under a framework contract and is undertaken by consultants engaged by the Department.

The Municipality does not have a Rural Roads Asset Management (RRAMS) as this is a programme undertaken at district level and is undertaken between JGDM and National DOT. Senqu has made enquiries about the possibility of having a RRAMS due to the high number of rural roads and bridges which need immediate repair. However the regional office is unaware of the programme and assistance is required from the Provincial office.

### Streets

Streets within towns are the responsibility of the relevant local authority. Streets within townships in all the urban settlements are of very poor condition leading to localized flooding in bad weather, impassable roads and poor access.

## Rail network

The railway line between Aliwal North and Barkly East is unused even though the tracks are still in place (JGDM ITP 2010). Attempts have been made to revive the track for steam train enthusiasts as it contains 2 out of the 3railway reverses known in the world whereby the train reverses up a zigzag pattern to the top of a mountain.

## Airfields

The only airfield which can be recognised as such lies in Barkly East but is not maintained by the Municipality. There has been an investigation into a new airstrip to be located 10km south west of Rhodes near the R 396 funded by ECDORT for tourists to the Tiffindell ski resort but whether this will occur or not remains to be seen (JGDM ITP 2010).

### Non-motorised transport

A significant number of persons in Senqu rely on either bicycles or walking to reach their destinations. As a result, the municipality has paved most of the pavements in the main towns and some pedestrian walkways leading formthe former townships into the town. Few pedestrian crossings and poorly lit streets and paths are some of the hazards faced by pedestrians. In 2022 roads will be paved in both Lady Grey and Barkly East.

## 26. Public Transport

The Herschel United Taxi Association (HUTA) has 164 registered members owning 293 vehicles with 158 operating licenses and runs on 20 local and national routes. It is one of only 7 taxi associations in the District. Public transport operations in Barkly East and Lady Grey are small and relatively stable. In Sterkspruit no direct travel between villages is allowed and all trips must begin or end in the central rank at Sterkspruit. It is the busiest hub. The Municipality built the rank which is operated on lease agreement basis of a renewal three-year basis. The responsibility of the maintenance of the facility lies with the Lessee. The municipality is responsible for insuring the building. There is one bus association (Sterkspruit Bus Association). The Bus Association struggles to get its annual registration papers.

The most utilised trips are to Thaba Lesoba, Voyizana, Qhoboshane, Jozanashoek and Umlami. National destinations are Maletswai, Johannesburg, Welkom, Bloemfontein, Komani and Secunda.

## Road worthiness and licensing

Senqu provides a road worthy and licencing service at the Traffic Testing Station in Barkly East and licencing services at Sterkspruit and Lady Grey. A DLTC in Sterkspruit is being built that will eventually allow residents to undertake drivers and learners licence exams in the town.

There are only 4 Provincial traffic offices in the district. One, of which is in Sterkspruit. The Municipality has traffic officers and operates a testing station in Barkly East but the roadworthiness section is not yet fully functional as it requires calibration and cameras.

## 27. Storm Water Management & Access Roads

The Municipality on an annual basis targets certain priority area for the construction of storm water as per the maintenance plan. The Technical Services department in conjunction with the Community

Services Department implements the regular cleaning and maintenance of the existing stormwater infrastructure. Funding has been requested to undertake a stormwater plan to highlight the requirements for future and existing stormwater needs especially as climate change has resulted in more concentrated and larger rainfall events than previously.

a. Challenges

- Chronic underfunding and the constant deterioration of roads due to high rainfall conditions
- Limited maintenance of access roads due to insufficient human resources and machinery
- Breakdown of old out-dated road machinery
- The stormwater management plan requires updating and flood lines need to be determined to ensure that development occurs outside these area
- Lining and upgrading of storm water channels in urban areas as well as installing new stormwaterinfrastructure
- Not all villages, schools and clinics have decent access roads and not all streets in townships are tarred or paved
- Limited number of pedestrian bridges
- No cycle lanes
- Limited lighting of pedestrian walks ways although Council is slowly eliminating the backlog in urban areas.
- Poor road markings and potholes
- Limited road signage especially in rural areas
- Commuter facilities are primitive. Bus shelters were built in 2000 in Barkly East and Lady Grey by DoT. The current taxi rank in Barkly East is informal with no amenities and needs upgrading to an area with shelters for waiting passengers. Lady Grey has no taxi facilities but a public toilet and bus stop has been built through the NDPG. Sterkspruit has a taxi rank.
- Limited machinery and staff to meet the storm water function especially in rural areas.
- Fencing of commonage and communal lands along the main R 58 route and road to Sterkspruit. The fences are constantly being stolen by community members especially RDP housing developments tofence their yards.
- Stormwater is a problematic issue as the infrastructure was not designed for the huge runoff that is required. In addition, there is limited staff and equipment to maintain and keep the drains and furrows open. Huge investment is needed to develop a proper stormwater plan which focuses on what infrastructure required as well as to how stormwater runoff must be managed to prevent damage to property and possible loss of human life throughout the Municipality.

- Bridges have reached the end of their life cycle and are constantly breaking.
- Stormwater is a big problem in the suburb of Kwezi Naledi in Lady Grey

## b. Interventions

- A Roads and Stormwater Master Plan was developed to categorise roads and determine which ones are priorities. However further work is required to develop a workable plan and not just an annual maintenance plan. The policy allows for sustainable roads (interlock paving) and was approved in 2015. In addition, on an annual basis Ward Councillors indicate which roads and bridges require attention in their areas.
- Paving of township streets as part of an EPWP project and paving of sidewalks in all CBD's and the linkages between the townships as part of the pavement management system. This assists pedestrians who do not utilise vehicular transport.
- New road machinery and Operators.
- Installation of street lights in towns such as Herschel
- Building more pedestrian bridges and walk ways. This will also allow for cycling paths. Fundingis also set aside for the lighting of pedestrian walkways.
- JGDM Integrated Transport Plan, 2010. The LM utilises the DM's Integrated Transport Plan as it is not a transport authority and is not required to have a plan.
- Roads Forum is an intervention although it is not functional and does not sit regularly
- Taxi and Bus ranks are not adequate. In Sterkspruit, there is need for expansion. In addition, they are not properly run and maintained.
- Designated drop off points are required in urban areas to decrease congestion.

## 28. Electricity and Energy

## a. Current Situation

Although most of the Senqu communities have access to electricity, there are some communities that still need to be electrified either in the form of electricity installation or in upgrading of their existing lines as most of the lines particularly in Sterkspruit and surrounding villages are low voltage. These are mainly in new housing developments. Council is in the process of compiling an exact backlog list for ESKOM. The most worrying area is near Lundean's Neck where residents do not have electricity at all especially in Dangerhoek. This is now being addressed with Eskom putting in a Mini grid for residents of Nomlengana 49 and 65 from Dangershoek. They are just awaiting poles. The backlog is 3 722 connections according to Technical Services but IHS Markit 2020 put it at 2430 Households connections. ESKOM puts a backlog of 8000 connections in Sterkspruit but 3435 households in total.

Sengu Municipality has a licence agreement with the National Energy Regulator of South Africa. In terms of this agreement, Sengu is responsible for supplying electricity to Sterkspruit, Lady Grey and Barkly East. Rural areas (including Rhodes and Herschel) are supplied by ESKOM. However, the Municipality is seeking a licence to supply rural areas.

Electricity supply challenges include high leakages attributed to aging infrastructure, poor metering and incorrect accounting. A bylaw on electricity has been gazetted to combat theft of electricity as well as the rollout of SMART meters. The speed of rural electrification by ESKOM is far too slow, especially in non-grid areas. A master plan has been developed for electricity but its implementation has been delayed by insufficient resources. However, upgrading of infrastructure has occurred annually since 2012 and should be completed by 2019 if resources are available, Over 81.8 % of the municipality has been served (StatsSa, 2011). In 2021 over 86 percent have been served. A worrying trend is the growing numbers of illegal connections in Lady Grey.

Table 34: Electricity Usage											
Light sources 2021	H/holds	Percentage	Households	Percentage							
Electricity from											
mains	47016	96.1	Electricity from mains	32669	66.8						
Gas	89	0.2	Gas	13995	28.6						
Paraffin	683	1.4	Paraffin	1343	2.7						
Candles	902	1.8	Wood	710	1.5						
Solar	128	0.3	Coal	8	0						
Other	39	0.1	Animal dung	27	0.1						
None	56	0.1	Solar	45	0.1						
			Other	20	0						
			None	97	0.2						

Table 34: Electricity Usage

Source StatsSa Census 2021

	2011 Energ	y for coo	2021 energy for cooking				
	Electric	Gas	Other	Electric	Gas	Other	
JGDM	55124	5029	37157	74104	40120	9836	
Elundini	13191	3025	21262	19822	15431	5882	
Senqu	24499	1255	12233	32669	13995	2153	
Walter Sisulu	17434	748	3662	21612	10694	1801	

For lighting, most residents use electricity whilst for cooking electricity usage is also dominant. The impact of load shedding is therefore quite severe. It is worrying that many residents still result on alternate sources such as firewood.

## b. Challenges

- Limited funding for Maintenance and upgrading of infrastructure in areas managed by the Municipality.
- Limited voltage in the rural areas does not support large scale economic growth.
- The implementation of free basic services for electrical supply
- Getting communities to accept non- grid electricity.
- Number of schools, clinics and other social facilities that don't have a regular supply of electricity (if any supply at all)
- High mast lights and street lights to decrease crime incidents at night.
- Affordability of the service especially in rural areas for 3 phase electricity
- Electricity losses 3,783,161 Kwh (Down from 5.6Mwh in previous year) due to theft, poor metering, poor networks and incorrect accounts. Total; loss 7.21%. Leakage 18 %
- Electricity backlogs in the rural areas being addressed too slowly. Eskom is licensed for these areas and therefore needs to apply for increased funding in order to eliminate the above.
- Electrification of street lights at Rhodes, Barkly East (new houses) & Rossouw. Eskom has refused permission to use their Infrastructure to fit the streetlights. Therefore, the amount to do the streetlights and construct our own Infrastructure increases.
- Eskom vs Senqu Municipality electrification boundaries.
- Solar geysers. The installation and continuation of the disrupted solar geyser installation programme.

c. Interventions

- Eskom electrification plan
- Department of Trade and Industry assisting with the promotion of renewable sources of energy
- The Technical Services Departments wishes to install a computerised asset management system which will allow it to accurately gauge the depreciation of electrical and road infrastructure and equipment. This will assist in improving budgeting planning for the Department.
- The Municipality makes an annual provision for maintenance with tenders for material and KWHMeter replacement
- Solar plant for the Municipal buildings in Lady Grey
- By law on electricity

### d. Renewable Energy

In general, however the Municipality and ESKOM must increase efforts to make the community more conscious and aware of the benefits of renewable energy. Solar is not popular due to the high theft of solar panels but wind turbines could be used provided that the turbines are designed to withstand the high wind speeds and hail encountered in the area. The Municipality has investigated photovoltaic but is unable to meet the type of demand and supplies only a couple of lights. The expense to the long-term benefit is not worth the cost. In general, due to the low demand for electricity in the area, it is not financially feasible to have green energy sources contributing to the grid.

## 29. Environmental Legislation and EIA's

The Municipality strives to adhere to all environmental legislation and conducts EIA's where necessary and prescribed by law to ensure sustainable service delivery. EIAs are budgeted for in all project plans where necessary. For the forthcoming year, EIAs are required for the following:

PROJECT NAME	EIA REGULATIONS WHICH MAY BE TRIGGERED	LISTED ACTIVITY
Access roads	LN 1 Activity 24	This project needs Environmental Authorization if it fits the following description. The development of- (ii) a road with a reserve wider than 13,5 meters, or where no reserve exists where the road is wider than 8 metres; but excluding-(b) roads where the entire road falls within an urban area.
Cemeteries	LN 1 Activity 23	This project needs Environmental Authorization if it fits the following description. The development of cemeteries of 2500 square metres or more in size.
Bridge	LN 1 Activity 12	This project needs Environmental Authorization if it fits the following description. The development of-(iii) bridges exceeding 100 square metres in size;(vi) bulk storm water outlet structures exceeding 100 square metres in size;(xii) infrastructure or structures with a physical footprint of 100 square metres or more;
Community halls		It will depend on size and location of hall
Sport fields		The municipality must consult DEA and DEDEAT for advice since the footprint of the activity is less than 5 hectares
Solid waste sites		License needed

### **30. Disaster Management**

The Municipality has adopted a corporate disaster management plan in 2005, a draft disaster framework in May 2018 and a draft plan. The process has been stopped and the Municipality is currently accessing at its role and function in disaster management. It will then develop a plan which will address this function as part of its greater risk management structure. The Director of Community Services has been placed to undertake and head this process.

The District Municipality is participating in the planning structures for the high-risk development. Emergency procurement procedures are in place guided by MFMA and SCM guidelines. It is contained in the SCM policy which is amended regularly. Plans are in place to address spillages on the roads: Razzmatazz is always available to clean the road, as for veldt fires control burning is done to arears with high risk and response is good.

The District Municipality has a chief fire officer. The District municipality has 6 personnel.

- Manager
- Admin officer
- Four satellite officers (one in Senqu, one in Elundini and two in Walter Sisulu)

It has entered into Mutual Assistance Agreement with Alfred Nzo, Chris Hani district municipalities in the Province and Pixley Ka Seme District Municipality in the Northern Cape.

The District Municipality provides fire services as per their powers and functions. This is not a local municipal function. The municipality does not have a fire hydrant policy in place as fire hydrants belong to the district municipality. JGDM has adopted bylaws relating to fire services.

## 31. ISD & Capacity to deliver

The Municipality has an ISD Unit with one Officer. The Unit is located within Technical Services. The work of the Officer is to ensure that project steering committees are functional for all projects undertaken by the municipality and that the Ward Councillor and Community are kept informed of all project progress. In addition, all community complaints are resolved by the Officer.

The Technical Services Unit houses the PMU which consists of a Manager, Technician and Administrator. The section does not have enough personnel but this is being addressed by engaging a panel of experts with the required skills to assist.

The electrical section is run by a superintendent and the roads section by a Manager. The main problems in the electricity department are the sufficient resources to attract the necessary expertise. In order to prevent a loss of skills the department is training electricians in house. In the roads section,

the main problems apart from aging and deteriorating equipment like graders are the budget to maintain access roads as well as attract the necessary skills like grader operators.

## 32. Free Basic Service Provision

The indigent register is updated annually through CART system. A Free Basic Services Committee is in the process of being resurrected with the help of COGTA. This is a political committee and assists the administration in updating information. It was established in January 2019. Water and sanitation are a district function and they provide all indigent households with 6 kl water free a month and sanitation. For households with no access to electricity they are supplied 10 litres of paraffin and 6 candles per month.

1 5 8		8			
	2020/21	2021/22	2022/23	2023/2024	2024/2025
Free Basic Services; Electricity	8 275 181	12 205 413	11 538 261	17 450 000	21 395 461
Free Basic Services; Refuse	4 736 831	6 611 041	13 248 205	5 736 000	6 023 409

The Municipality budgeted the following for FBS:

The FBS unit functions are currently performed by the Debtors Officer and one Co-ordinator. It does require more resources.

## 33. Integration Plans

The One Plan has ensured that there is integration of services between the District Municipality and Senqu Municipality. It has been recently adopted by the JGDM Council and is in the process of being adopted by Senqu Municipality.

The ISDM or integrated Service Delivery Model is the delivery model created by COGTA for the implementation of the ward rooms. Senqu Municipality implements these models and is working on improving the efficiency of the war rooms so that the public has a direct role in indicating their service delivery priorities and can assist with the monitoring of these services. The model also allows for the interaction and combining of services and resources between the Municipality and sector departments.

# **CHAPTER FIVE: INSTITUTIONAL**

### **1. Political Structure**

Senqu Municipality was established in terms of the Provincial Gazette Extraordinary, 28 February, Notice 22 of 2000 (with a number of subsequent amendments). Senqu Municipality is a Category B Municipality. Senqu Municipality was established to be a Collective Executive System type (MSA 117 of 1998)".

Council currently consists of 34 Councillors of which 17 are Ward Councillors and 17 are Proportional Elective Councillors. 2 Traditional Authorities form part of the Council. They are represented by Chief Bebeza and Chief Thukani.

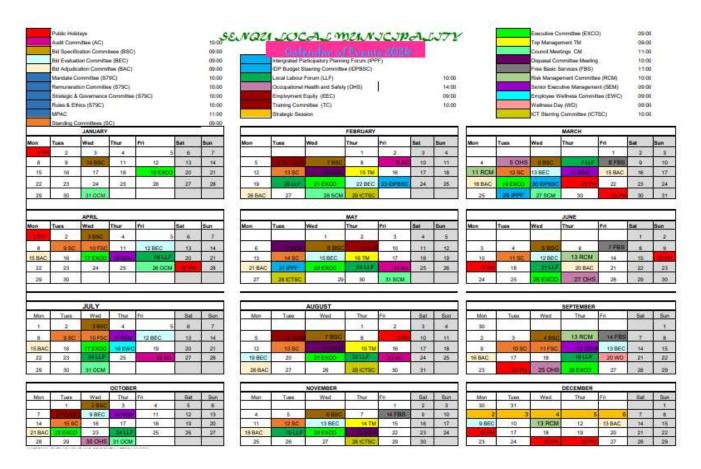

An annual Council calendar is developed according to the calendar year and adopted either in the preceding November or December. Council is responsible for taking political decisions in relation to service delivery issues and playing an oversight role. Ordinary Council meetings occur once per quarter.

Special Council meetings are only convened whenever there is an urgent issue that needs to be discussed and a decision taken. Council meetings were and are convened as per the calendars below

						S 1	ENSU	LOC	AL B	LUN	ICI	PA	LIT	<b>1 1 1</b>

#### Council Calendar 2023

## Council Calendar 2024

A Council and Executive Committee resolution register has been developed and is tracked on a quarterly basis.

### **Executive Committee**

It is constituted by the Mayor of the municipality as the Chairperson, Political Heads of the Standing Committees of various departments in the municipality and the top management of the municipality. The Mayor as the Chairperson convenes the meetings of the Executive Committee every month. These are held a week after the Standing Committees have met and made their recommendations to the Executive Committee. The Committee meets monthly apart from December.

### **Standing Committees**

The purpose of Standing Committees is to discuss and recommend certain actions be implemented by the Executive Committee or Council. Standing Committees are as follows:

• Corporate and Support Services Standing Committee headed by Cllr Mfisa

- Development & Town Planning Services Standing Committee headed by Cllr Mbonjwa
- Technical Services Standing Committee headed by Cllr Ndakisa
- Finance Standing Committee headed by Cllr Ngendane
- Community Services Standing Committee Cllr Ngendane

Council Committees are functional and effective and convene on a quarterly basis apart from Standing Committees which convene monthly.

These Standing Committees are chaired by the Portfolio Councillors who form part of the Executive Committee. The other members of the Standing Committees are Councillors elected by the Council. There are 5 Councillors in each standing committee including the Chairperson except in finance. Standing committees are representative of all political parties, Traditional Leaders and the administration of the department concerned. Standing Committees meet on a monthly basis except in January and December.

Section 79 Council Committees

- MPAC headed by Cllr Mpiti Gxelesha meets quarterly
- Rules and ethics headed by Cllr January meets quarterly
- Mandate headed by Cllr Nyongwana meets quarterly
- Strategic and Governance headed by Cllr Nonjola meets quarterly

Power & Function	Senqu's Capacity	Responsible Department
Air Pollution	The Municipality has no financial resources to develop an air quality plan or engage specific staff for the function	Community Services
Building Regulation	The Municipality has engaged a building inspector but currently has limited resources to engage personnel and ensure implementation of by laws	Economic Development & Planning
Child care facilities	The Municipality is in the process of ensuring that current facilities meet minimum health and safety requirements. However, finances are limited.	Community Services
Electricity and gas reticulation	The Municipality only has the licence to supply electricity within its urban areas. The rural areas are supplied by ESKOM. However, the Municipality is negotiating with NERSA to expand its licence to the rural areas.	Public Works
Firefighting Services	JGDM Municipal Function	Not applicable
Local Tourism	The Municipality promotes local tourism in the region and assists the activities of local tourism organization	Economic Development and planning
Municipal Airports	The Municipality has no designated airports.	Not applicable

### 2. Powers and Functions

Power & Function	Senqu's Capacity	Responsible Department	
Municipal Planning	The Municipality has an IDP which is reviewed annually. The SDF is developed for 5 years and amended where necessary. All land management will be enforced as per SPLUMA regulations	Municipal Managers Office & Economic Development and Planning	
Municipal Health Services	The Municipality only controls waste management as the District Municipality is responsible for food control, water quality, chemical safety, communicable disease control, vector control, environmental pollution control, disposal of the dead and control premises. This is because the District Municipality has the capacity as these areas form part of the Environmental Health Practitioners scope of work. The Municipality may only license a food premise after the district provides a permit indicating that the premise meets the standards required	Community Services	
Municipal Public Transport	The Municipality does not have this function as it does not operate any public transport and the District Municipality has the power to regulate passenger transport services. The Municipality has a roads forum which is currently not functional and makes recommendations on operating licences to the Department of Transport.	Public Works	
Pontoons, ferries, jetties, piers and harbours	The Municipality is not on the coast		
Stormwater management systems in built up areas	The Municipality has the power and function but has inadequate funding to develop a stormwater plan and bring all infrastructure up to standards required by climate change.	Public Works	
Trading regulations	The Municipality fulfils this function through various by laws	Community Services	
Potable water and sanitation services	The Joe Gqabi District Municipality fulfils the role of both WSA and WSP		
Beaches and amusement facilities	The Municipality has no beaches but maintains its public spaces	Community Services	
Billboards and display of advertisements in public places	The Municipality has by laws to regulate this activity but due to poor resources struggles to implement	Economic Development & Planning	
Cemeteries, funeral parlours and crematoria	The Municipality licences these premises once the District Municipality issues a certificate of compliance	Community Services	
Cleansing	The Municipality regularly cleans streets and public spaces within the urban areas as it lacks capacity and resources to do so in rural areas	Community Services	
Control of public nuisances	The Municipality has by laws pertaining to this function but lacks the capacity to enforce by laws	Community Services	
Control of undertakings that sell liquor to the public	The Municipality has by laws pertaining to this function but lacks capacity to enforce by laws	Community Services	
Facilities for the accommodation, care and burial of animals	There are no pet cemeteries or kennels in the municipal area	Community Services	
Fences and fencing	The Municipality ensures that public areas are fenced and safe and has by laws around fencing of properties	Community Services	
Licensing of dogs	The Municipality does not license dogs but has by laws pertaining to the keeping of domestic pets	Community Services	

Power & Function	Senqu's Capacity	Responsible Department	
Licensing and control of undertakings that sell food to the public	The District Municipality monitors the premises and issues certificates of compliance after which the Municipality may license the premise	Community Services	
Local Amenities	The Municipality ensures that places are kept clean and mown and that community halls are functional but lacks the financial resources to ensure that all areas of scenic, natural, cultural and historical value and interest are well maintained	Community Services & Economic Development & Planning	
Local sport facilities	The Municipality maintains municipal owned sport facilities in the urban areas	Community Services	
Markets	No markets exist in the municipal area	Not applicable	
Municipal abattoir	The Municipality does not own any abattoirs and the District Municipal Health services are responsible for ensuring that abattoirs in the area maintain hygiene standards		
Municipal parks and recreation	The Municipality ensures that places are kept clean and mown.	Community Services	
Municipal roads	The Municipality does try to build and maintain municipal roads but due to decades of neglect the financial resources are insufficient to meet the demand.	Public Works	
Noise pollution	The Municipality lacks the resources to monitor noise pollution but there are by laws.	Community Services	
Pounds	The Municipality has built a pound in Lady Grey to meet licencing standards.	Community Services	
Public places	The Municipality does own commonages around the urban areas but struggles to enforce livestock management or prevent land invasion due to limited human and financial resources	Community Services	
Refuse removal, refuse dumps and solid waste disposal	The Municipality does do refuse removal in urban areas but due to financial and human resource constraints fails to adhere to all waste management site regulations. However new waste sites are being constructed.	Community Services	
Street trading	The Municipality has by laws pertaining to the function but has limited capacity to enforce the by laws	Community Services	
Street lighting	The Municipality provides street lighting in urban areas.	Public Works	
Traffic and parking	The Municipality has limited capacity to control traffic within its area but does provide a driver's licence testing facility	Community Services	

## 3. Administrative Structure and Location

The Municipality has offices in the following towns with the main office located in Lady Grey. This office houses, both the seat of the administrative and political arm of the organisation. Communication between offices is facilitated by an interconnected phone network. External Offices are managed by Supervisors.

Lady Grey	Barkly East	Sterkspruit	Rossouw	Rhodes
<u>Main building</u> Mayors & SpeakersOffice Council Chamber Corporate Services Finance	<u>Main building</u> Finance <u>Traffic Building</u> Traffic Department	<u>Main office</u> building Finance & e-Natis <u>Bunga hall offices</u> Councillors Office	Community Hall Community services	<u>1 office</u> Community Services

DTPS Building Economic Development &	Library Library Services	Workshop Community Services	
Planning Community Services Public Works	Workshop & Pound Community Services	MPCC Supervisor Office	
<u>Tourism Office</u> Tourism LED	Workshop & Pound Community Services Public Works		
<u>Library</u> Library Services			
<u>Workshop</u> Public Works			

The current office accommodation is sufficient as all staff are housed adequately. Payment facilities for municipal services are rendered at the Main municipal building based in Lady Grey, main municipal building in Barkly East and at the Offices in Sterkspruit.

Senqu Municipality implements its Integrated Development Plan through its administration structures headedby the Municipal Manager with the following Directorates:

- Municipal Manager's Office responsible for strategic support (administration), political executive support, project management, research governance, compliance – risk management, institutional performance, integrated development planning and internal audit
- Directorate: Financial Services is responsible for budget and treasury, revenue services, stores and expenditure management, supply chain management, policies, procedures and by-laws (MFMA and National Treasury), financial support to all Departments and eNatis liscencing.
- Directorate: Corporate Services is responsible for administration, document management, HR and labour relations, capacity building, Council support and ward support, IGR, special programmes (HIV Aids youth, disabled, elderly and women), corporate facilities management, stakeholder relations – participation, by-laws facilitation, customer care/presidential hotline, legal services, communication, information communication technology, fleet management and individual performance management.
- Directorate: Community Services is responsible for waste management and refuse, communitybased by-laws, public safety services – law enforcement, community based service provision, cemeteries, environmental management, traffic, cleansing, disaster management assistance, community facilities, library services and amenities, and commonage management
- Directorate: Public Works is responsible for technical service delivery, electricity in urban areas, infrastructure development (maintenance and minor construction, Accessor Roads

(Maintenance and Minor Roads Construction), Stormwater management and PMU Project Management /Administration including ISD.

 Directorate: Economic Development & Planning is responsible for investment property management, GIS, building control, town planning, housing, land use management and local economic development including tourism.

The administration is headed by the Municipal Manager, Mr Thembinkosi Mawonga. The CFO is Mr Kenneth Fourie. Other top management posts, consist of four Section 56 Managers who report directly to the Municipal Manager.

All S 56 Managers had signed their annual Performance Agreements aligned to the IDP, budget and SDBIP. This will be done again in July 2024 for the new financial year.

### 4. Organisational Structure

The organogram for the Municipality has been reviewed and adopted on 15 May 2024. This was in response to September 2021, COGTA's promulgated Municipal Staff Regulations which in Chapter two prescribe how staff establishments should be designed and developed. SALGA conducted a diagnosis of the current structure and found that it was not compliant with the Municipal Staff Regulations on many fronts. The areas of non-compliance range from provision of support to the offices of the political bearers, the core to support rations, number of Directorates, the structural shape, structural layers, and the span of control.

The planned phased in approach be as follows; Phase 1: Diagnostic exercise and addressing noncompliance Phase 2: Establishing Organisational Requirements Phase 3: Design and Pilot Municipal Staff Establishment Phase 4: Job Evaluation and costing Phase 5: Implementation of Placement .Phase 1 and 2 are complete. Phases three to five will be completed by 30 June 2024.

All posts have been provisionally evaluated according to TASK through a benchmarking exercise. The Municipality has taken this process forward by evaluating all posts through the SALGA structures and results for four Directorates are ready for adoption and publication. The interim results for Public Works and the Finance Job Descriptions are yet to be undertaken through the same process as mentioned previously.

DESIGNATION	DEPARTMENT	CONTRACT PERIOD
Municipal Manager	MM'S OFFICE	5 years
CFO	Finance	Permanent
Director Corporate Affairs	Corporate Services	5 years
Director Public Works	Technical Services	5 years
Director Community Services	Community Services	5 years
Director Economic Development and Planning	DTPS	5 years

#### Table 35: Contract Workers

Department	Total
Municipal Manager	17
Political Office under MM	10
Corporate Services	48
Finance	39
Community Services	146
Economic Development & Planning	26
Public Works	68
TOTAL	354

The funded and unfunded posts have still to be determined. The Municipality has 292 staff members.

#### 5. Employment Equity

The Employment Equity Plan of the Municipality was approved in 2022. It is implemented through the recruitment and selection process and through training and development. Implementation is monitored by the Employment Equity Committee, Training committee and Labour Forum. The objectives of the plan are to increase the number of people with disabilities, increase training for staff, increase the number of learnerships and internships.

The Employment Equity Forum consists of Portfolio Head: Corporate Services, Top Management Representative: Director – Corporate Services, Manager HR, LR and Legal Services, Senior Management Representative: Executive Co-coordinator: Political Affairs, Technical Support Staff: HR Practitioner, Training and Development : Skills Development Facilitator ,Secretary, Designated groups Representative, People with Disability : Representative, Professionally Qualified and experienced specialist Mid Management Representative, Skilled Technical and Academically Qualified workers Representative, Semi – Skilled and Discretionary decision making, Unskilled and defined decision making Representative and 1 representative from each labour Union. Employment Equity Committee meets once a quarter. Meetings in 2024 were held on 24 January 2024.

The Local labour forum sits monthly. The Local Labour Forum is fully functional. It consists of 5 representatives of the labour unions, Director Corp Services, Manager HR, LR & Legal Services, Portfolio Head of Corp Services, 2 Employer Representatives and the Secretary. In 2024, it sat on 12 January.

The OHS Committee sits quarterly. It consists of a representative from each town and from the Unions and service departments like electricity, roads and waste management and is headed by Corporate Services. It deals with issues of health and safety. All staff are issued with the necessary tools and protective clothing. Monthly inspections are done of the tools and vehicles to ensure that they are safe. The PMU Unit ensures that all appropriate OHS is done on their project sites. Any issues are forwarded to the Corporate Services Standing committee and top management for resolution.

A resolution register is compiled at OHS Committee meetings and the implementation of these are tracked. 90 % of these resolutions have been completed. As a result of the committee's work, change rooms with showers have been built in Barkly East and Lady Grey for general assistants of waste management. Corporate Services is responsible for ensuring that OHS issues raised by the Committee are resolved.

### **6.Skills Retention and Wellness**

The Municipality has an annual budget for EAP (Employee Assistance Programme). For 2022 it is R 511 601,60 . In 2023 it has been allocated R 487 000 and R 488,487.05 in 2024. This focuses on providing individual employees with assistance on mental health issues that they are facing as well as individual health issues such as drug and alcohol abuse.

The Municipality also has an annual wellness programme whereby they target areas of health such as diabetes and bring in practitioners. A wellness day was held on the 23<sup>rd</sup> June 2022 and one on 8 September 2023.

The municipality has a skills retention and a scarce skills retention policy but experiences difficulties attracting these types of staff and keeping them due to the rural nature of the municipality and the fact that it can't offercompetitive salaries. The scarce skills policy was approved by Council by the end of June 2013. The Scarce Skills Committee identifies the scarce and critical skills annually. Skills required for the Municipality are technical skills for engineering, ICT and electricity as well as qualified driver operators.

### 7. HR Strategy & WSP

The Municipality has developed an HR strategy which was adopted on 29 May 2020. From the strategy, an annual HR plan is developed and adopted by Top Management. The HR strategy has 8 priority areas which are:

- Workforce planning and personnel administration whereby personnel administration attends to the administration of all employees' contracts, benefits and conditions of service as well as all administration and procedures incidental to employee appointments and terminations. Management and HR have been engaged with a comprehensive process of reviewing and developing employment contracts of all employees.
- Employee wellness. As Senqu Municipality, through our employee wellness pillar we aim to promote healthy, resilient and productive workforce and to reduce levels of absenteeism through targeted programmes.
- Occupational health and safety. The Occupational Health and safety function are primarily focused on:
  - Creating and maintaining a safe working environment and
  - Preventing workplace accident.

A major obstacle in achieving these objectives is the absence of an integrated Occupational Health and Safety Plan that will act as the guiding principle for all OHS interventions. This is in the process of being addressed.

- Capacity development. This will ensure that all employees and Councillors receive relevant skills development required in line with their Personal Development Plans for which the requisite funding shall be provided. Appropriate learning organisation, knowledge management and innovation strategies will be applied to facilitate the necessary learning/skills acquisition and application in the workplace; and that employees be equipped with a level of skill and competency necessary to excel in fulfilling the purpose, objectives or requirements of function/job roles, also to address the shortage of skills brought about by the legacy of apartheid, further to unlock the inherent potential of all employees for their good and that of the Municipality, and their customers/broader Communities.
- Recruitment & selection.
- Where possible commit to filling vacant non-entry-level positions internally in line with Employment Equity and Organisational Talent Requirement Objectives and Targets. Every endeavour will bemade to identify and develop the potential of existing employees to enable them to progress through their respective Career Paths and Organisational Hierarchies. Recruitment and Selection Processes will be conducted in a fair and transparent manner based on predefined Specifications, Criteria and Competency Requirements for the required Role/Position.

- Goal To ensure the timeous holistic provision and placement of competent and skilled employees within Organisational Functional Units and roles/positions, in terms of predefined and planned for or incidental needs in line with Succession and/or Strategic Manpower Plans and Equity Targets dictated by Employment Equity Plans; and
- Appropriate Talent Management Strategies and Processes (Engagement and Retention Strategies, etc.) will be applied to develop and maintain a sustainable and effective talent pipeline. All recruitment, selection and appointments will follow the Municipality's formal and approved Recruitment and Selection (Talent Acquisition) Policies and Procedures (or equivalents).
- The ability of the municipality to retain competent staff is closely linked to, amongst others, staffmorale, motivation, job satisfaction and the organizational culture. Consistent monitoring of these factors will inform interventions to be addressed through employee wellness and employment equitystrategies.
- Culture and mindset change. As an employer designated in terms of the Employment Equity Act (Act 55 of 1998), Senqu Municipality is under a legal obligation, in terms of section 20(1) of the Act to develop an Employment Equity Plan for a period not less than a year but not more than five years. Employment Equity Plan 2022/2027 has been adopted by the Council in 2022.
- Labour relations. Constructive Workplace Relationships contribute to the achievement of common goals such as safety, efficiency and productivity, quality customer service, job satisfaction and career opportunities. A constructive approach will help to minimise industrial disputation and promote innovative issue resolution. Participative negotiation can provide a climate for facilitating resolution and delivering balanced results.
- Organisational design & transformation.
  - Ensure fair and objective Policies and Procedures based on generally accepted and applicable Organisational Development Principles and Processes. Organisational Restructuring and/or Transformation.
  - The Municipality in the interest of social stability and justice, will make every endeavour to ensure continued employment of employees during Organisational and Functional Reorganisation and Redesign by accommodating them (displaced employees) in reasonable alternative positions when available and possible. This will be subject to the approved Placement Principles.
  - Goal To adopt a Transformation Management Policy Framework and related Systems and Functions that will institutionalise the necessary Organisational Development Transformation Management Culture and Organisational Capacity; and
  - To pro-actively and effectively lead and guide, with the commitment of the Senqu Municipality 's Leadership, Management, Stakeholders and employees, Organised Labour, any Organisational andTechnological Transformation required to deliver on the Council's Vision.

Implementation of the WSP means an annual compilation of the organisation's prioritised training needs based on the IDP. This is done by the SDF. The goals of the annually adopted WSP are to capacitate staff members by implementing training interventions based on identified needs and to comply with the skills development act. This is done by budgeting for training and reclaiming funds from the relevant SETA.

In order for training to occur the Training Committee makes recommendations to the necessary structure to approve the following:

- Bursaries for unemployed The Committee makes recommendations for the Municipal Manager to approve. For staff training programmes and bursaries, the approval is done Director Corporate Services. After the implementation of trainings programmes, the SDF compiles a report for the training committee members for notification
- Internships are pre-approved by Director Corporate Services and approved by Municipal Manager
- Trainees get selected through the normal recruitment and selection processes of the Municipality

A training policy and study bursary policy have been adopted by Council and the aim is to develop the knowledge, skills and attitudes of all municipal employees, set out the roles and responsibilities of those involved in training and lastly to assist financially disadvantaged employees to finance their own training and development. Ultimately this will ensure the optimum utilization of human resources at all levels of the organisation and contribute to the personal aspirations of the individual.

HR policies consist of the recruitment and selection policy, the leave policy, bursary policy, remuneration policy, promotions and transfer policy, travel and subsistence policy, standby and overtime policy, relieving allowancepolicy.

Annually a skills audit is done and a WSP developed and adopted by Council. A training committee also assists in prioritising training. However due to lack of financial resources, the WSP is seldom completed on an annual basis. The planned budget for 2022/23 is R 1 949 169 for the employed and R 1 288 000 for the unemployed. The budget for 2023/24 was R 2 506 850 for employed and R 2 269 875 for the unemployed. 123 people were trained in 2022/2023 and 10 unemployed people were trained.

All training programmes that are being implemented for Staff and Councillors are linked to the IDP objectives and they are aligned with staff functions. As a result, they can perform their

duties in a more effective and efficient manner. The table below indicates the planned training for 2024/25.

LGSETA Strategic Focus Area	Municipal Key Performance Area	Main IDP Priority Linked to Key Performance Area	Female - Employed	Male - Employed	Total	Female - Unemployed	Male - Unemployed	Total
Enhancing Good Governance, Leadership and Management Capabilities	Good Governance and the linking of democracy	Promote a culture of Good Governance	18	8	26	93	72	165
Promoting Sound Financial Management & Financial Vlability	Municipal Financial Viability and Management	Implement appropriate Financial Management systems to ensure the continued growth and viability of the Municipality	7	7	14	0	0	0
Enhancing Infrastructure and Service Delivery	Basic Service Delivery and Infrastructure Development	Develop and maintain appropriate and economically run infrastructure.	10	72	82	0	0	0
Enhancing Municipal Planning	Municipal Transformation and Institutional Development	Promote a culture of performance excellence.	12	5	17	0	0	0
Promoting Spatial Transformation and Inclusion	Sustainable Local Economic Development	Promote a conducive environment to stimulate economic development.	0	0	0	0	0	0
Totais			47	92	139	93	72	165

## 8. Internal Control Procedures

All Councillors and Administrative Staff were provided with copies of the code of conduct and were also workshopped on the Code. If the Code of Conduct is not adhered to be either staff or Councillors, disciplinary action is being instituted. Cases of a disciplinary nature were dealt with in the past year as per the Labour Relations Act. Most disciplinary cases deal with cases of absenteeism, drunk on duty and late coming.

## 9. Record Keeping & Information Technology

The Council has approved the Records Management Policy, Central Registry Manual and Access to Information Manual during its Council Meeting held on the 27 March 2013 which regulates the access to information. Furthermore, with the assistance of the Provincial Archivist from Department of Sports, Recreation, Arts and Culture training was conducted on the 12 June 2013 to the municipality's employees on the following aspects:

- Archival legislation and the role of Provincial Archives and Records Services
- \* Roles and responsibilities of users in File Plan implementation
- Importance of good record keeping practices
- Identification and care of different categories of records
- Allocation of reference numbers in correspondences
- Records maintenance
- Understanding the logic of the file plan

The Municipality has recently engaged a service provider to keep expired files off site to ensure the safety of municipal records. The Municipality is procuring a digital system of record keeping.

The IT Manager ensures that the ICT Policy is followed and that all staff members sign the policy acknowledging their role in keeping the municipal ICT system safe from intruders. The disaster recovery plan is being implemented with servers off site and constant upgrading of fire walls and antiviruses. However, the Municipality does suffer with loadshedding and power surges crashing switches and servers. To counteract this, power surge protectors and a solar system backup is in the process of being installed. The biggest challenge and risk to ICT security is the procuring of licences and software which must be done through a third party due to supply chain legislation.

ICT has many policies as are detailed below:

ICT Corporate Governance Framework adopted in 2017 that includes:

- ICT Governance Charter
- ICT Strategy
- ICT Internal Audit Plan
- ICT Disaster recovery Plan
- ICT Management Policy
- Municipal Corporate Governance of ICT (MCGICT) Policy
- ICT Data Backup and Retention Policy
- ICT Operating Systems Security Policy
- ICT Project and Portfolio Management Policy
- ICT Risk Management Policy
- ICT Security Controls Policy
- ICT SLA Management Policy
- IT User Access Management Policy
- ICT Corporate Governance Framework

### Other Policies

• ICT Bring your own device (BYOD) Policy (adopted 2018)

ICT Security Policies (adopted 2017) includes the following policies: Change Management

- Patch Management
- Privacy
- Network Access
- Server Hardening
- Account Management

- Administrative & Special Access
- Physical Security
- Security Training
- Portable Computing
- Password
- Acceptable Use
- Virus Protection
- Vendor Access
- Network Configuration
- o Electronic Mail
- Software Licensing

The disaster recovery plan is being implemented. The plan provides for the recovery of those systems which support critical business functions and processes. These have been identified during a business impact analysis stage and business impact analysis report. The plan provides a structure and an action plan to be used in the timely recovery of the Municipality's critical applications' processing environment. The objective of the Plan is to recover the critical applications' processing environment within 48 hours following a disaster.

The offsite Cloud Server has a communication link to the SENQU frame relay network. Back-up media drives are created and stored off-site at a secure site specified by the Senqu Municipality. In a disaster scenario, the Disaster Operations Teams relocates to a temporary Command Center to organise the recovery effort, and the other Teams relocate to the recovery site, where a communication link is established from recovery site to the SENQU frame relay network. Links are also established from recovery site to the business partner locations. Back-up media drives should be shipped from the secure site to the recovery site, where the Recovery Teams restore the critical environment.

### **10. Protest Actions and petition management**

No staff protest actions were held in the previous and current financial year. No community protest actions were held in the previous and current financial year. Mitigating measures are as follows:

- There is a Strike Management Committee (which sits only when there is a protest action)- comprised of Corp Services Director/MM, LR & HR Practitioner, 1 Cllr & organised labour representative.
- There is an Essential Services Agreement
- Provisions prescribed in the LRA, Act 66 of 1995 (ss64-77) are/ will be followed

### 11. Legal Services

The Manager HR and Legal Services maintains a litigation register that is constantly updated. A quarterly report is sent to COGTA. A panel of legal services has been engaged to deal with the cases that arise. Most legal cases are around illegal land occupation, illegal erection of structures and defending the Municipality in tender awards that are being contested.

### **12. Institutional Cohesion**

The Municipality runs wellness days to promote institutional cohesion. A netball and soccer team have been developed to play at the SALGA games as well as play against other sector departments and municipalities. In addition, the induction programme is also tailored to make employees feel part of the institution and promote institutional cohesion. Internal newsletters also help promote institutional cohesion. The Directorate Corporate Services has completed a survey to gauge employee's satisfaction which reflects dissatisfaction with employee working conditions. A plan has been developed to target the areas of dissatisfaction identified.

# CHAPTER SIX: GOOD GOVERNANCE & PUBLIC PARTICIPATION

## **1.IDP Process Plan**

Senqu Local Municipality has developed the IDP and Budget in accordance with the requirements as set out in the Local Government: Municipal Systems Act (MSA) 32 of 2000, the Local Government: Municipal Planning and Performance Management Regulations 2001 and the Municipal Finance Management Act 56 of 2003.

## 2.Adopted Process Plan

The MFMA Act 53 of 2003 (S21 1b) states that the Mayor must at least 10 months before the start of the budget year table in the Municipal Council a time schedule outlining key deadlines for the preparation, tabling and approval of the Budget and the Integrated Development Plan. The process plan was adopted on 28 July 2023. The Process Plan outlines the programme to be followed and provides details on issues specified in the Act.

The Local Government: Municipal Structures Act 117 of 1998, Municipal Systems Act 32 of 2000 and Municipal Finance Management Act 56 of 2003 are specific to municipalities and are the key legislation for the development of the IDP. Other national sector legislations also contain various kinds of requirements formunicipalities to undertake planning.

Some important National and Provincial guiding plans and policy documents for the IDP include the Medium-term Strategic Framework, the National Spatial Development Perspective(NSDP), the National Development Plan, the new Growth Path, the Eastern Cape Provincial Spatial Development Plan (ECPSDP), the Eastern Cape Provincial Growth and Development Plan (ECPGDP) and the Ukhahlamba (now Joe Gqabi) District Growth and Development Summit (GDS).

### 3. IDP Process

The IDP Process is a continuous cycle of planning, implementation and evaluation. Institutional arrangements and roles and responsibilities The development of the IDP and Budget involves Municipal Officials, Councillors as well as stakeholders/actors outside the Municipality.

Institution	Role & responsibility
	Approves, adopts the IDP and budget
Council	Participates in M&E
	Decides on the Process Plan.
Executive Committee	Manages, co-ordinates and monitors the process and drafts theID
	and budget
	Drafting and co-ordination of the IDP process on a day to daybas
IDP Manager	
IDP and Budget Steering Committee	Provides technical expertise for the drafting of the IDP andbudget
	Provide community needs and priorities and indigenous knowledg
IDP Representative Forum (IPPF)	Act as a M&E mechanism

#### Other actors

ACTORS	ROLES AND RESPONSIBILITIES
Ward Councillors/Ward Committee (assisted by CDWs)	<ul> <li>Major link between municipality and residents</li> <li>Link the planning process to their wards or constituencies</li> <li>Organize public consultation and participation</li> <li>Represent the ward at the IDP &amp; Budget Representative Forum</li> <li>Analyse ward-based issues, determine priorities, negotiate and reach consensus.</li> </ul>
Community	<ul> <li>Represents interests, contribute knowledge and ideas to the Representative Forum</li> <li>Inform interest groups, communities and organizations</li> <li>Analyse issues, determine priorities, negotiate and reach consensus</li> <li>Participate in designing project proposals</li> <li>Discuss and comment on the draft IDP</li> <li>Monitor performance in implementation</li> <li>Conduct meetings with groups, communities, etc. to prepare for and follow-up on relevant planning activities.</li> </ul>

## 4. Mechanisms for community and stakeholder participation

One of the main features about IDP and Budget Processes is the involvement of community and stakeholderorganizations in the process. This is done though the:

- IDP Representative & Public Participation Forum known as the IPPF to verify and add data
- District Municipality's Rep Forum to ensure that local priorities are adequately reflected on the District's IDP
- Ward Councillors and ward meetings to keep communities informed about the IDP progress (including Ward Committees and CDWs)
- Annual reports on municipal progress

- Mayoral outreaches
- Making the IDP document available to all units and in public places for public comments
- Municipal website.
- Radio broadcasts
- Local newspaper advertorials
- Municipal newsletters

English is used as a language of governance however in community meetings languages that are spoken in that community are used. Officials are responsible for arranging venues and transport for all wards to all meetings. Transport is arranged for Traditional Leaders, Designated Groups and Ward Committees at the cost of the municipality.

## 5. Mechanisms and procedures for alignment

The IDP Manager (Municipal Manager) and the Manager IPED of Senqu Municipality are responsible for ensuring smooth co-ordination of the IDP process and its alignment with the District's IDP through bilateral discussions with affected sector departments and neighbouring Municipalities as well as IDP representative Forums. Inter-Governmental Forums such as the Joe Gqabi District IDP Representative Forum are also used to ensure that beneficial alignment of programmes and projects do occur.

	Activity	Purpose	Responsibility	Time frame	Progress
1.	Integrated Participatory Planning Forum	To discuss IDP Review process	Manager IPED Manager IGR	27 June 2023	27 June 2023
2.	IDP and Budget Steering Committee	To ensure that management and political leadership agrees on the draft IDP and budget timeframes	Manager IPED BTO	14 July 2023	14 July 2023
3.	Present draft IDP Process Plan to Council for adoption	Guide development of 2024-2025 IDP Review	Mayor	28 July 2023	Done
4.	Adopt Process Plan	To guide the planning, drafting, adoption of the IDP and budget Establish committees and consultation forums for the IDP and Budget process	Council	28 July 2023	Adopted by Council 28 July 2023
5.	Publish and make known Process Plan (i.e. key activities and deadlines)	Inform public of the process to be followed in developing the IDP	Manager IPED BTO	10 August 2023	10 August 2023

Table 38: Detailed IDP and b	oudget ac	tion plan
------------------------------	-----------	-----------

	Activity	Purpose	Responsibility	Time frame	Progress
6.	Public engagement and consultation	Consult local communities on their raised development needs and priorities. This will be done on a ward by ward basis with the ward committees and Councillors	Managers IPED & IGR Public Participation Ward Councillors	28 August – 2 October 2023	Done
7.	Integrated Participatory Planning Forum	Finalise issues raised in the outreach with Communities	Manager IPED Manager IGR	24 October 2023	Postponed
8.	Departmental Strategic sessions	Departments meet and revise 5-year priorities, targets and programmes based on NDP and community needs where necessary	HOD's	30 October – 3 November 2023	Done
9.	Municipal Strategic Session	Municipal Top Management and Ex-Co meet to review municipal objectives, strategies, objectives, targets and budget proposals.	DTPS & OMM	4- 8 December 2023	Done 4-7 December 2023
10	IDP & Budget SC	Municipal Top Management and Mayor meet to finalise strategic issues	Manager IPED BTO	13 December 2023	Postponed
11.	Draft Annual Report	Draft Annual Report to be completed.	OMM	16 January 2024	Done
12.	Report on mid-year and performance assessment	Evaluate performance of the municipality to guide future decisions as well as for the new financial year	Municipal Manager to report to Executive Committee	24 January 2024	Done
13.	Council	Council notes the mid year report and draft annual report	Director Corporate Services	31 January 2024	Done
14.	Advert for comments on draft Annual report and MPAC Public participation on the Oversight report	21-day comment period on annual report	Manager: Governance & Compliance	1 – 22 February 2024	Done
15.	Draft Budget departmental consultations	For draft budget and adjustment budget	MM & CFO	5-9 February 2024	Done
16.	Alignment Meeting	To meet and discuss high level SDBIP amendments	Manager IPED BTO Manager Compliance	19 & 20 February 2024	Done 20 Feb 2024
17.	IDP & Budget Steering Committee Meeting	To meet and finalise budget proposals, incorporate information from the Strategio session and adjustment budget	Manager IPED BTO	23 February 2024	Done 20 February 2023
18.	MPAC	To finalise oversight report on draft Annual report	MPAC Chairperson	27 February 2024	Done
19.	Special Council Meeting	To approve adjustment budget	Municipal Manager CFO	29 February 2024	Done
20.	Meeting with Provincial Treasury	Mid year engagement	CFO	March 2024	Done. 18 January 2024

	Activity	Purpose	Responsibility	Time frame	Progress
21.	IDP & Budget Steering Committee	Present draft IDP, budget and high level SDBIP	Manager IPED, Manager Governance and Compliance BTO	20 March 2024	Done
22.	Integrated Participatory Planning Forum	To meet and discuss draft IDP and budget	Manager IPED	26 March 2024	Done
23.	Council	Mayor presents draft IDP, Budget and high level SDBIP to Council. Mayor presents final Annual report to council	Mayor	28 March 2024	Done 27 March 2024
24.	Advert for draft IDP and Budget. Advert for final Annual report adoption	Advert for comment period to appear on website, municipal notice boards and in newspapers from 8 April to 6 May 2022. Draft IDP & Budget loaded on website	BTO Manager IPED Manager Governance & Governance	5 April 2024	Done 2 April 2024
25.	Submission of draft IDP & Budget	To submit draft IDP and Budget to DLG&TA, Prov & Nat Treasury	BTO Manager IPED	5 April 2024	Done 3 April 2024
26.	Meeting with Provincial Treasury	Benchmark engagement	CFO	19 April 2024	Held 16 April 2024
27.	Public outreach and comments	Meet communities and receive inputs and comments on the draft budget and IDP	Ward Councillors Manager IPED Manager IGR	8 April – 10 May 2024	Changed to 8-12 April
28.	Management session	To finalise priorities and programmes for inclusion in the final budget To align strategies and projects and budget with PMS targets	CFO MM	14 May 2024	Held in April 2024
29.	IDP & Budget Steering Committee	Final, IDP, budget and SDBIP	CFO Manager IPED	17 May 2024	Held 30 April 2024
30.	Integrated Participatory Planning Forum	To discuss high level SDBIP	Mayor Manager IPED	21 May 2024	Held 30 April 2024
31.	Table municipal budget and revised IDP	Consolidate plans for delivery of services and attainment of the development trajectory of the Municipality	Mayor	31 May 2024	Tabled 15 May 2024
32.	Advert of IDP and budget adoption		Manager IPED BTO	10 June 2024	Advertised 24 May 2024
33.	Final IDP to MEC and IDP summaries printed. Final Budget submitted	Submit final IDP and Budget to DLG &TA Prov & Nat Treasury. Final IDP & Budget to go on website	Manager IPED BTO	10 June 2024	Submitted 24 May 2024

	Activity	Purpose	Responsibility	Time frame	Progress
34.	SDBIP to Mayor	Mayor receives a draft of the SDBIP and annual performance agreements required by s 57(1)(b) of the MSA.	Municipal Manager Director Corporate Services	28 June 2023	
		Mayor approves SDBIP and ensures annual performances contracts are concluded in accordance with s 57(2) of the MSA			
35.	SDBIP to Council	SDBIP given to Council for approval	Mayor	28 July 2024	
36.	SDBIP made public	SDBIP made public. Put on website	Manager Compliance and Governance	7 August 2024	

# 6.IDP Assessment

The IDP Assessment highlighted some issues for the Municipality as per the MeC's assessment.

KPA 1: Spatial Planning, land, human settlements and environmental management

- The Municipality must make budgetary provisions for planned housing projects
- The Municipality must develop an Air Quality Management Plan
- The Municipality must develop a climate change response strategy
- The Municipality must develop a plan to address land degradation and revitalization
- The Municipality must develop environmental planning tools such as an environmental management framework

Senqu Municipality is in the process of appointing a service provider to develop an EMF which will provide a basis for the development of an air quality management plan and a climate change response strategy. The Municipality is in the process of developing a plan to address land degradation and revitalization, which will be completed in 2024 as part of the agricultural development plan.

KPA 2: Service delivery and Infrastructure Planning

- The Municipality must develop RRAMS
- The Municipality must develop a trade effluent policy
- The Municipality must develop an integrated community safety plan
- The Municipality must develop an SDF informed by risk assessment and disaster vulnerability reports
- The Municipality must adopt and develop disaster management bylaws

The Director Community Services has been tasked to deal with issues of disaster management and once these are completed, a chapter will be added to the adopted SDF.

The Director is also responsible for the development of the trade effluent policy and integrated community safety plan. The Municipality requires assistance from the Department to help assist with the development of a RRAMS, as the District Municipality is not currently fully utilising the programme.

KPA 3: Financial planning and budgets

- The Municipality must develop a budgeted repairs and maintenance plan
- The Municipality must open a separate bank accounts for conditional grants
- The Municipality must spend 100% of its capital budget
- The Municipality must reflect in the IDP whether it manages and reports on its conditional grants according to DORA requirements
- The Municipality must spend 100% of its grants
- The Municipality must reflect councilor renumeration and employee costs and ensure that the salary budget is within the norms and standards
- The Municipality must service its creditors as per the financial norms and standards
- The Municipality must create accurate data for billing
- The Municipality must develop mechanisms to curb water losses and illegal electricity connections
- The Municipality must allocate a budget to appoint a service provider to conduct a general valuation
- The Municipality must establish an indigent Steering Committee

The CFO will ensure that the IDP financial plan reflects on the conditional grant expenditure, billing, servicing of creditors and illegal electricity connections. The municipality is in the process of developing the repairs and maintenance plan. This plan will assist the municipality to budget adequately for the repairs and maintenance and to also ensure that the budget is implemented appropriately. Municipality is still looking into opening another account for grants as advised by Auditor General. However, the municipality has investment account in which the conditional grants are separately kept. The Municipality is not responsible for water connections. A service provider is being appointed for a general valuation.

### KPA 5: Good Governance and public Participation

The municipality must indicate any inter-municipal planning programmes in which it participates.

The municipality does not participate in any inter-municipal planning programmes apart from the DDM.

### KPA 6: Institutional Arrangements

The municipal IDP must reflect the critical and scarce skills that are a challenge.

This has been done.

#### Table 39: Previous IDP Assessment

## 7. Public Participation

### 7.1. Public Participation Framework/Strategy

There is an approved policy 2021 but its currently under review and at final draft stage. The framework/policy outlines the roles and responsibilities of all stakeholders in public participation as well as the mechanisms for undertaking public participation. These include the guidelines for public events that must be followed as well as the processes that members of the public must follow if they wish to submit grievances or complaints.

### 7.2. Challenges and intervention for public participation

• Geographical

The Municipal area consists of 17 wards with many villages. Due to the mountainous terrain and the lack of infrastructure development during the homeland period, the road network is poorly conceived and as a result, villages, which should be directly connected are normally connected through rerouting to a main road.

• Infrastructure

Due to the vastness of the terrain, it is difficult to find a central meeting spot in the ward which is accessible to all by foot and has a facility large enough to accommodate all residents. The Municipality has ensured that all wards at least have one community hall.

Education levels

It is an ongoing process to educate the community about local government so that they can participate in aneffective and efficient manner

Traditional leaders

The Municipality has made a concerted effort to ensure that traditional leaders are included in all public participation events and in Council activities but this is not happening due to their elections which have not yet occurred.

Communication

Due to the vastness of the area and mountainous terrain telecommunication networks are limited with the result that it is difficult to communicate with communities due to lack of telephone and email networks.

Financial

Although a budget is set aside for public participation under the IDP and budget vote, it is not enough as it is expensive to cater for the transport and food that is required for all these occasions. However, departments also have operational budget for their public participation occasions.

Sustainability

Many community-based organisations do not have a long-life span due to in fighting or inactivity by members

Apathy

Members of the public do not feel the need to participate in government processes due to a variety of factors.

### 7.3. Stakeholder Communication Strategy

The Municipality has a communication strategy which identifies and outlines which and how to communicate withstakeholders. It was adopted on the 27<sup>th</sup> March 2013. A new strategy was developed and adopted on 30 May 2022.

The adopted communication strategy relies on Ward Councillors, CDW's and the Executive Committee to ensure that information reaches the public. Other methods such as posters, loudhailers and the local radio station Ekepini and newspapers are used to keep the community informed. However due to financial constraints and the poor accessibility and poor network coverage of the region, some communities struggle to access information. Social media is also utilised now such as WhatsApp and Facebook.

The Communications Officer has been trained on website management so that the municipal website will be continually updated and remain relevant. Monthly newsletters are printed and distributed as well as quarterly newsletters. Outreaches on specific issue will occur on to ensure that the community are informed.

The Municipality has increased the amount of funding that it has given to the communication section. As a result of this funding the municipality has improved its public address system and bought a public loudhailer system for vehicles and Councillors. Public notice boards are located centrally in the wards and a tent.

A stakeholder register has been developed for the IPPF which is updated annually. This is attached as Annexure 3. The IPPF assists the municipality in itsefforts to increase the effectiveness and efficiency of public participation by mobilising stakeholders.

### 7.4. Ward Committees

Ward committees have been recently formed for the 17 wards in March 2022. 17 Ward Committees have been formed. All committee were established as per Ward Committee Framework. Ward Committee are fully functional. There were no major disputes that impacted the establishment. All minor concern were addressed and resolved. Meetings are held on a quarterly basis per ward and officials from the Public Participation Unit attend and take minutes at these meetings. Complaints and issues raised in the meetings are then escalated to Customer Care section where these are then further escalated to relevant Departments within the municipality or relevant sector departments and followed up by Customer Care Officials to ensure that issues are speedily resolved. The District Municipality has not contributed to the functioning of the ward committees as the Municipality has sufficient capacity.

Ward Committees are chaired by the Ward Councillors and consist of up to ten elected members. The purpose of the committees is to broaden participation in the democratic process of Council and to assist the Ward Councillor with organizing consultation, disseminating information and encouraging participation from residents in the ward. The Ward Committees gather information from the communities during the IDP process which are forwarded to the IDP and Budget Steering Committee for consideration in the budget process.

In addition, problems identified by the ward committees are forwarded to the Corporate Standing Committee for resolution by the responsible Department head. These then get elevated in this way to the Executive Committee and ultimately Council through attachments in the agenda of these meetings. Officials responsible for ward committees then feedback Council resolutions to the Ward committees through IPPF meetings. Ward committees and Councillors are also utilised to mobilise ward members for outreaches. In this way both the administration and the political arm of the Municipality are aware of issues raised by Ward committees.

The Municipality applies from LGSETA for capacitation building of ward committees . COGTA also does training on an annual basis on local government and local government processes (IDP and Budget, Complaints management and Petitions). At these sessions we also include other

sector departments to present their services to Ward Committees may stay abreast on matter relating to acquiring service delivery

The Municipality created new ward plans in January and February 2022. These were completed and then rechecked by all villages to ensure that they contained the correct information They are then updated on an annual basis. Funding has also been allocated on an annual basis to compensate ward committee members for their time but the suggested stipend amount from national treasury will not be met due to the financial constraints of the Municipality.

Ward	Villages
Ward 1	Walaza, Ndofela, Mbobo, Bikizana, Qhimirha (5)
Ward 2	Gwadana, Kwa-Gcina, Ndingishe, Storomo, St Michaels, Mzimtsha, Lower Nquthu, Upper Nquthu, Nketlana, Rooiwal, Dryhoek area, Storomo, Mdantsane, Sigini, Mzimtsha, Kwali and Telle, St Theresa, Dulciesneck (19)

Table 40: Current Wards and villages

. . .

### 7.5. Traditional Leadership

The Municipality is committed to meeting with Traditional leaders to find solutions to the problem of acquiring sufficient land for development outside town boundaries. Traditional leaders are normally represented in Council and at all standing committees. There are 6 traditional Councils in the Sengu 130

municipal area. They are the Basotho, Hlubi, Amaqwati, Batlokoa, Amavundle and Myemane traditional Councils. The Municipality is experiencing some resistance from certain Traditional Leaders but in general the relationship between the Municipality and Traditional Leaders is good. Traditional Leaders have also increased their participation in municipal planning forums such as the IPPF as well as Standing Committees and Council.

# 8. Social Cohesion

The Municipality has several social cohesion programmes. These involve door to door campaigns whereby the municipality and sector department target certain areas and run campaigns on problems being experienced in that area such as child headed households. A plan is then formulated to resolve these issues and all stakeholders state their commitment to resolving these issues.

The Municipality has resuscitated the Mayoral Cup whereby all sports codes participate in their codes and the winners receive prizes and cups. The Youth festival was also launched in March 2013 whereby the youth are encouraged to showcase their talents in song and art. These had become annual events with the latest Mayoral Cup to be held in April 2024.

The municipality participates in community policing forums in order to unite stakeholders to fight against crime. The municipality also forms part of the moral regeneration programme of the Presidency.

All of these programmes and public participation forums together assist in providing platforms whereby people can meet and discuss their differences and problems. This dialogue leads to nation building as people begin torealise that there is more that unites them than divides them.

The Municipality has IGR structures such as the IPPF whereby sector departments are engaged with in order to find solutions to service delivery issues. In addition, special meetings are arranged for departments to meet outside the IPPF. Sector departments (national and provincial) are also engaged with through Munimec and the District IGR structures such as DIMAFO. Sector departments are also contacted throughout the year to respond on community queries as well as participate in public participation programmes. In addition, engagement with provincial and national departments is facilitated through the Joe Gqabi District IGR structures such as the various committees like governance and administration which are attended by the municipality and the IDP Rep Forum.

The Municipality also participates in all SALGA structures where it can meet and discuss issues with other municipalities. These structures facilitate inter municipal planning. The Municipality is not currently engaged in any project which requires that it forges close linkages with other Municipalities. This has however happened in the past whereby the Municipality has assisted the now defunct Gariep municipality financially. In addition, the District DIMAFO structure provides a space for all Mayors and Municipal Managers to meet and discuss on issues which affect the District as a whole. Other relevant

District forums are also attended by the Municipality such as the District Support Team, and Communicators Forum. There is no formal inter-municipal planning except for water, sanitation and road infrastructure which is discussed through the Water Forum and District Roads Forum.

# 9. Other Public Participation Forums and Players

9.1. IDP Representative & Public Participation Forum (Integrated Participatory Planning Forum IPPF)

This forum meets at least four times a year to discuss progress achieved on implementation as well as to give direction around the needs and requirements of the future as contained in IDP. The forum is chaired by the Mayor and is constituted by various government departments, interested parties, organised groups, CBO's, Ward committees and NGO's. Sector department participation is poor though. These 2 meetings have now been combined with the Round table meeting to form an IPPF which meets quarterly.

9.2. Community Development Workers (CDW's) , War rooms & the Integrated service delivery model

CDW's are another resource which the Municipality utilises in order to improve public participation. They attend Ward Committee Meetings regularly and participate in Public Participation Meetings in LM. They also attend other meetings of the LM they are invited to, e.g., SPU meetings etc. They are an important method of improving municipal engagement with communities. There is 1 CDW per ward.

War rooms are another forum at ward level which will be revived to act as another IGR forum and a way to monitor municipal and sector department projects and programmes. War rooms have been established in each ward and are in the process of being revitalised as part of the implementation of the integrated service delivery model. The war room has been reshaped to incorporate IDP, Ward Aids Forum and ward stakeholder meeting in 1 session. The aim is for each quarter the meeting should take place in different ward to ensure participation is meaningful. Outcomes are also escalated to the IPPF and LAC structure for further processing

### 9.3. Economic Development Forum

This forum meets on a quarterly basis and consists of all stakeholders involved in LED. They meet to discuss issues and challenges relating to the implementation of LED and the LED Strategy. It is chaired by a PortfolioCouncillor.

9.4. Communicator's Forum

This forum meets quarterly to discuss issues pertaining to communicators in the region. It consists of local municipal communicators, GCIS and media representatives. Meetings are sometimes combined with IPPF.

## 10. Complaints, Fraud Management, Financial disclosures and Petitions

The Municipality has a Community Care Officer who mans the Presidential Hotline as well as regular liaising with Ward Councillors and Ward Committees to ensure that they are kept abreast of any developments and complaints originating in their wards. The Officer contacts the necessary department with the complaint and then monitors it to ensure that it is resolved.

The section has installed a complaints hotline which is run by interns. In addition, the section runs annual customer satisfaction surveys as well as implementing the customer charter which outlines the level of service which customers can expect from the municipality. The complaint management system is electronic. The Customer Care Officer enters the complaint into the system and assigns it to the responsible official to deal with. If the Official fails to deal with the complaint, the system after a set amount of time refers it to their superior until it eventually lands up with the Municipal Manager. The system has been implemented. Complaint boxes are also placed in all community halls and at Municipal Offices. The Municipality has an adopted customer care charter and policy which outlines how complaints should be dealt with. This is contained in Annexure 4.

The Municipality adopted its fraud prevention plan in 2018. The plan outlines what is fraud, a code of conduct for employees and Councillors, procedures for reporting fraud and lastly protection of the whistle-blowers. The plan also outlines the policies and procedures that the municipality must implement in order to prevent fraud like supply chain management. The plan is in the process of being reviewed. The Internal and External Audit as well as the Audit Committee are mandated to expose any evidence of fraud.

Most of the recommendations of the plan have been implemented and all employees are inducted about the Code of Conduct. The fact that Senqu has managed to receive an unqualified audit for 7 years indicates that the fraud prevention plan is effective. A few fraud cases have been dealt with in the past but they have been handed over to the SAPS and are now in the legal system.

All Councillors and employees which includes senior officials are required to disclose their financial interest on an annual basis. In addition, the institutional scorecard includes the annual development of Declaration of Interest Register.

Petitions are dealt with by the Speakers office with the administrative assistance from the Municipal Managers Office through the Chief of Staff. The Chief of Staff investigates the

complaints and reports back to the Speaker, after which formal communication is then send back to the petitioner. This Office also deals with issues of request for marches.

## 11. Audit & Other Committees

Audit Committee and Audit Action Plan

The Municipality does have a functional and effective Audit Committee. The Audit committee is an oversight committee of the council. The Committee fulfils its mandate using the internal audit unit.

As one of its responsibilities, the Audit Committee oversees the internal audit unit and ensure that it approves an annual and / or three-year internal audit plan to guide the operations of the internal audit unit. The Audit Committee submits its quarterly meeting dates to the council for approval and ensures that these meetings do take place. The Senqu Local Municipality (SLM) has a functional audit committee which sits on a quarterly basis.

The Chairperson of the Audit Committee reports on the performance of the internal audit unit and the audit committee at the ordinary council after every quarterly audit committee meeting in accordance with the audit committee charter. The Chairperson of the Audit Committee also prepares an audit committee report on the Auditor General's Audit Report for submission to the MPAC and for inclusion to the Annual Report.

The Committee meets to discuss the annual plan/charter of the internal audit unit. A charter was developed. The quarterly performance reports from the departments are also discussed in this committee. The Audit Committee has an audit committee charter (ACC) which was approved by the council which guides its operations and this charter is reviewed every year.

The following are the audit opinions for Senqu Municipality for the past few years from 2012/13 financial year to date.

2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	2019/2020	2020/2021	2022/23
Unqualified	Clean	Clean	Clean						

### Table 41: Audit opinions

The Municipality received a clean audit in the previous financial year although it had to adjust it's AOPO. The audit issues raised by the AG in the Management report were irregular expenditure not recovered or written off and material allowance for impairment – receivables. It develops an audit action plan on an annual basis based on the audit issued raised in the management letter & audit report. In addition, the municipality monitor and reports on the status of audit action plans on a quarterly basis to IAU for audit committee consideration.

The AG's recommendations on both the audit report and management report are populated in the audit action plan where corrective actions, start implementation date and final implementation date as well as the responsible department or section is indicated. The audit action plan is then used by the responsible individuals in order to ensure that corrective actions are being implemented immediately. The Manager of the responsible department then monitors the implementation of the audit action plan every month.

At the end of every quarter, the coordinating Manager obtains the quarterly progress made on the implementation of corrective actions and submit the status to the Accounting Officer as a monitoring tool. The internal audit unit also requests this quarterly progress on the implementation of the corrective actions from the manager in the Municipal Manager's office, conduct their reviews in order to validate the credibility of the progress which is being reported to the Accounting Officer and issue an audit report to the management and presents the report to the audit committee in line with the approved annual internal audit plan for oversight.

The internal audit unit comprises of the following individuals:

- The Chief Audit Executive (CAE);
- 1 x Internal Audit Supervisor;
- 1 x Senior Internal Auditor;
- 2 x Internal Audit Interns

The internal audit unit has an internal audit charter which is reviewed every year and approved by the audit committee as well as the risk based annual operational internal audit plan which is approved by the audit committee.

The Chief Audit Executive reports at every quarterly audit committee meeting on the implementation of the annual operational internal audit plan, reviews the plan as and when necessary and resubmit it to the audit committee for approval.

The Municipality continues to implement the OPCAR (operation clear audit report) reporting template that monitors corrective matters undertaken to the prior year audit as well as PAF (preparation audit file) which sets in place the framework for all information to be collected for the 2023/24 financial year's audit. The municipality prepares an electronic audit file under the direction of the Chief Finance Officer. The order of documentation is placed in the order of financial statements as indicated in GRAP and hyperlinked to relevant line item of the financial statements. Furthermore, the Audit Action team consisting of key role-players in the audit is to continue its work to coordinate, resolve problems and share resources to continue with the improved audit results.

The Municipality does have an adopted delegation framework and register. The framework is in the process of being reviewed and is due to be adopted by the end of June 2024.

### Section 80 Committees

The only section 80 committee in Senqu is the Executive Committee, which sits monthly comprising of the Mayor, Chief Whip and Portfolio Councillors. This is because Senqu has an Executive Committee system. The Executive Committee has 5 sub committees each headed by a Portfolio Councillor. These are Technical Services, Finance, DTPS, Community Services and Corporate Services.

### Section 79 Committees

• MPAC Committee

The MPAC Committee was set up to improve the oversight role of Council. It meets to discuss all issues related to oversight as well as develop the oversight report for Council on an annual basis. The Committee has 7 Councillors. The committee meets quarterly.

- Mandate Committee
- Remuneration Committee

- Strategic and Governance Committee
- Ethics Committee

# 12. Other Committees

### **IT Steering Committee**

This Committee consists of officials from every department and discusses issues relating to IT. This includes the purchasing of software and hardware as well as problems being experienced with the expansion or current usage of the IT system. It meets quarterly.

### Budget & IDP Steering Committee

This committee meets according to the annual IDP and budget process plan. It consists of top management officials from each department, Municipal Manager, Mayor and the Finance Portfolio Councillor. It is headed by the Finance Portfolio Councillor and discusses issues relating to the budget and IDP.

### Senior Executive Meeting

The meeting comprises of all Directors and is chaired by the Municipal Manager. It sits monthly.

### Performance Audit Committee

This Committee meets to evaluate the performance of the municipality and S 56 employees on a quarterly basis. It consists of the members of the Audit Committee. This is because the Municipality is small and does not require another committee for the purposes of performance issues only. Quarterly performance reports are submitted to Internal Audit Unit (IAU) for audit committee consideration.

### **Risk Management Committee**

There is a Risk Management Committee of which Provincial Treasury forms part. It is in the process of being revived as the municipality is expecting to appoint an RMC Chairperson before end June 2024. A risk register is compiled annually and updated quarterly. The risk compliance officer is placed in DTPS.

### Supply Chain Committees

Senqu has three committees viz the Specification, Evaluation and Adjudication Committee. The Specification Committee ensures that the specifications are correct and in line with scm legislation 137

and approves them for tender advertisements. The Evaluation Committee evaluates bids once tenders have closed and forwards their recommendations to the Adjudication Committee. The Adjudication Committee makes a recommendation to the Municipal Manager on tenders. All committees meet as per their Council approved schedule unless special meetings are required.

### **HR** Committees

HR has several committees.

- Local Labour Forum which consists of selected management, Finance and Corporate Services • PortfolioCouncillors and the labour Unions to discuss labour issues
- Training Committee to discuss the implementation and development of the WSP •
- Employment Equity Committee to discuss recruitment and selection based on EE principles •
- Placement committee which meets on an adhoc basis to discuss issues relating to the organisationalstructure
- Occupational Health and Safety Committee which discusses issues relating to the health and safety of officials and the buildings.

## **13.Special Groups**

The Municipality has an SPU Officer. Portfolio Councillors for each area have been allocated from the Executive Committee

#### HIV and AIDS

An Officer is responsible for HIV and Aids co-ordination in the municipality. An HIV and Aids Council co- ordinates HIV and Aids activities in the region. The Council has developed an HIV & Aids mainstreaming policy which has been adopted by Council 27 March 2013. HIV and AIDS ward Committees headed by Ward Councillors have been launched in every ward. Council has also adopted a HIV and AIDS strategy for the Municipality.

### Youth Council

The Youth Forum has just been reformed and a youth strategy and plan developed for the coming years. A ward youth committee has been launched for every ward. The municipality is increasing its funding to provide for youth projects and ensure that more youth are assisted to find employment through the youth database. The municipality is committed to channeling all job advertisements and bursaries funded by various departments through to Ward Councillors for distribution to the youth. An annual Youth festival is held.

### **Elderly Forum**

The Municipality has a Forum which implements an annual plan based on activities for the elderly and promoting anti elderly abuse. 138

#### Women Forum

A women empowerment forum exists led by a Portfolio Councillor from the Executive Committee. A plan is done on an annual basis. The idea behind the forum is to ensure that women are empowered to take advantage of economic opportunities in the region. A ward-based women committee has been launched for every ward.

### Persons with Disabilities

Persons with a disability have their own forum, known as the Disabled Forum which like the others develops and implements an annual plan based on programmes to promote awareness and recognition for people with disabilities. A database has been developed to indicate disability types so that sector departments may utilise it to increase the level of employment amongst people with disabilities.

## 14.Mainstreaming and access to economic opportunity

The Municipality's sector plans all acknowledge the fact that the Senqu population is youthful with a high degree of unemployment. In recognition of this the municipality's infrastructural projects sets youth targets in respect of youth, women and disabled. The municipality also tries where possible to implement job intensive projects. It is experiencing difficulty in promoting people with disabilities as the database of disabilities is not updated. In addition, most projects in the municipality tend to involve physical labour which excludes most type of disabilities. The poor educational facilities in the area for the disabled also precluded people from many types of work as they do not have the necessary work skills to engage in any decent work opportunities. Council adopted a mainstreaming strategy on the 27 March 2013.

# CHAPTER SEVEN: WARD PLANNING, PRIORITIES AND PROJECTS

## 1. Summary of Ward Based Plans

Ward based plans were compiled in 2 workshops on the 27<sup>th of</sup> January and 1 February 2022. These were then taken to the wards and verified and presented at an IPPF of the 24<sup>th of</sup> March 2022. In between Ward Councillors had village meetings to verify the content.

In general, all wards suffer from poorly maintained road infrastructure. The more mountainous wards suffer poor radio, television, and cellphone reception. More repeaters are required in the Municipality.

Most wards have access to water but that the water pressure is low, and supply tends to be erratic. The worst affected wards are the following:

W 3 – 2 villages W4 – 3 villages W 6 – 4 villages W 7 Macacuma W8 – 4 villages W 13 suffers from bad water shortages. W17- 4 villages.

Sanitation provision is good except in new extensions and where projects have yet to be completed. Ward 15 suffers from lack of toilets at Rhodes and some informal settlements in Barkly East and the usage of bucket toilets still occurs in Lady Grey and Barkly East. Electricity is supplied to many except new extensions and a few houses that were built after electrification took place. Nomlengana has no electricity as the cost of erecting electricity is too expensive for the 60 households in the area. ESKOM is however busy with resolving the issue by installing a mini grid for residents.

There are 20 clinics in the area, but all suffer from limited supply of medication and staff. The ambulance service runs from Maletswai and is often unavailable or takes a long time to attend to cases. There are 4 hospitals, 2 of which service Sterkspruit.

Agricultural infrastructure is poorly maintained with requests for more dipping tanks and stock dams as well as fencing. Fencing of camps remains a huge priority in wards as does access to water for stock and adequate grazing. Donga erosion reduces the amount of land that is available for usage and poses a danger for those who must traverse these dongas especially when they flood.

Stock theft is rife in some wards that border on Lesotho. Crime is high including gender-based violence. There are 7 SAPS Offices, 5 that are situated in urban areas and their response time is hampered by lack of vehicles and poorly maintained roads.

Fire services are supplied by the district municipality and one of the bases is in Lady Grey. This hampers response time for the broader rural area.

There is an increased demand for early childhood care or creches and especially suitable buildings.

# 2. Ward Priorities as Identified in Ward Plans

#### Ward: 1

Villages: Walaza, Ndofela, Mbobo, Bikizana, Qhimirha (5) Ward Councillor: Thuliswa Mbane

Issue	Location	2022	2023	2024	2025	2026

#### 3. IDP Needs for 2024/2025

Ward Councillors held ward meetings between September and October 2023 to capture needs for the 2024/2025 financial year.

NEED	AREA	DETAILS	RESPONSIBLE DEPARTMENT
Water	Walaza, Ndofela, Mbobo and Qhimirha	There is no drinking water in the area. Community goes for weeks without water and drink from streams.	JGDM
Electricity	Walaza, Ndofela, Bikizana, Qhimirha, Mbobo	All New extension areas need electricity	ESKOM
Sanitation	Walaza, Ndofela, Bikizana, Qhimirha, Mbobo	There is a need to toilets in these areas.	JDGM
Telecommunication poles and network	Qhimirha, Bikizana, Mboleni, Emavundleni, Ndofela	The area does not have proper coverage make listening to radio a using cell phones effectively difficult. 1	
Shearing Shed	Ndofela	Farmers need place to use as multipurpose shearing shed	
Construction of access Roads	Walaza, Ndofela, Mbobo, Bikizana, Qhimirha, eHlathini,		Senqu
Construction of Sports Field	Ndofela	Sports facilities needs to be made for youth in this area	Senqu
Construction of Bridge	Edwaleni	Cars and people can't cross bridge when there have been heavy rains	Senqu
Pedestrian Bridge	Walaza, Ndofela, Mbobo, Bikizana, Qhimirha		
Construction of Community Hall	Walaza	Ward is vast and makes it difficult to have meeting in other areas, especially when extreme weather is experienced.	
WARD 2			
Electricity	St Michaels, Nquthu, St Theresa, Kwa Gcina, Ndingishe, Storomo, Mzistha	New extension areas need power, the water pump also would work efficiently when they are powered by electricity	ESKOM/ JGDM
Sanitation	St Michaels, Nquthu, St Theresa, Kwa Gcina, Ndingishe, Storomo, Mzistha	All areas needs toilets, they don't have at the moment.	JGDM

RDP Houses	St Michaels, Nquthu, St Theresa, Kwa Gcina, Ndingishe, Storomo, Mzistha	People need decent homes as they can afford to build, current homes are small and families are big.	Department of Human Settlement.
Shearing Shed	Kwa Gcina, Ndingishe, Storomo, Mzistha	Multi-purpose shed needed by the farmers.	Department of Rural Development and Agrarian Affairs
Speed Humps	Dulciesnek and Kwa Gcina	Traffic calming humps needed in the areas to reduce high number of accidents	Department of Roads and Transport
Fencing of Cemeteries	Mzintsha and Kwa Gcina	Graveyards need to be closed up, cows in the area drop the tomb stones when entering the graveyards	Senqu
Construction of Access Roads	St Michaels. Kwa Gcina, Ndingishe, Sginqi and Culverts at Kwa Gcina Village	The roads are poor in areas listed, during heavy rains, roads was washed away and condition need attention,	Senqu
Community Hall	Kwa-Gcinia, St Micheals, Mzimtsha (Pay point friendly) Dulicesnek (Pay point Friendly)	The halls are far away from communities, having more will assist even during social grant times. People won't have to travel so far and early to make pay dates.	Senqu
Bridge	Mission	Bridge that connects Ngxingweni village and Mission is needed.	Senqu
WARD 3			
Water	Mmusong, Ekra, Hohobeng, Makalakaleng, Qhoboshane, spring protection Ekra, water tanks Makalakaleng	There is no water in these villages, community drinks from streams	JGDM
RDP Houses	Mmusong, Ekra, Hohobeng, Makalakaleng, Qhoboshane	Community needs homes.	Department of Human Settlement
Sanitation	Mmusong, Ekra, Hohobeng	There are no toilets in these areas for community to use	JGDM
Electricity	Mshingiville, Qhoboshane and Hohobeng	New extension areas need to be connected	ESKOM
Telecommunication and	Mmusong, Ekra, Hohobeng, Makalakaleng,	Areas lay close to Lesotho making it difficult for	Service Providers
Network Poles	Qhoboshane	them to have adequate coverage as poles are too far from them.	MTN/VODACOM
Access roads	Mmusong, Ekra, Hohobeng, Makalakaleng, Qoboshane	Maintenance of these roads are needed	SENQU
Bridge	Ekra, Hohobeng, Musong, extension of a bridge Qoboshane		
Pedestrian Bridge	Qhoboshane, Makalakaleng, Mmusong (Mpoki)	In Qoboshane Village, next to the school, a pedestrian bridge is needed and close to shearing shed in Makalakaleng	SENQU
Stormwater drainage	Mmusong, Qoboshane, Makalakaleng	Hoses flood and roads erode fast with heavy rains	
Recreation	All sports fields	Request for poles and nets	SENQU
WARD 4			
Water	Mabele Makhumsha, Bebeza, Penhoek	All these villages do not have water, people drink from streams	JGDM
Provision of Electricity	Mabele Makhumsha, Bebeza, Penhoek	New Extension areas need electricity	ESKOM
RDP Houses	Mabele, Makhumsha, Bebeza, Boomplaas, Penhoek,	House are needed for the people in this area	Department of Human Settlement
ConstructionfoTraditionalLeaderCouncillorOffice	Lower Bebeza	Ward is far out of town, People spend to get proof of residence and other documents which	COGTA/ Senqu

		they need. Smaller meetings could also be held in these areas	
Access Roads	Mabele Makhumsha, Bebeza, Penhoek, Boomplaas	Construction of access roads in listed areas, roads in very bad condition. Grading is no longer effective.	SENQU
Local Economic Development	Mabele, Bebeza, Penhoek, Makhumsha	Revalorization of projects and job creation as they are far away from economic hub	SENQU
Sports Fields	Mabele, Bebeza, Penhoek, Makhumsha	Sports facilities be made for youth to participate in and stay away from drug, crime teen pregnancies	SENQU

# 4. Top 5 Identified Ward Priorities 2024-2025

- Water
- Access Roads, roads, bridges, stormwater, speedbumps
- Sanitation
- Electricity
- Sportsfields

# CHAPTER EIGHT: VISION & OBJECTIVES

## 1. Vision

A leading rural Municipality with a viable and modern economy.

## 2. Mission

Create decent living conditions by providing high quality services, ensuring equal access, developing and maintaining sustainable infrastructure and encouraging innovation to support local economic growth while protecting the environment.

## 3. Values

To achieve its mission, Senqu Municipality embraces the following values:

- a. People first (Batho pele)
- b. Integrity and honesty
- c. Transparency and fairness
- d. Accountability
- e. Excellence
- f. Humility
- g. Respect and tolerance for cultural diversity
- h. Discipline

## 4. Key Performance Areas and Municipal Priorities

The following Municipal priorities were re-identified through the municipal strategic sessions held in February 2023.

NO	КРА	MUNICIPAL PRIORITIES
1	Basic Service delivery and infrastructure	Building Economic and Social Infrastructure
2	Local Economic Development	Growth of Tourism and Agricultural Sector
3	Municipal Financial Management and Viability	Revenue Enhancement
4	Municipal transformation and institutiona development	Improve Institutional Capability

ſ	5	Good Governance and Public Participation	Deepen Democracy					
	6	Spatial rationale and environmental management	Equity Settlem		Land	and	Sustainable	Humar

For the Municipality to effectively deal with underdevelopment and poverty, the following Key Performance Areas were identified for measurable performance within a defined framework.

- 1. Good governance & public participation
- 2. Municipal transformation and institutional development
- 3. Municipal financial management and viability
- 4. Local economic development
- 5. Basic Service delivery and infrastructure
- 6. Spatial rationale and environmental management

## 5. Alignment with District, Provincial and National Priorities

Medium Term Strategic Framework	New Growth Path	ProvincialPriorities Strategic	Senqu LM & LocalGov. KPA	Outcome
<ol> <li>Strengthen skills and human resource base.</li> <li>Pursuing African advancement and enhanced international cooperation.</li> <li>Building a developmental stateincluding improvement ofpublic services and strengthening democratic institutions.</li> </ol>		Strategic Priority 2:Massive programme tobuild social	Municipal Transformation andInstitutional Development	Outcome 1: Quality basic education. Outcome 5: Skilled and capableworkforce to support an inclusivegrowth path. Outcome 3: All people in SA are andfeel safe. Outcome 9: Responsive, accountable,effective and efficient LocalGovernment System. Outcome 12: An efficient, effective anddevelopment oriented public service and an empowered fair and inclusive citizenship.
5.Intensify the fight Against crime		6:	Municipal Financial Viability and Management	Outcome 9; Responsive, accountable, effective and efficient Local Government System <u>182</u>

and corruption;		crime & corruption;		
<ol> <li>Intensifying the fightagainst crime andcorruption.</li> <li>Build cohesive, caring and sustainable</li> <li>communities.</li> <li>Pursuing African advancement and enhanced international cooperation.</li> <li>Building a developmental state including improvement of public services and strengthening democratic institutions</li> </ol>	social,capital and public services	Strategic Priority 6:Intensify the fight against crime and corruption. Strategic priority 8: Building cohesive and sustainable communities.	Public participation Institutional Transformation	Outcome 7: Vibrant, equitable, sustainable rural communitiescontributing towards food security for all. Outcome 9; Responsive, accountable, effective and efficient Local Government System. and an empowered, fair and inclusive citizenship. Outcome 11: Create a better South Africa, better Africa and a better world. Outcome 12: An efficient, effective anddevelopment oriented public service And
Institutions 1. Speeding up economic growth & transforming economy to create decent work and sustainable livelihoods; 4. Comprehensive rural development strategy linked to land and agrarian reform & food security.	Jobs driver 2: main economic sectors Jobs driver 3: Seizing the potential of new economies	Massive programme to build social & economic infrastructure.	Management	Outcome 4: Decent employment through inclusive economic growth. Outcome 6: An efficient competitive and responsive economic infrastructure network. Outcome 7: Vibrant, equitable, sustainable rural communities contributing towards food security for all. Outcome 8: Sustainable human settlements and improve quality of household life. Outcome 10: Protect and enhance our environmental assets and natural resources

## 6. Alignment with Circular 88

"Municipalities are expected to include a medium-term target for Outcome indicators for the electoral term (5th year). Following the 2021 Local Government Elections, this means that Outcome indicator targets should be set for the medium-term planning horizon: 2026/27. It should be noted that Outcome indicators will still be tracked on an annual basis in Annual Performance Reports for monitoring purposes, but that determinations of outcome 'performance' should be linked to medium-term target-setting for the outer year of the local government term of office (Rationalisation of Planning, Budgeting and Reporting Requirements for the 2022/23 MTREF: Addendum 3, 20 December 2021)".

"Due to the continuing pilot process in the 2022/23 financial year, intermediate cities, district and local municipalities, will not be required to incorporate the indicators in their existing performance indicator tables in the IDP and SDBIP. Instead, these indicators should again find expression in a dedicated Annexure to the IDP and SDBIP which clearly indicates the MFMA Circular No. 88 indicators applicable to the municipality at the Tier 1 and 2 levels of readiness (Rationalisation of Planning, Budgeting and Reporting Requirements for the 2022/23 MTREF: Addendum 3, 20 December 2021)".

# CHAPTER NINE: FINANCIAL PLAN 2023-2027

### 1. Capital & Operating Budget

The five-year financial plan includes an Operating Budget and Capital Investment Programme for the five years ending June 2027.

#### **Budget Assumptions**

The initial budget assumptions that went into the drafting of the financial plan in 2022 have changed completely. At that time, it was assumed that South Africa was coming out of a recession and that economic growth would be low but increase.

The following assumptions were used:

#### **External factors**

South Africa experienced its largest recorded decline in economic output in 2020 due to the strict COVID-19 lockdown. Real GDP contracted by 7.2 per cent in 2020 compared to 0.1 per cent increase in 2019. It is expected to increase by 6.2 per cent in 2021/22 and moderate by an average increase of 1.7 per cent over the 2022/23 MTREF. The National Treasury projects real economic growth of 5.1 per cent in 2021, following an expected contraction of 6.4 per cent in 2020. Real GDP growth is expected to moderate to 1.8 per cent in 2022,1.6 per cent in 2023 and 1.7 per cent in 2024.

Despite these challenges, the municipality is in a healthy financial position, however, it needs to at least stabilize and further strive to continuously better its financial position, coupled with acceptable levels of service delivery at affordable tariffs. The retention of sufficient cashbacked reserves is critical for the long-term sustainability of the municipality, and to this end the municipality is achieving this objective while also maintaining a balance on the Capital Replacement Reserve to a level where future external funding, excluding grants, be minimized.

#### General inflation outlook and its impact on the municipal activities

Headline inflation is expected to remain between 3 to 6 per cent target range. To maximize the value of spending, government needs to contain costs, more especially consumption related spending, exercise prudent and compliant financial management, and eradicate wasteful treatment of public funds and resources.

Standard & Poor's credit rating for South Africa stands at BB- with stable outlook.

#### Interest rates for borrowing and investment of funds

The SA Reserve Bank's monetary policy committee (MPC) has increased the reportate to 7.25%. This brings the prime rate to 10.750%.

The Municipality is limiting its borrowing in order to keep finance charges to the absolute minimum. Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). The Municipality is limiting its borrowing in order to keep finance charges to the absolute minimum. Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). Finance charges make up 1,05 per cent (R3,80 million) of operating expenditure excluding annual redemption for 2023/24. This percentage is set to remain constant over the two outer years of the MTREF.

#### **Collection rate for revenue services**

The base assumption is that tariff and rating increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as 80 per cent of annual billings. The performance of any increased collections or arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

#### Growth or decline in tax base of the municipality

Debtor's revenue is assumed to increase at a rate that is influenced by the consumer debtor's collection rate, tariff/rate pricing, real growth rate of the Municipality, household formation growth rate and the poor household change rate.

Household formation is the key factor in measuring municipal revenue and expenditure growth, as servicing 'households' is a greater municipal service factor than servicing individuals. Household formation rates are assumed to convert to household dwellings. In addition, the change in the number of poor households influences the net revenue benefit derived from household formation growth, as it assumes that the same costs incurred for servicing the household exist, but that no consumer revenue is derived as the 'poor household' limits consumption to the level of free basic services.

#### **Salary increases**

The Salary and Wage Collective Agreement for the period 01 July 2021 to 30 June 2024 dated 15 September 2021 through the agreement that was approved by the Bargaining Committee of the Central Council in terms of Clause 17.3 of the Constitution are used for employee related

costs for the 2023/24 MTREF. In terms of the agreement, all employees covered by this agreement shall receive with effect from 01 July 2023 and 01 July 2024 an increase based on the projected average CPI percentages for 2023 (5.4 per cent according to the Reserve Bank's Monetary Committee Statement for January 2023) and 2024 (4.8 per cent according to the Reserve Bank's Monetary Committee Statement for January 2023).

#### Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and, in this regard, various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- Creating jobs;
- Enhancing education and skill development;
- Improving Health services;
- Rural development and agriculture; and
- Fighting crime and corruption.

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

### **General budget overview 2023 MTREF**

In view of the aforementioned, the following table is a consolidated overview of the proposed 2024/25 Medium-term Revenue and Expenditure Framework:

R thousand	Adjustments Budget	Budget Year	Budget Year +1	Budget Year +2
	2023/24	2024/25	2025/26	2026/27
Total Operating Revenue	335 400	350 092	349 700	350 535
Total Operating Expenditure	379 990	405 900	412 852	433 817
Surplus/(Deficit) for the year	(44 590)	(55 808)	(63 152)	(83 282)
Total Capital Revenue recognised	43 140	47 100	41 588	46 249
Surplus/(Deficit) for the year	(1 450)	(8 708)	(21 564)	(37 033)

#### Consolidated Overview of the 2024/25 MTREF (R'000)

As can be seen from the table above, the municipality will operate at an operating deficit throughout the MTREF. An operating deficit is an indication that the municipality is not generating sufficient revenue to sustain its operating expenditure, let alone the fact that the operating budget is not contributing any revenue at all towards the capital program. It should also be noted that the operating budget also includes items such as depreciation and debt impairment which are not considered to be a "cash" expense. These items will not result in an immediate cash outflow.

### 2. Financial Ratios

	Ratio	Norm Range	Senqu LM
Α	Asset Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long-term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, Senqu Municipality's borrowing strategy is primarily informed by the affordability of debt repayments. The structure of the Municipality's debt portfolio is dominated by annuity loans. The following financial performance indicators have formed part of the compilation of the 2024/25 MTREF:

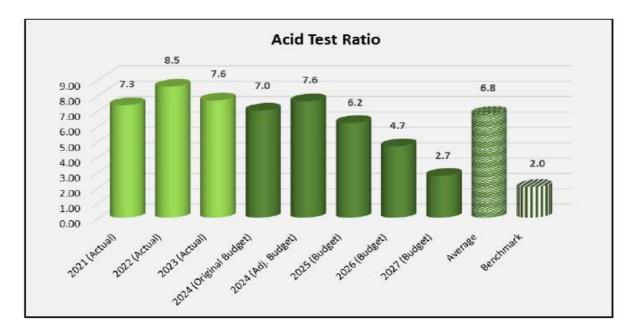

- Capital charges to operating expenditure are a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing has remain constant between 1,3 and 1,5 per cent over the MTREF.
- Borrowing funding of own capital expenditure measures the degree to which own capital expenditure (excluding grants and contributions) has been funded by way of borrowing. The municipality does not intend borrowing any money during the MTREF period.

#### Safety of Capital

• The *gearing ratio* is a measure of the total long-term borrowings over funds and reserves.

#### Liquidity

 Current ratio / acid test is a measure of the current assets divided by the current liabilities and as a benchmark the Municipality has set a limit of 2, hence at no point in time should this ratio be less than 2. This ratio is above this norm set for the entire MTREF as depicted on the graph on the next page. There is however a decline because of the declining cash resources over the MTREF at the Senqu Municipality. This could significantly impact on the long-term sustainability of the entity.

• The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2024/25 financial year the ratio is 5.6 and this ratio is projected to decline to 2.2 in 2026/27. Although these ratios are still considered to be healthy, the municipality should put in place measures to stem the downward trend in the liquidity ratio.

#### **Revenue Management**

As part of the financial sustainability strategy, an aggressive revenue management framework has been implemented to increase cash inflow, not only from current billings but also from debtors that are in arrears in excess of 90 days. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, credit control and debt collection. Payment levels and credit control is considered to be favorable.

#### **Creditors Management**

The Municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. While the liquidity ratio is of concern, by applying daily cash flow management the municipality has managed to ensure a 100 per cent compliance rate to this legislative obligation. This has had a favorable impact on suppliers' perceptions of risk of doing business with the Municipality, which is expected to benefit the Municipality in the form of more competitive pricing of tenders, as suppliers compete for the Municipality's business.

#### Other Indicators

- Employee costs as a percentage of operating revenue remains more or less constant over the MTREF between 39,7 and 40,6 per cent. As discussed previously in this report, the employee related costs at the municipality is slightly above the industry norms and the room for any upward adjustments are very restricted.
- Repairs and maintenance as percentage of operating revenue is increasing slightly over the MTREF. The expenditure on repairs and maintenance is well below acceptable levels at 3.4% of the PPE value, but the actual cost will only be determined when a costing system is implemented.

### 3. Financial performance

Percentage of salary budget (Cllr remuneration and employee costs) to operational budget Councillor renumeration to the total budget for 2024/25 is 39.7 % of operating expenditure costs.

It was resolved in the 2022/23 strategic planning session to gradually increase the budget for repairs and maintenance to achieve the minimum 8% required as a benchmark in line with MFMA Circular 55. However, there are other factors involved such as the "costing" or allocation of employee related costs to repairs and maintenance as well as the preparation of a costed Repairs and Maintenance Plan which still need to be attended to by the municipality. The municipality is in the process of developing the repairs and maintenance plan. This plan will

assist the municipality to budget adequately for the repairs and maintenance and to also ensure that the budget is implemented appropriately.

#### Explanatory notes to Table A7 - Budgeted Cash Flow Statement

- The budgeted cash flow statement is the first measurement in determining if the budget is funded.
- It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
- The investment in capital infrastructure, which is much higher than the cash generated by operations, is the main reason for the annual decline in cash resources.

The cash resource is expected to decrease from R497.3 million in 2022/23 to R122 million in 2026/27 financial year due to the planned capital infrastructure programs.

# 4. Ability of the Municipality to spend

#### Table 43: Total Capital Funding of the 2024/25 MTREF (R'000)

The municipality remains committed to a large capital program with a significant portion funded by grants from National Government. The capital budget of R96,46 million for 2024/25 is 26,76 per cent less when compared to the 2023/24 Adjustment Budget. The capital program decreases to R86,27 million in 2025/26 and increase to R95,41 million in 2026/27. This movement in the capital budget is directly related to the movement in proposed expenditure to be financed from internally generated funds.

The Municipality is mindful of the fact that the large capital program, especially from internally generated funds, places enormous pressure on the accumulated cash reserves of the Senqu Municipality. This could significantly impact on the long term sustainability of the entity. Currently, although still a funded budget, the proposed budget will have a negative impact on the projected cash position of the municipality.

It is expected that the cash resources of the municipality will decrease by R79 million per year during 2024/2025 and 2025/26 financial years and a further decrease by R101 million in 2026/27. This significant downward trend can mainly be attributed to the inability of the municipal budget to produce significant revenues to cover main cost drivers such as bulk purchases and employee related costs. This inability of revenue growth to keep track with operating expenditure will also negatively impact on the contribution that the operating budget will have towards to capital program over the MTREF. This will result in accumulated cash reserves being utilized to fund the capital program, resulting in the illustrated downward trend in cash resources over the MTREF.

A large portion of the capital budget will be funded from own revenue (R143.2 million or 51.4%) over the MTREF with no anticipated borrowings. The other funding source being National Government Grants to the value of R134.9 million (48.6%) over the MTREF.

The following table 44 is a high-level summary of the 2024/25 budget and MTREF (classified per main type of operating expenditure):

# 5. Operating Budget

Revenue generated from rates and services charges forms an important percentage of the revenue basket for the Municipality, but measured against other municipalities, the percentage is relatively low. Rates and service charge revenues comprise between 27 and 32 per cent of the total revenue mix over the MTREF period.

Senqu Municipality is to a very large degree dependent on grants (Equitable share) to sustain the budget. The unconditional Equitable Share Grant is a grant growing annually according to a formula determined nationally and such formula is applicable to all local authorities on an equal basis. Approximately 60% of the revenue basket can be attributed to equitable share. This, together with the lower percentage for rates and service charge revenues, is an indication of the high unemployment rate in the area and the focus on job creation projects were therefore treated as a priority in this budget.

#### **Debt Management Framework**

The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, Senqu Municipality's borrowing strategy is primarily informed by the affordability of debt repayments.

As indicated in the table above no borrowing for capital projects is planned. The municipality is still well within the limits of its borrowing capacity but will raise very limited loans soon in order to curtail possible rising debt servicing costs. Table 48 below details the Debt Management Framework. Loans may only be raised to fund the Capital Investment Programme.

Description r 0,00	2019/20	2020/21	2021/22	Current Year 2022/23		edium Term re Framewor

#### Table 48: Debt Management Framework

## 7. Grants Receivable

The Municipality has managed to spend most of the grant funding. The Municipality does not maintain a separate account for grants as it has one primary bank account and then 3 investment accounts. The grants received are transferred to and kept on the investments call accounts and withdrawals from these investments' accounts are made as and when payments need to be made. Expenditure on conditional grants is made according to DORA requirements and reported on in accordance with legislature. The EPWP grant was spent on EPWP participants cleaning streets, pothole repair, stormwater management and collecting waste supplemented by own funding. The library grant is spent on providing library services in Sterkspruit, Lady Grey and Barkly East and is supplemented by own funding. The MIG grant is utilised for capital infrastructure projects.

Table 49 below details the Grants receivable in the 2024/2025 and outer years

EC142 Senqu - Supporting Table SA19 Expenditure on transfers and grant programme

## 8. Financial Strategy

The financial well-being and threats directly affecting the financial sustainability of municipalities have been a very topical issue in recent times. Issues such as unemployment and high energy and other costs negatively impacts on the sustainability of municipalities. These economic challenges will continue to pressurise municipal revenue generation and collection levels. The Municipality will have to improve their efforts to limit non-priority spending and to implement stringent cost-containment measures.

## a) Revenue Enhancement Strategy

As part of the financial sustainability strategy, a revenue management framework has been implemented to increase cash inflow, not only from current billings, but also from debtors that are in arrears in excess of 90 days. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, credit control and debt collection.

The following has been done with the implementation of the Revenue enhancement plan:

- 1. The Municipality is implementing a process of converting residential credit meters to prepaid meters. The Historical Debt in the main is based on residents not paying for electricity already consumed when the Municipality was still a majority of credit meters.
- 2. The Municipality is implementing exemptions as per the Municipal Property Rates Act and addition exemptions as per municipal policy. The Municipality is also in the process of transferring property to owners that will increase rates base in the future.
- 3. Refuse billing is based on the occupier of the premises and not subjected to property transfers as per point "1" above. Refuse billed is thus a greater % than Property Rates

Tariff setting plays a major role in ensuring desired levels of revenue. Getting tariffs right assists in the compilation of a credible and funded budget. The Municipality derives most of its operational revenue from the provision of goods and services such as electricity and solid waste removal, property rates, operating and capital grants from organs of state and other minor charges (such as building plan fees, licenses and permits etc).

Investment revenue contributes significantly to the revenue base of the Municipality. The tables below provide detail investment information and investment particulars by maturity.

#### Table 51: Detail Investment Information

TOTAL INVESTMENTS AND INTEREST	429 634		(402 638)	197 060	255 565

## b) Asset Management Strategy

#### Asset Register

The Municipality has compiled a Fully GRAP Compliant Asset register that was tested during the Audit and no findings pertaining to the Register were raised by the Auditor General. Senqu Municipality has implemented a system of internal control consistent with the transcripts of the Municipal Asset Management and Insurance policy to ensure that all assets are accounted for, and the useful lives of the assets are reassessed on an annual basis. Strict Control is also kept on the safeguarding of assets to ensure that service delivery is not disrupted in any way or form.

Ultimately the objectives of Senqu Local Municipality regarding Asset Management are to ensure that the assets of the Municipality are properly managed and accounted for. The Municipality has developed a comprehensive asset and insurance policy that fully complies with the GRAP standards and regulations placed upon the municipality by the National Treasury. The policy has been implemented and some of the key aspects included in the policy are as follows:

- Ensuring the accurate recording of asset information
- The accurate recording of asset movements
- Exercising strict physical control over all assets (Security,
- safekeeping, housekeeping)
- Providing correct and meaningful management information in conjunction with other disciplines and functions which, inter alia, includes Insurance
- Compliance with Council's Insurance and Payments Procedure
- Effecting adequate insurance of all assets
- Maintenance of Council's Assets

By clearly clarifying roles and responsibilities within the asset management policy the municipality has ensured that clear reporting lines exists to ensure that proper account can be given regarding the use/misuse of all municipal assets.

Senqu Municipality, like so many other municipalities in South Africa, is faced with ageing Infrastructure as one of the biggest threats to sustainable service delivery.

National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The Municipality does not meet both these recommendations for the current budget period.

The table below illustrates that on average the municipality should replace its assets every 17 years. Where possible, the municipality should implement strategies that will see this ratio improve over time. This will include an effective maintenance program which will extent the useful life of the assets and reduce the need to replace assets on a more regular basis.

	Average Remaining useful life
Infrastructure	21
Community Assets	23
Other assets	7
Average for all assets	17

## c) Capital Financing Strategy

Capital Projects are mainly funded from the Municipal Infrastructure Grant, but the Municipality maintains efficient and effective revenue collection systems and effective cash flow management systems and is thus in an able position to fund shortfalls from grant funding. Through the above practices, Senqu Municipality is also able to fund capital expenditure not covered in the MIG as an example vehicles and office equipment.

## 9. Financial Management Policies

## a) General Financial Philosophy

The financial policies of Senqu Local Municipality has been drafted to provide a sound control environment thus ensuring adherence to all applicable laws regulations and to comply with best practices thereby providing a secure and fraud free management of financial services. The Budget and Finance Office has the following objectives:

- To fully Implement the MFMA and all its underlying reforms
- Implementation of the Legislature relevant to municipal finances and the municipality as a whole
- Effective Management of the Budget Process
- Providing strategic and specialised financial information and guidance through the Budget and Treasury Office in support of all other departments within the municipality
- Efficient and Effective Management of Municipal Revenue
- Establishment of a Supply Chain Management Unit and the full implementation of the municipal supply chain policy
- Establishment of an FBS/Indigent Support Unit
- Maintenance of Internal Financial Control
- Production of Financial Performance Reports
- To Retain the Financial Viability of the Municipality
- To have an Unqualified Audit Report

## b) Tariff Policy

A tariff policy must be compiled, adopted and implemented in terms of Section 74 of the Local Government: Municipal Systems Act 2000, such policy to cover, among other things, the levying of fees for municipal services provided by the municipality itself or by way of service

delivery agreements. The tariffs policy has been compiled considering, where applicable, the guidelines set out in Section 74 (see part 9 of this policy) of the Municipal Systems Act No. 32 of 2000. In setting its annual tariffs the council shall at all times take due cognisance of the tariffs applicable elsewhere in the economic region, and of the impact which its own tariffs may have on local economic development.

All tariffs are being indicated in a tariff schedule, which is an addendum to the policy and is reviewed and amended by Council annually.

#### c) Rates Policy

The local Government: Municipal Property Rates Act, No 6 of 2004, requires that the municipality develop and adopt a rates policy in consistent with the Act on the levying of rates on rate able property in the municipality. This has been done. The rates policy of the municipality to which residents / communities will annually be invited to make suggestions / recommendations during its budget process will be based on public submissions, which can include oral presentations and bilateral meetings to obtain clarity on the submitted comments as well as further motivations thereof. The municipal council will not take the final decision before such a consultative process has been concluded.

In developing and adopting this Rates Policy, the Council has sought to give effect to the sentiments expressed in the preamble of the Property Rates Act, namely that:

The Constitution enjoins local government to be developmental in nature, in addressing the service delivery properties of our country and promoting the economic and financial viability of our municipalities. There is a need to provide local government with access to a sufficient and buoyant source of revenue necessary to fulfil its developmental responsibilities. Revenues derived from property rates represent a critical source of income for municipalities to achieve their constitutional objectives, especially in areas neglected in the past because of discriminatory legislation and practices and it is essential that municipalities exercise their powers to impose rates within a statutory framework which enhances certainty, uniformity and simplicity across the nation, and which take account of historical imbalances and the burden of rates on the poor.

The Municipality needs a reliable source of revenue to provide basic services and perform its functions. Property Rates are the most important source of general revenue for the municipality. Revenue from property rates is used to fund services that benefit the community as a whole as opposed to individual households; these includes installing and maintaining streets, roads, sidewalks, lighting and cemeteries. Property Rates revenue is also used to fund municipal administration and costs of governance, which facilitate community participation on issues of Integrated Development Plans and municipal budgets. Property Rates revenue would under circumstances be used to fund any function of the municipality.

Municipal Property Rates are set, collected and used locally. Revenue from property rates is spent within the municipality, where the citizens and voters have a choice on how the revenue is spent as part of the Integrated Development Plan and budget processes, which the municipality will annually invites the community to input prior the council's adoption of the budget. The following principles will ensure that the municipality treats persons liable for rates equitable:

Equity – the municipality will treat ratepayers with similar properties the same.

Affordability – the ability of a person to pay rates will be considered by the municipality. In dealing with the poor / indigent ratepayers the municipality will provide relief measures through exemptions, reductions or rebates. In applying its Valuations and Rates Policy, the Council adheres to all the requirements, as set out below, of the Property Rates Act no. 6 of 2004 including any regulations promulgated in terms of that Act.

## d) Free Basic Services and Indigent Support Policy

The principles of the Free Basic Services and Indigent Support Policy is as follows:

- Ensure that the Equitable Share received annually will be utilised for the benefit of the poor only and not to subsidise rates and service charges of those who can afford to pay.
- To link this policy with the municipality's IDP (Integrated Development Plan), LED (Local Economic Development) initiatives and poverty alleviation programmes.
- To promote an integrated approach to free basic service delivery; and to engage the community in the development and implementation of this policy.

## **Policy Objectives**

In support of the above principles the objective of this policy will be to ensure the following:

- The provision of basic services to the community in a sustainable manner within the financial and administrative capacity of the Council;
- The financial sustainability of free basic services through the determination of appropriate tariffs that contribute to such sustainability through cross subsidisation;
- Establishment of a framework for the identification and management of indigent households including a socio-economic analysis where necessary and an exit strategy.
- The provision of procedures and guidelines for the subsidisation of basic charges and the provision of free basic energy to indigent households; and
- Co-operative governance with other spheres of government.

## e) Credit Control & Debt Collection Policy

The purpose is to ensure that credit control forms an integral part of the financial system of the local authority, and to ensure that the same procedure be followed for each individual case. The policy has been changed into a credit control bylaw in line with legislation.

Principles underlined in the policy is as follows.

- The administrative integrity of the municipality must be maintained at all costs. The democratically elected councillors are responsible for policy making, while it is the responsibility of the Municipal Manager to ensure the execution of these policies.
- All customers must complete an official application form, formally requesting the municipality to connect them to service supply lines. Existing customers may be required to complete new application forms from time to time, as determined by the Municipal Manager.
- A copy of the application form including conditions of services must be handed to every new customer on date of application for services. A copy of the council's Credit Control and Debt Collection policy would on request is made available to any customer.
- Billing is to be accurate, timeous and understandable.
- The customer is entitled to reasonable access to pay points and to a variety of reliable payment methods.
- The customer is entitled to an efficient, effective and reasonable response to appeals, and should suffer no disadvantage during the processing of a reasonable appeal.
- Enforcement of payment must be prompt, consistent and effective.
- Unauthorised consumption, connection and reconnection, the tampering with or theft of meters, service supply equipment and the reticulation network and any fraudulent activity in connection with the provision of municipal services will lead to disconnections, penalties, loss of rights and criminal prosecutions.
- Incentives and disincentives may be used in collection procedures.
- Results will be regularly and efficiently reported by the Municipal Manager and the Mayor.
- Application forms will be used to, inter alia, categorise customers according to credit risk and to determine relevant levels of services and deposits required.
- Targets for performance in both customer service and debt collection will be set and pursued and remedies implemented for non-performance.
- Debtors may be referred to third party debt collection agencies and may be placed on the National Credit Rating list.

## f) Supply Chain Management Policy

The objective of this policy is to provide a policy framework within which the municipal manager and chief financial officer can institute and maintain a supply chain management system which is transparent, efficient, equitable, competitive, which ensures best value for money for the municipality, applies the highest possible ethical standards, and promotes local economic development.

All officials and other role players in the supply chain management system of the municipality must implement this Policy in a way that –

- gives effect to section 217 of the Constitution; and Part 1 of Chapter 11 and other applicable provisions of the Act.
- is fair, equitable, transparent, competitive and cost effective.

- complies with the Regulations; and any minimum norms and standards that may be prescribed in terms of section 168 of the Act; is consistent with other applicable legislation and guidelines:
- does not undermine the objective for uniformity in supply chain management systems between organs of state in all spheres; and is consistent with national economic policy concerning the promotion of investments and doing business with the public sector.

National Treasury: MFMA Circular No.82 – Tax Compliance 30 January 2018

The Municipality remains committed to the full implementation of the SCM Regulations, MFMA requirements and the Municipal SCM policy. Control measures were implemented to address the findings raised by the AG and additional controls were also implemented by the municipality to be in a position to ensure compliance with SCM and PPPFA regulations such as the redesign of evaluation forms and the reviewal of the SCM policy. Senqu Municipality also plans to implement demand and procurement management plans for the 2024- 2025 Budget year to ensure enhanced compliance through proper planning.

The SCM unit within the municipality is also being capacitated and this in turn ensures that the SCM Policy is being properly enforced and implemented.

## 10. Accounting principles & Policies applied in Annual Financial Statements

The budget and treasury section has developed an AFS year-end preparation plan and an audit file that is updated regularly. The Municipality does not miss the deadline of 31 August for the submission of the annual financial statements to the auditor general.

## **Basis of Preparation**

The financial statements are prepared on an accrual basis of accounting and are in accordance with historical cost convention, unless specified otherwise.

The financial statements are prepared in accordance with the Municipal Finance Management Act (MFMA) and effective standards of Generally Recognised Accounting Practices (GRAP), including any interpretations, guidelines and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework, have been developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 (Revised – November 2013) and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

Assets, liabilities, revenue and expenses have not been offset, except when offsetting is permitted or required by a Standard of GRAP.

New Standards, Amendments to Standards and Interpretations issued but not yet effective

Where a Standard of GRAP has been issued but is not yet effective, the Municipality may resolve to early adopt such a Standard of GRAP if an effective date has been determined by the Minister of Finance.

The Municipality resolved to early adopt the Improvements to the Standards of GRAP (2020) which were issued but are not yet effective. The improvements affected the following Standards of GRAP:

Standard	Description	Effective Date
GRAP 5	Borrowing Costs	1 April 2023
GRAP 13	Leases	1 April 2023
GRAP 16	Investment Property	1 April 2023
GRAP 17	Property Plant and Equipment	1 April 2023
GRAP 24	Presentation of Budget Information in Financial Statements	1 April 2023
GRAP 31	Intangible Assets	1 April 2023
GRAP 32	Service Concession Arrangements: Grantor	1 April 2023
GRAP 37	Joint Arrangements	1 April 2023
GRAP 106	Transfer of Functions Between Entities Not Under Common Control	1 April 2023
Directive 7	The Application of Deemed Cost	1 April 2023
Guideline	Accounting for Landfill Sites	1 April 2023

The Municipality also resolved to early adopt the following Interpretation of the Standards of GRAP which were issued but are not yet effective:

Standard	Description	Effective Date
igrap 21	The Effect of Past Decisions on Materiality	1 April 2023

The Municipality further resolved to early adopt the following Amendments to the Standards of GRAP which were issued but are not yet effective:

Standard	Description	Effective Date
GRAP 1 (2019)	Presentation of Financial Statements	1 April 2023

The effect of the above-mentioned pronouncements to the Standards of GRAP which were early adopted is considered insignificant. The early adopted pronouncements mainly relate to the clarification of accounting principles.

#### Presentation of Budget Information

Budget information is presented on the accrual basis and is based on the same fiscal period as the actual amounts.

The Statement of Comparison of Budget and Actual Amounts includes the comparison between the approved and final budget amounts, as well as a comparison between the actual amounts and final budget amounts.

The disclosure of comparative information in respect of the previous period is not required by the Standards of GRAP.

## 11. Revenue

At the time of initial recognition, the full amount of revenue is recognised where the Municipality has an enforceable legal obligation to collect, unless the Municipality has no intention of collecting this revenue. Where the Municipality has no intention of collecting the revenue, rebates and discounts are offset against the related revenue. If the Municipality does not successfully enforce its obligation to collect the revenue this would be considered a subsequent event.

#### Revenue from Non-Exchange Transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange.

Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

#### Taxation Revenue

Taxation revenue comprises of property rates. Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest  $\frac{260}{260}$ 

rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

#### Transfer Revenue

Grants, transfers and donations received, or receivable are recognised when the resources that have been transferred, meet the criteria for recognition as an asset. A corresponding liability is recognised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants, transfers and donations without any conditions attached are recognised as revenue when the asset is recognised.

#### Fines

Fine Revenue constitutes both spot fines and summonses. All fines issued during the year less any cancellations or reductions are recognised as revenue. In cases where fines and summonses are issued by another government departments, revenue will only be recognised when monies are received, as the Municipality does not have any control over fines issued by other government institutes.

#### Insurance Receipts

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and is not being offset against the related expenses of repairs or renewals of the impaired assets.

## Unclaimed deposits

All unclaimed deposits are initially recognised as a liability until 12 months expires, when all unclaimed deposits into the Municipality's bank account will be treated as revenue. Historical patterns have indicated that minimal unidentified deposits are reclaimed after a period of twelve months. Therefore the substance of these transactions indicates that even though the prescription period for unclaimed monies is legally three years, it is reasonable to recognised all unclaimed monies older than twelve months as revenue. Although unclaimed deposits are recognised as revenue after 12 months, the Municipality still keeps a record of these unclaimed deposits for three years in the event that a party should submit a claim after 12 months, in which case it will be expensed.

Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure Income from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the MFMA (Act 56 of 2003), and is recognised upon the recovery thereof from the responsible party.

## Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable.

#### Service Charges

Service Charges are levied in terms of approved tariffs. Service charges relating to electricity and water are based on consumption and a basic charge as per the approved tariffs. Meters are read monthly and are recognised as revenue when invoiced. Where the Municipality was unable to take the actual month's reading of certain consumers, a provisional estimate of consumption for that month will be created, based on consumption history. The provisional estimates of consumption are recognised as revenue when invoiced, except at reporting date when estimates of consumption up to the reporting date are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage and are levied monthly based on the recorded number of refuse points per property.

#### Interest earned.

Interest earned on investments is recognised in the Statement of Financial Performance on the time proportionate basis that considers the effective yield on the investment.

#### Rental income

Revenue from the rental of fixed assets is recognised on a straight-line basis over the term of the lease agreement.

#### Income from Agency Services

Revenue arising out of situations where the Municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the Municipality as compensation for executing the agreed services.

Income from agency services is recognised monthly once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Other Tariffs

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- The Municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods.
- The Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

## 12. Information & Communication Technology

The ICT Software used by Senqu Local Municipality is summarized in Table 53 below:

Company	Programme	Application
Inzalo	Inzalo Enterprise Managem	en Inzalo Consolidated Billing
	Solutions	Inzalo Ledger
		Inzalo Payroll
		Inzalo Assets
		Inzalo Stores
		Inzalo Cashbook
		Inzalo Financial Management Solutions
Microsoft	MS Office	MS Word
		MS Excel
		MS PowerPoint
		MS Publisher
		Adobe
		MS Outlook
		Windows Security
Sophos	Sophos Protection	Sophos Antivirus
Standard Bank	Standard Bank Business Online	Standard Bank Business Online
		Electronic Banking
SITA	eNatis	Motor Vehicle Registration

Table 53:	ICT software
-----------	--------------

Source: Senqu Municipality

In order to protect data, there are backup servers located off site and one drive cloud backups. The servers also have alternate energy sources. The Municipality is busy improving 272

its capacity to run its ICT and servers during electrical blackouts. All server rooms are secured.

#### 13. Valuation Roll

In terms of The Municipal Property Rates Act of 2004, Chapters 4, 5, 6 and 7 a municipal valuation process of all properties within a municipal jurisdiction must be completed by a municipality within the ambit of this Act (MPRA) given due consideration to rights of community members and the municipality/municipal valuator which will conduct the valuation process. A GRAP compliant valuation roll was done in 2017 with the first supplementary which is published on the Senqu website on www. senqu.gov.za. It was open to the public for objections from the 15th May to 25 June 2018. Community meetings were held and the process of lodging objections was done. Yearly Supplementary Valuation Rolls are being conducted in years that general valuation does not take place. We published our last supplementary roll in 2022 and have applied for a two-year extension whilst the Treasury tender procurement abatement is in process. The roll was published in Gazette number 29 of 2022. This is in terms of Sec 6 & 14 of the MPRA which were gazetted. No objections were submitted during the objection period which is now closed.

A valuator was hired for the 2017 roll which is valid for 5 years. Budget is available for engaging a new valuer in the valuation reserves project. A new valuation roll will be undertaken in the 2024/2025 FY. This has been advertised and the tender has closed for evaluation and adjudication.

To achieve the above an informative consultation process with community members will be embarked upon explaining activities to be performed by the municipal valuators and the rights of community members regarding the entire valuation process. This informative consultation process will also afford community members an opportunity to gain clarity on any uncertain matters which they might have. All meeting dates and places will be formally advertised and placed on notice boards in municipal offices.

The municipality is currently using General valuation roll for property valuations and the service are also linked to the General valuation roll and as they are demand driven the SLAs

are signed for service required. The general valuation roll is performed as per the deeds search records and cadastral data from the chief surveyor general, these are the basic requirements as per MPRA act. Senqu Municipality is currently using Sebata billing System which capable of billing monthly, Quarterly, biannually and annually depending on the demand. Currently we do have a challenge on electrical losses. This will hopefully be addressed by the implementation of the newly procured smart electricity meters. Water losses are the responsibility of the District Municipality.

The Vote for valuation reserves is part of the budget and the amount awarded to the winning bidder is also available at SCM as it reflects on the tender document. Currently the municipality has the current valuation on website and as soon as the new general valuation roll is opened for public consumption the municipality will add the new General valuation roll to the website.

## 14. Internal Controls

The Municipality has an effective internal control system in place as evidenced by eight consecutive year's unqualified audit with no other matters reported (clean audit). All issues relating to the audit are addressed in Chapter 5. Risk management is conducted on an annual basis by the DTPS department and risk assessment reports generated quarterly per department.

## 15. Supply Chain Management

Senqu has three committees as per legislation. "Bid Committees" means the committees established in terms of this policy to prepare bid specifications, bid documentation, evaluate responsive bids and, where so authorised, to adjudicate responsive bids and any reference in section 117 of the Municipal Finance Management Act to municipal tender committees shall be construed as a reference to the aforesaid committees.

## These Committees are:

The Specification Committee which ensures that the specifications are correct and in line with SCM legislation and approves them for tender advertisements. The Evaluation Committee evaluates bids once tenders have closed and forwards their recommendations to the

Adjudication Bid Committee. The third committee is the Adjudication Bid Committee that makes recommendations to the Accounting Officer on all tenders. The Accounting Officer makes the final decision to award or cancel the bid.

The unit consists of 11 staff members, including 2 managers, who handle bids, expenditure, demand management, acquisition management and contract management. The Unit assists the Compliance and Governance Manager to monitor the performance of suppliers and bidders. The turnover rate of procurement is between 45 days if adjudication sits regularly. Contract management is performed by the Acquisition Section with the SCM Division. It is done monthly or on a quarterly basis depending on the nature of the contract and is sent to Managers and Directors for comments.

## 16. mSCOA Standard chart of accounts and report submission

Senqu Municipality views mSCOA as a long-term commitment and the municipality, together with service providers and provincial planning and treasury, remain committed to the project. As from the 2017/2018 the municipality has been able to table mSCOA compliant budgets for approval by the council in line with the applicable mSCOA chart.

To date, the following modules have been fully implemented, namely Planning, Billing, Ledger, SCM, Payroll (with leave module under implementation) and Performance Management.

#	MSCOA MODULE/PHASE	IMPLEMENTATION STAGE	COMMENTS/REMEDIAL ACTION	DATE
1.	Planning/Budget	Completed	None	N/A
2.	Billing/Revenue	Completed	None	N/A
3.	Ledger	Completed	None	N/A
4.	SCM and Expenditure	Completed	None	N/A
5.	HR and Payroll	Completed	Leave sub-module is still in implementation phase. A meeting is scheduled for 02 <sup>nd</sup> April to resolve challenges and conclude its implementation.	
6.	Assets Management	In Progress	The implementation is on hold pending the clarification of certain functionalities by the vendor as no municipality in the province has successfully implemented it. The municipality will also consider initiating the process once the 2022/23 FAR audit is finalised to have audited take on balances	

			Furthermore, PT had a meeting	
			with the system vendor for them to	
			demonstrate the functionality o	
			the module.	
7.	Inventory Management	Not Completed	The municipality resolved to only	01 August 2024
			implement the module after the	
			Assets Management module has	
			been implemented.	
8.	Performance Management	Completed	Module implemented successfully	N/A
			Only support is required wher	
			requested as the module is no	
			used on a daily basis.	

## <u>Challenges</u>

- HR/Payroll module has been implemented successfully; however, the officials still need learn how to identify imbalances and do recons to ensure that all the payroll related items balance.
- More officials need to be trained on the Payroll module to reduce reliance on service provider in cases of emergencies.
- Leave sub-module should be implemented soonest as the municipality runs the risk of losing manual records on leave, as a result of not fully implementing it.
- Proper care needs to be taken by officials capturing items (i.e., invoices, payments description etc,) so when reconciliations are done, they're thoroughly done with description speaking to the purchased items.

The Following concerns / activities have been raised with the System Vendor;

- Turnaround time for system queries.
- Improved creditors listing which can easily be reconciled to the general ledger and the unpaid orders.
- Improved automated monthly bank reconciliation with supervisory checks.
- Service provider should develop reports requested by NT (i.e., audited actuals report, audited creditors etc..)

The municipality has also resuscitated the regular technical meetings with system vendor to ensure all concerns raised are addressed timeously. Furthermore, the municipality has also resolved to revive the mSCOA Steering Committee to form part of the ICT Steering Committee to give adequate attention to the mSCOA related issues.

The Municipality compiles Section 71 and Section 72 reports 10 days after the closing of the month and submits to Treasury, Section 71 also goes to monthly Finance Standing Committee. S52d are compiled quarterly at the end of the month after the quarter and

submitted to Treasury and COGTA., Yearly reports are submitted to Treasury and AG by the 31<sup>st</sup> August on an annual basis.

## CHAPTER TEN: PERFORMANCE MANAGEMENT SYSTEM

## 1. Monitoring & Evaluation System & Unit

The M & E unit consists of the Manager Governance and Compliance with a Risk Management Officer and an intern. The Unit falls under the Municipal Managers Office. The Unit is responsible for the development of the Institutional SDBIP and departmental SDBIP. For administrative efficiency the PMS scorecard is combined with the SDBIP so that only one report is received. The SDBIP, PMS and IDP objectives, strategies, indicators and targets are aligned on an annual basis.

The S56 Managers scorecards and that of the line managers' scorecards are developed by Corporate Services. The unit in Corporate Services is headed by the HR Manager and one PMS Co-ordinator.

The evaluations for the 2021/22 financial year have been completed in line with the PMS policy which states that Directors will only be formally assessed once the final annual report is approved. The evaluation for 2022/2023 will be done at the end of the 4<sup>th</sup> quarter of 2023/2024.

Annual assessments are done after the approval of the Annual Report by Council and the quarterly ones are done within 30 days after the end of each quarter.

To verify that targets are met, the responsible individuals submit quarterly reports with their portfolio of evidence to the Head of Department who checks it and submits it to the Manager Governance & Compliance. It is checked and a quarterly assessment is carried out. Formal assessment is only done in the second and fourth quarter. The mid-year assessment for 2023/24 (Q2) was carried out at the end of March 2024.

## 2. **MPAC**

The MPAC has been trained again just to ensure that members are fully conversant with their roles and responsibilities. The Committee meets and discusses the departmental quarterly reports submitted by Directors and develops an annual S 46 report on performance assisted by the Manager Compliance and governance. As MPAC has improved its capacity, so has its ability to interrogate the evidence provided by directors to support that target have been met. As a result, the compliance with reporting and submitting of evidence has been much improved. SLM has an established MPAC committee and sits on a quarterly basis.

Cllr Mpiti -Gxelesha was appointed in February 2023 as MPAC Chairperson

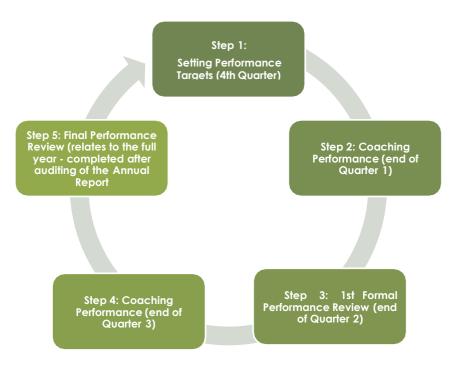

## 3. PMS Implementation and Roll Out

The Municipality has implemented an organisational PMS as per the policy adopted in 2018. Roll out to Managers below S56 occurred in 2014/15.

The further roll out to personnel under Managers occurred in 2020/2021. This process was not completed and will be revived in the 2023/2024 financial year together with the introduction of an electronic PMS system.

## 4. Summary of the Performance Management Policy

The policy was adopted by Council in 2018. The employee Performance Management System involves the following cycle which extends from 1 July – 30 June annually:

Annually, the following steps are taken:

## Step 1: Fourth Quarter (Planning for the next cycle).

Scorecards for staff are developed and all targets are written according to the prescriptions relating to the setting of performance targets. There is alignment between scorecards, the SDBIP, Budget and IDP.

- Manager and subordinate discuss and agree on targets.
- Areas for development are identified and reflected in a Personal Development Plan (PDP) or customized action plan that is signed by both parties in order to show

commitment to achievement. This reflects the training and development needs that must take place in order to ensure that the subordinate is able to meet the required targets; and

• The Municipal Manager and s56 Directors and Middle Manager's sign annual performance agreements, applicable for this period.

## Step 2: First Quarter Coaching and Reinforcement – informal Assessment

- At the end of this quarter the manager and subordinate meet to discuss actual performance against required performance. Achievements are commended and appropriate Action Plans developed in order to address any highlighted performance issues; and
- Action Plans are monitored so that appropriate action occurs, and targets are met.

## First Formal Review: Assessment

- Manager and subordinate meet to discuss the formal assessment and the rating of actualperformance against expected performance for all performance indicators. (The manner of ratings follows below). Agreement is reached on ratings and commitment (action plans) to required action to ensure that required targets are achieved.
  - Institutional Performance (Targets) (includes Directorates individual targets) are formally assessed through the s72 performance report in Q2.

## Third Quarter: Coaching and Reinforcement-informal Assessment

- At the end of this quarter the manager and subordinate meet to discuss actual performance against required performance.
- Achievements are commended and appropriate Action Plans developed in order to address any highlighted performance issues; and
- Action Plans are monitored so that appropriate action occurs.

## Fourth Quarter: Final Review and Assessment (Formal Panel Assessment)

- This assessment occurs <u>after</u> the auditing of the s46 / Annual Report. This is necessitated inorder to be able to verify (from an external source) the achievement of targets/the extent to which targets have been achieved.
- Assessment of performance for <u>all</u> performance indicators is undertaken and, in this instance, assessment is undertaken by a panel, constituted according to the Framework, and detailed below. As detailed within the Framework and Policy, slight differences will be observed in the final assessment (panel constitution and process).
- An <u>annual assessment</u> may only occur after the Auditor General has audited the s46 /Annual Report; and Portfolios of Evidence are kept by all applicable (The Municipal

Manager, the Directors and other identified Managers and staff in order to validate claims of performance.

## Developing Scorecards

When developing scorecards, the following basic principles apply:

• Each scorecard for the Municipal Manager and s56 Directors and middle managers is compiled of Key Performance Areas (that make up 80% of the scorecard weighting) and Core Management Competencies (that make up 20% of the scorecard weighting);

Performance Agreements are concluded annually for the Municipal Manager and s56 Directors and Middle Managers.

- Staff at lower levels <u>will make use of a generic scorecard</u> that will be utilized to evaluate performance and will constitute 100 points. This will become effective at the time that the PMS is applicable to them.
- Senqu Municipality has adopted the five National Key Performance Indicators as contained within the 5-year Local Government Strategic Agenda as their Key Performance Area's (KPA's) within the organisational performance scorecard.
- Individual performance scorecards: population of individual performance scorecards are dependent on the area/level of importance and the amount of emphasis that this National KPA would carry within this particular Directorate. The only prescription is that the total number allocated for the weights of the KPA's is 80% and the remainder of the scorecard will be made up of Core Management Competencies (CMC's) which will represent.
- Each KPA is individually weighted according to the level of importance and the amount of emphasis that this KPA would carry within this Directorate. The only prescription is that, that the total number allocated for the weights of the KPA's is 80%.
- The remainder of their scorecard adding up to 20% and made up of Core Management Competencies (CMC's). <u>Three compulsory CMC's</u> and one additional CMC are required in terms of the PerformanceRegulations/pms policy and are detailed as follows:
  - Financial Management
  - People Management and Empowerment
  - Client Orientation and Customer Focus

The targets contained within the CMC's must be different to those reflected within the KPA's. If necessary, targets that have already been agreed to may be removed from the KPA's and reflected within the CMC's. Under no circumstances may targets be duplicated between the two.

## Rating of Employee Performance

LEVEL	TERMINOLOGY	DESCRIPTION
5	Outstandingperformance	Performance far exceeds the standard expected of an employee at this level.
4	Performance significantly above expectations	Performance is significantly higher than the standard expected in the job.
3	Fully effective	Performance fully meets the standards. expected in all areas of the job.
2	Performance not fully effective	Performance is below the standard required for the job in key areas.
1	Unacceptable performance	Performance does not meet the standard expected for the job

The rating of an employee's level of performance, whether in the category of s56 or as a middlemanager, requires that ratings occur in terms of the rating calculator reflected below:

## Assessment and Rating for the Municipal Manager and s56 Directors and Middle Managers

• Assessments are based on the degree to which a performance indicator has been met. <u>Failure to produce adequate evidence</u> will result in the lowest rating being awarded i.e., a rating of "1" rating.

## Assessment and Rating for other Staff

Staff will be rated according to performance on a set of stipulated targets (generic issues). The slightlymodified rating scale of 1 - 5 will be utilized (adjusted/modified slightly).

## Performance Bonuses

The applicability of the PMS Framework is being cascaded over a period of time from the level of s56 manager down to middle managers reporting to s56 employees and finally to all levels below in a cascade effect.

Performance Bonuses applicable to s56 managers

For the Municipal Manager, s56 Directors and Middle Managers to qualify for a performance bonus, the ratings of all panelists' are required to be consolidated and changed into averaged scores (representative of the entire panel). These are consolidated by the Performance Management Facilitator appointed for this purpose.

The panel constitution for the Municipal Manager and s56 Managers (as reflected within the Regulations) is detailed below:

EVALUATION OF THE MM	EVALUATION OF S56 DIRECTORS ACCOUNTABLE TO THE MM
Mayor	MM
Chairperson of the auditcommittee or Audit Committee Member	Chairperson of the audit committee or Audit Committee Member
Mayor from Another municipality	MM from another municipality
Ward committee Member nominated by Mayor	Portfolio Councillor or Exco Member as nominated by the Mayor
Exco Member as nominated by the Mayor	Governance and Compliance Manager
Governance and Compliance Manager	PMS Facilitator
PMS Facilitator	

Bonuses are awarded according to a sliding scale – achieved by doubling the score (a total of 100 as per each scorecard), so as to reflect a total out of 200 – applicable to the rating scale. A score of 130% to 149% is awarded a performance bonus ranging from 5 - 9%, and a score of 150 and above is awarded a performance bonus ranging from 10% - 14%.

## Merit awards applicable to the Municipal Manager and s56 Directors (budget permitting)

Merit awards for the Municipal Manager and s56 Directors are determined by assessing performance against required targets. Once performance criteria have been established, performance targets are reviewed regularly. At the end of the financial year, actual performance is compared against the agreed performance targets to determine the magnitude of the merit award. The merit award is calculated as a percentage of the total annual remuneration package of the employee.

## • Performance Bonuses applicable to Middle Managers

Middle Managers are required to prepare and present a Portfolio of Evidence – substantiating claims of performance for each Performance Indicator for KPA's and CMC's. Bonuses are awarded according to the following sliding scale – achieved by doubling the score (a total of 100 as per each scorecard), to reflect a total out of 200 – applicable to the rating scale.

For Middle Managers to qualify for a performance bonus, the ratings of all panelists are required to be consolidated and changed into averaged scores (representative of the entire panel). These are consolidated by the Performance Management Facilitator appointed for this purpose.

The panel assessment panel for middle managers is constituted as follows:

ASSESSMENT PANEL FOR MIDDLE MANAGERS	
Director (for relevant Directorate)	
Manager (Relevant to Division) being reviewed (self-score and motivation /POE).	
PMS Facilitator	
Manager: Governance and Compliance or nominated other	

Bonuses are awarded according to the following sliding scale – (a total of 100 as per each scorecard), so as to reflect a total out of 200 – applicable to the rating scale.

The consolidated scores are doubled, and bonuses are applicable as per the Middle Manager sliding scale

## Performance Bonuses applicable to all other staff (below Middle Management level)

All other staff will be eligible to achieve a performance bonus providing they achieve a stipulated rating during the final review that is applicable to the assessment of annual performance and is detailed in thetable that follows. Only one formal assessment occurs – after the 4<sup>th</sup> Quarter. Using the rating scale of 1 to 5 for achievement on targets as specified in terms of a standardized scorecard, the ratings of all panelists' will be averaged and an average rating for each incumbent will be obtained which will translate to an overall rating that ranges from 1 to 5. The employee, their Manager and the Director form a panel which assesses and rates performance for each indicator on the generic scorecard. The rating for each indicator is averaged amongst the panelist's and all final ratings are added together and averaged (rounded up) to achieve an overall final rating that is equivalent to a 1,2,3,4 or 5 overall.

The panel assessment panel for other staff (below Middle Management) is constituted as follows:

ſ	PANEL FOR STAFF BELOW MIDDLE MANAGEMENT
I	Director (for relevant Directorate)
I	Manager (Relevant to Section) being reviewed
-	The Employee Being Assessed
I	PMS Facilitator

Performance rewards for other staff are applicable as follows:

AVERAGE RATING	MERIT AWARD
5	60% of monthly basic package
4	40% of monthly basic package

AVERAGE RATING	MERIT AWARD
3	20% of monthly basic package
2	0%
1	0%

# CHAPTER 11: DISTRICT DEVELOPMENT MODEL (DDM) AND ONE PLAN

## 1. Introduction

"Cabinet approved the DDM as a government approach to improve integrated planning and delivery across the three spheres of government with district and metro spaces as focal points of government and private sector investment. The envisaged integrated planning and delivery in the district and metro spaces will be enabled by joint planning, budgeting and implementation process. The DDM articulates an approach by which all three spheres of government and state entities work cooperatively in an impact oriented way to ensure enhanced performance and accountability for coherent service delivery and development outcomes. The DDM is anchored on the development of the One Plan. This plan is an intergovernmental plan that outlines a common vision and desired future outcomes in each of the 52 district and 8 metro spaces. The One Plan sets out a long-term strategic 4 framework to guide investment and delivery in each district and metro spaces in the country (COGTA, June 2021)".

The Joe Gqabi District Municipality developed its draft One Plan in 2021 and undertook workshops with various stakeholders in May 2022 to update and finalise the plan. It was reviewed in February 2023.

## 2. Purpose of the One Plan

- To give effect to the **District Development Model (DDM)** approved by Cabinet as a practical method to improve service delivery and development impact in the Joe Gqabi District Municipality space through integrated planning, budgeting, and delivery by all three spheres of government working together with stakeholders and communities.
- To localise and synergise the National Development Plan (NDP), the Medium-Term Strategic Framework (MTSF), National Spatial Development Framework (NSDF), Integrated Urban Development Framework (IUDF) and key national and provincial sector policies/strategies/plans with socio-economic and spatial development logic of the Joe Gqabi District Municipality.
- To express a coherent and predictable government approach in relation to these key priorities through a Long-Term Strategic Framework (One Plan) for growth and development of the Joe Gqabi District Municipality space that is co-produced by all three spheres of government together with stakeholders and communities.

- To enable a programmatic Intergovernmental Relations approach in relation to Joe Gqabi District Municipality through implementation of the One Plan that will serve as an impact performance framework tracking the commitments and spending of national and provincial sector departments and the Joe Gqabi District Municipality according to the **shared vision** and desired future development of Joe Gqabi District Municipality and its people.
- To create an **environment** which is conducive for **investment**.
- To stabilize governance and financial management practices in the Joe Gqabi District Municipality.

## 3. Pillars of the One Plan

These six DDM Transformation Focal Areas are:

- i. **People Development and Demographics** the process of understanding the current population profile and development dynamics and by which a desired demographic profile and radical improvement in the quality of life of the people is achieved through skills development and the following 5 transformations discussed below (economic positioning, spatial restructuring and environmental sustainability, infrastructure engineering, housing and services provisioning, and governance and management).
- ii. **Economic Positioning** the process by which a competitive edge is created that enables domestic and foreign investment attraction and job creation on the basis of an inclusive and transformed economy. The economic positioning informs the spatial restructuring and has to be sustained through protecting, nurturing and harnessing natural environment and resources.
- iii. **Spatial Restructuring and Environmental Sustainability** the process by which a transformed, efficient and environmentally sustainable spatial development pattern and form is created to support a competitive local economy and integrated sustainable human settlements. Spatial restructuring informs infrastructure investment in terms of quantum as well as location and layout of infrastructure networks.
- iv. **Infrastructure Engineering** the process by which infrastructure planning and investment especially bulk infrastructure installation occurs in order to support the transforming spatial pattern and form, meet the needs of a competitive and inclusive local economy and integrated human settlements, and ensure demand for housing and services is met in a sustainable way over the long-term.
- v. **Integrated Services Provisioning** the process by which integrated human settlement, municipal and community services are delivered in partnership with communities so as to transform spatial patterns and development for planned integrated

sustainable human settlements with an integrated infrastructure network. This also requires holistic household level service delivery in the context of a social wage and improved jobs and livelihoods.

vi. **Governance and Management** – the process by which leadership and management is exercised that planning, budgeting, procurement, delivery, financial and performance management takes place in an effective, efficient, accountable and transparent manner. It also includes spatial governance, that is, the process by which the spatial transformation goals are achieved through assessing and directing land development and undertaking effective land use management and release of municipal/public land.

## 4. Alignment to Senqu Municipality KPA's

	Alignment to Senqu KPA's
People Development and Demographics	Environment and spatial development
	Municipal transformation and institutional development
Economic Positioning	Local Economic Development
Spatial Restructuring and Environmental Sustainability	Environment and spatial development
Infrastructure Engineering	Basic service delivery and infrastructure
	Municipal Financial Management and viability
Integrated Services Provisioning	Good Governance and Public Participation
	Municipal Financial Management and viability
Governance and Management	Good Governance and Public Participation
	Municipal transformation and institutional development

## 5. Alignment to key government priorities to be implemented in district

## 6.Alignment to vision, goals, outcomes and targets

OVEDALL VIEW	ON STATEMENT FOR DISTRICT
	n improved quality of life for all of its citizens
A district with a	in infortoved quality of the for all of its enfacts
Fight poverty th	rough stimulating the economy and by meeting basic needs, improving service delivery quality, promoting corpora
governance and	building the capacity of government and communities within a sustainable environment.
	premised on the following key elements:
	onomy and fight poverty
	ls and improve service delivery quality
-	ilding of capacity
Fight fraud and	corruption and ensure compliance
Grow tourism a	nd related businesses
Grow pro-poor a	and labour intensive programmes
Grow agricultur	e and downstream industries
Promote sustain	able development
The overall visio	on of the District will be achieved through meeting the following strategic objectives:
Provide access t	
	nplement job creation and poverty alleviation initiatives
	apport regional economic development initiatives
Improve human	resource capacity and potential
Ensure sound an	nd effective financial management and reporting
Facilitate interge	overnmental cooperation and coordination
Communicate e	ffectively with communities
Establish and su	pport municipal oversight systems, mechanisms and processes
Facilitate the de	velopment of a healthy and inclusive society
PILLAR 1: DEM	MOGRAPHIC CHANGE AND PEOPLE DEVELOPMENT FOCUS AREA
Overarching	Enhance the capabilities of individuals, communities and institutions to participate in all spheres of activity;
Goal for this	transformation - tackling inequalities and vulnerabilities through changes in policies, laws, budgetary allocations
Pillar	and redistributive measures; and development and generation - increasing consumption patterns of the poor,
	promoting local economic development and enabling poor people access to economic and social opportunities
Outcomes	Promote equitable gender profile in government and community institutions
	Prevent and reduce the disease burden and promote health
	Treatment outcomes to align with the updated targets of the 90-90-90 strategy.
	Perinatal morbidity and mortality to less than 12.5/1000 live births
	Maternal mortality reduced from 3/ 5204 to 1/5024 by 2024

	Maternal mortality reduced from 3/ 5204 to 1/5024 by 2024
	Reduce under 5 child morbidity and mortality to less than 13/1000 deliveries by 2021/22
Targets	Reduce perinatal morbidity and mortality to less than 12.5/1000 live births
	Reduce the number of neonatal deaths to less than 10/1000 by 2021/22 (financial year)
	Reduce under 5 child morbidity and mortality to less than 13/1000
	deliveries by 2021/22
	Increase people living with HIV/AIDS with suppressed viral loads to 90% by 2020 to achieve 90-90-90 targets.
	Increase TB treatment success rate to 90% by 2020
	Increase Hypertension screening rate to 250 000 by 2021/22
	Increase Diabetes screening rate to 250 000 by 2021/22

292

	Patient Experience of Care survey rate
	Percentage of patients satisfied with their experience of care in public health facilities
	Percentage of Health facilities compliant with Occupational health and safety
	Reduction of Contingent liability of medico-legal cases
	Number of institutions with quality improvement:
	Monitoring and response forums formalized and convened quarterly.
Senqu	Implementation of the HIV & Aids strategy
Alignment	Mainstreaming policy
	Meetings of the Senqu HIV & Aids Forum
	Ensuring gender equity in employment through the employment equity committee

#### PILLAR 2: ECONOMIC POSITIONING FOCUS AREA

Overarching	Promote economic growth through the initiation, promotion and facilitation of economic development and
Goal for this	investment projects throughout Joe Gqabi District.
Pillar	Systematic poverty eradication through a holistic, integrated and multidimensional approach to pro-poor
	programming.
	Grow priority sectors namely agriculture (including forestry), agro-processing, trade and tourism
	Stimulate economic growth through government and private sector investment
	Promote and administer sustainable economic development and job creation.
Outcomes	Vertical and horizontal integration of policy implementation
	Enhanced economic development and investment in the region.
	A focus on developing nodes and areas where economic opportunities and resources exist, or where such
	opportunities can be stimulated
	Developed institutional capacity and internal systems enabling strategy implementation
	Implementation of partnerships in support of (Township Economy Revitalisation Programme) TERP Roll out of
	the Provincial Business Incubation Framework and implementation model
	Enterprise Development projects
	Policy awareness and compliance
Targets	Development of Economic Strategies
	Number of manufacturing initiatives facilitated
	Agro-processing Industry Development
	Number of job opportunities created through mass employment programmes
	Number of economic development projects successfully implemented
	Reduce the unemployment rate to 15% by 2050
	Reduce poverty from one-third to one-sixth of the population by 2050
	Increase the annual GDP growth rate from the then average of 3% to 4,5% per year for the period 2030 to 2060
	Create 10 000 job opportunities annually from 2022
	Export diversification index
	Value of exports from the EC
	Number of trained people participating in the economy
	Jobs created
	Number of new tourism routes packaged
	Tourism product diversification index
	Tourism Experience Support Index
	Number of tourism products supported with grading
	Number of domestic tourists visiting the Eastern Cape
	Domestic tourism ranking
	% contribution of domestic tourism to the provincial GDP-r
	% of trained people who are active in the economy
	Compliance index of permits % authorizations
	Number of investments realized
	Value of investments realized
	% GDP-r Growth rate of 1.8%
	Size of the secondary sector in terms of GDP-r
	Number of domestic tourists visiting the Eastern Cape
Senqu	Implementation of the EPWP programme including CWP
alignment	Implementation of the LED and Tourism strategy and plans
-	Increasing capacity and procurement of SMME's

PILLAR 3: SPATIAL RESTRUCTURING AND ENVIRONMENTAL SUSTAINABILITY FOCUS AREA

Overarching	A growing, transformed, diversified and inclusive green economy in a sustainable environment
Goal for this	
Pillar	
Outcomes	Identify opportunities and constraints. Through defining spatially sensitive areas and identifying areas that present opportunities for interventions.
	Identify preferred alternatives by recommending the land uses and sectors to be promoted. Integrate sustainability into the planning process.
	Guide the formulation of plans and programmes. Use the vision and objectives to guide the identification of appropriate development interventions.
Targets	Ensure that at least 10% of critically endangered and vulnerable vegetation is formally conserved through a system of national or provincial protected areas by 2050.
	Promote responsible (green) energy management and economic spinoffs
	Number alternative energy interventions (solar/wind farms) implemented in the District by 2030
	Proportion of women, youth and people with disabilities accessing government procurement spend
	By-laws reviewed
	Compliance with Provincial Annual Ambient Air Quality Standards
	Number of government-owned ambient air quality monitoring stations meeting minimum data requirements and reporting to the SAAOIS
	Percentage of areas of state managed protected areas assessed with a METT score above 67%
	Number of hectares added to the Provincial Conservation Estate
	Game farm transformation index
	Amount of installed renewable energy capacity in the Province
	% increase in volume of waste recycled
	% reduction in number of environmental crimes committed
	% of empowered communities knowledgeable about environmental issues
	% reduction in number of environmental crimes committed
	% increase in volume of waste recycled
Senqu	Implementation of bylaws
Alignment	Increasing waste reduction techniques
	Increasing waste recycling iniatives in new solid waste sites

## PILLAR 4: INFRASTRUCTURE ENGINEERING FOCUS AREA

Overarching	Provide access to basic services
Goal for this	
Pillar	
Outcomes	Develop and maintain water and sanitation infrastructure
	Provide effective and efficient disaster risk management, fire and rescue services
	Expand and fast-track the provision of universal access to basic services
	Expand and fast-track the provision of universal access to basic services
Targets	Number of District Water forum meetings
	Review WSDP
	Ratio of fire incidents responded to as a proportion of entries recorded in the Occurrence Book
	Number of district disaster management advisory forum meetings held
	% of households with access to basic level of water
	% of households with access to basic level of sanitation
	Number of new households provided with potable water connection
	Number of new households provided with sanitation service (toilets)
	Number of infrastructure status quo reports compiled per LM
	Develop 3-year Infrastructure Plan
	Develop MIG Implementation Plan
	Develop PMU Business Plan
	Compile MIG annual report
	Number of reports on implementation of EPWP
	% of Progress for Water Supply Infrastructure completed for Herschel Pipeline by June 2021
	Number of villages that were supplied with portable water by June 2021
	Appoint sub-consultants for Survey Services, ISD services, Geohydrological Services, Geotechnical Services, OHS services, by June 2021
	% of construction progress completed on development of Barkly East WTW and associated infrastructure by June 2021

	% of Construction Progress completed for the Development of Burgersdorp Water Treatment Works (WTW) by
	June 2021
	% of Construction Progress completed for the Development of Oviston Water Treatment Works (WTW) by June
	2021
	% of Construction Progress completed for the Development of Mt Fletcher Bulk Water Supply Scheme Phase 2
	by June 2021
	Appoint Professional Service Provider by for Aliwal North Holding Dams June 2021
	Appoint service provider for Construction services for Maclear Water Treatment Works by June 2021
	Number of new households provided with sanitation service (toilets) in Senqu LM by June 2021
	Number of new households provided with sanitation service (toilets) in Elundini LM by June 2021
	% compliance with SANS 241 for drinking water quality
	% reduction on network water losses (unaccounted for water)
	Number of process audits undertaken to assess water quality and compliance
	% of construction progress completed on Refurbishment of Barkly East, Aucamp and Ugie WTWs and associated
	infrastructure by June 2021
	% of Construction Progress completed for the Development of Burgersdorp Water Treatment Works (WTW) by
	June 2021.
	% of Construction Progress completed for the Development of Oviston Water Treatment Works (WTW) by June
	2021
	% of Construction Progress completed for the Refurbishment of Aliwal North, Burgersdorp and Steynsburg and
	Prentjiesburg WWTWs by June 2021
Senqu	Senqu Infrastructure projects for roads and solid waste sites
alignment	Senqu road maintenance programme
	Senqu electricity maintenance programme
	Senqu street lighting project

PILLAR 5: INTEGRATED SERVICE PROVISIONING FOCUS AREA		
Overarching	Reduce the vacancy rate to no more than 12% across all government institutions situated in the Joe Gqabi District	
Goal for this	Municipality.	
Pillar		
Outcomes	Still to be provided by district	
Targets	Still to be provided by district	
Senqu	Filling vacancies as they occur per the policy	
alignment		

## PILLAR 6: GOVERNANCE AND FINANCE FOCUS AREA

Overarching	Implementing cost containment measures that prioritise expenditure on core service delivery programmes and
Goal for this	less on non-core items, whilst ensuring the stabilisation of governance in the province, both at a political and
Pillar	administrative levels
Outcomes	Highly effective government institutions
	Fiscal Consolidation which entails the implementation of cost containment measures and prioritisation of
	expenditure on core service delivery programmes.
	Supply Chain Management Reforms which entail support to SMMEs through preferential procurement and
	payment of suppliers within 30 days.
	Infrastructure Support which enhances infrastructure planning and delivery; and
	Provincial and Municipal Governance and Accountability to improve financial management, audit outcomes and
	delivery of services in the Province.
	Prudent use of resources and fiscal consolidation that can be implemented through the following interventions:
	Controlling expenditure on non-core items, whilst protecting non-negotiable and key service delivery items.
	Reprioritisation of budgets, enforcing budget cuts and expenditure ceilings; o Controlling personnel budgets and expenditure.
	Rationalising and streamlining Public Entities; and
	Provincial Own Revenue Enhancement. o Strengthening financial governance and oversight both at provincial
	and local government level
	SCM reforms - that entail support to SMMEs and proportion of youth, women, people with disabilities, military
	veterans and SMMEs supported through preferential procurements. Payment of suppliers within 30 days and

	continuing to support suppliers to register on the Central Supplier Database including endeavours to achieve
	value for money.
	Infrastructure Support – to ensure that infrastructure planning, delivery, operation and maintenance is improved,
	whilst also ensuring that infrastructure investments help to unlock economic potential through:
	infrastructure budgeting and financing.
	procurement and contract management.
	localisation of benefits; and
	Infrastructure investment responds to spatial aspects of future infrastructure demand.
	Provincial and Municipal Governance and Accountability - through the implementation of the Financial
	Management Accountability Framework to promote good governance and accountability. To improve audit
	outcomes in the province, concerted effort will be put on the implementation and monitoring of the Provincial
	Audit Intervention Plan
Targets	Number of government institutions meeting their performance targets
	100% Percentage reduction on financial information audit findings by 2025
	Achievement of asset management maturity level 3 by 2023
	Achievement of asset management maturity level 3 by 2023
	Achievement of infrastructure procurement maturity level 3 by 2023
	Number of Institutions that achieve unqualified audits (Provincial departments and public entities)
	% provincial risk profile mitigation measures implemented by departments
	Number of funded annual budgets adopted by government institutions
	% expenditure of Municipal Infrastructure Conditional Grants
	% Percentage reduction of irregular expenditure
	% Percentage reduction of fruitless and wasteful expenditure
Senqu	Implementation of cost cutting measures
alignment	Clean audit annual plan
	Ensuring that MIG is spent
	Increasing usage of grant funding
	Implementation of revenue enhancement strategy
	Review of SCM policy to cater for SMME's
